An amendment to the Federal Crop Insurance permits farmers to pay premiums on wheat crop insurance two years in advance. This provision, it is stated, not only gives insurance protection, but also helps to remove a part of the national surplus from the market.

Matinee Or Night Circus Is Postively The Same

A night performance, beautiful because of the many lights and majority of patrons claim it far superior to matinee, not a single act is omitted .In spite of the fact that the night performance of all big circuses are exact counterparts of that which is exhibited in the afernoon shows there are many people who hold views to the contrary.

"See they are taking part of it away," someone will exclaim as he notes a string of trucks and huge semi-trailers leaving the circus grounds just about the time darkness is falling. "Oh yes" answers another, "One never sees the whole show at night perofarmance."

Yet the above conclusion is entirely erroneous, 'tis true the management "takes part of it away," from the showgrounds in the late afternoon, but that which is taken away is in no way connected with that which the public pays to see. It is merely the tents that have been used to house the vast equipment of the dining tents or kitchens and

There are the trucks connected with the blacksmith shop, harness room, barber shop and other equipment which run full blast during the day, but like the shops of a town close their doors at sunset and they too move on.

When the Famous Richard Bros., Circus appears in Elkton, for two performances, afternoon and night on Thursday, July 28th, you will positively see the same identical performance at night as presented in afternoon.
oher house-keeping departments.

Bugs Take Over Bridge

La Crosse, Wis., Milions of June bugs piledup like snowbanks on the Mississippi river bridge here. They made things so slippery that county snow polws had to clear the road before motorists could drive up the approaches. The bugs were piled more than two feet deep in places.

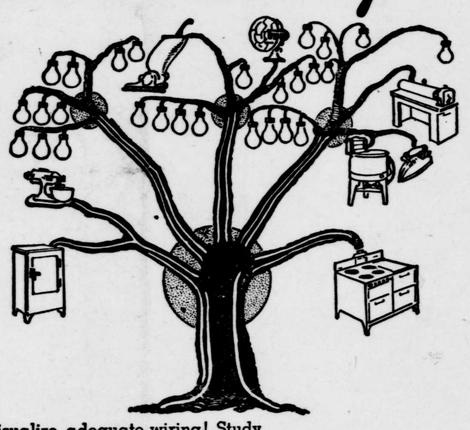
YOUR *Electric Wiring* IS LIKE A TREE!



- *60-Ampere Service*
- *Three 25-Ampere Sub-Feeders*
- *10 Final Branch Circuits*
- *Range Circuit*
- *Water Heater Circuit*

Here's an easy way to visualize adequate wiring! Study the tree above. The broad, sturdy trunk supplies life and strength to the branches. In your house, adequate wiring and plenty of copper serve as the trunk that provides a full supply of electricity for all the electric appliances. you'll ever want.

Investigate and see if your wiring is adequate and sufficient with — 60-ampere service; three 25-ampere subfeeders; and the final branch circuits stretching out to convenience outlets. Call your neighborhood electrical contractor, or your Conowingo Power Company office and ask for a thorough check.
