Chestertown Transcript.

TUESDAY, OCT. 15, 1878.

Capt. Lutz, the wounded commander of the dredging boat, was removed from our jail to Baltimore City Infirmary last Saturday.

The School Fund.—Kent county's apportionment of the State public school fund, for the quarter ending January 15th, is as follows: For the white schools $2,686.07; for the colored schools, $1,108.24.

Fare Reduced.—Yesterday, Oct. 14th, the boats of the Chester River Line reduced the rates of fare as follows: Between Baltimore, Kent Island, Queenstown and Greys Inn Creek, 75 cts. Between Baltimore, Quaker Neck, Booker's, Rolph's, Chestertown and Crumpton, $1.00

A meeting of the citizens of Easton was held on the evening of Oct. 3d, at which resolutions were passed looking to the procuring of suitable fire apparatus and the taking of other precautionary measures against fire. A committee of three was appointed, to report within thirty days.

Paving.—The town commissioners have recently paved the N. E. side of Cannon street, between Cross and High; the work was done by Mr. B. H. Gardner. The pavement on High street from Bordley's corner to T. W. Wickes's drug store, is being relaid and widened. They also purpose laying a pavement on the N. W. side of Princess street, from High to Cannon.

Valuable Real Estate.—We direct the attention of our readers to the sale, advertised in another part of this paper, of two very valuable farms, the property of the late Nathaniel Wolfe; one lying directly on Sassafras river, and the other adjoining the lands of the late William Janvier.

Sale of Farms.—C. T. Westcott, Esq., trustee, on Tuesday last sold "Huntingfield," containing 420 acres, to Thos. B. Hynson, Esq., for $6,050, subject to the payment of an annuity of $300 during the life-time of Mrs. M. A. B. Brown

Thos. B. Hynson, Esq., has sold to George B. Westcott, Esq., the two Comegys farms on Chester river, which he recently purchased, on private terms.

Dismasted.—The schooner Ann Maria, Capt. Delano, of Kent county, and oyster pungy Warwhoop were in collision at 8 A. M., Thursday, near the mouth of Chester river. The schooner was dismasted and had her sides stove in; damage $600. She has been towed to Baltimore for repairs. The injury to the pungy was not serious. Mr. Abe Schwartz and family, of this town, were on board the dismasted vessel, with his household effects and store goods, bound for Chesapeake City.

Escaped.—Quite an excitement was occasioned last Tuesday, about 5 P. M., by the escape from our jail of the young man Ford, committed the previous Friday for stealing a horse and carriage. Ford had irons on his legs, but somehow had managed to get rid of them; so that, when the deputy sheriff went into the cell to carry him frest water, Ford dashed past him and escaped. Pursuit was at once made, but unsuccessfully. He is still at large.

It is now in order for the authorities of the Peninsula towns to indulge in the usual vigorous *talk* about the necessity of suitable apparatus and proper organization to combat the fire-fiend. But as soon as the excitement occasioned by the dreadful conflagration which visited Easton dies out, it is likely that, as heretofore, the matter will be quietly dropped, arms will again be folded in fancied security, and the subject not be recurred to again until another conflagation suddenly calls it up.

Removals.—Within the past few months several families have left Chestertown and taken up their abode in Chesapeake city, viz: Mr. Z. Hubbard and wife; Mr. James T. Parks and family, and Mr. Abe Schwartz and family. We also learn that Mr. Wm. W. Parks and family are also going to move there. Mr. Hubbard and the Parks's are engaged in the manufacture of fertilizers, and Mr. Schwartz purposes engaging in the merchant tailoring business. No doubt they will there, as here, prove to be good citizens. May success attend them.

Captured.—Last Wednesday afternoon, a party of oyster dredgers, eight in number, were lodged in our jail on the commitment of Justice R. W. Calder. They comprised the captain and crew of the Sarah Skinner, a Baltimore schooner, and were arrested by Capt. Clements, commander of the oyster police sloop Mary Compton. In making the capture the crew of the Compton fired a number of shots, one of which took effect in the left arm of Captain Lutz; the ball passed through the arm above the elbow shattering the bone and making a serious wound. Capt. Clements' account of the matter is that the wind was high and the sea rough; that his boat got near enough to call to the crew of the Skinner and demand submission; but the Skinner refused to surrender and persisted in attempting to escape; he then directed his men to fire, but in doing so to fire into the sails and rigging of the fleeing boat. The injured captain says that the only bullet that was shot low he thinks struck him; that the other shots struck the sails and rigging above the heads of the crew, and he thinks his shooting was unintentional. Captain Clements was unremitting in his attentions to the wounded man, securing the services of a physician before reaching Chestertown, and immediately telegraphing to the unfortunate man's family and employer upon his arrival.

Fire Apparatus.—We learn that the Kent Mutual Fire Insurance Company has decided to expend the sum of one thousand dollars, provided the corporate authorities will join them with a sufficient additional amount for the purpose, to secure another fire engine and suitable apparatus. It is thought that another hand engine, of capacity equaling the present one, with a sufficient number of buckets, ladders, &c., will be ample, if properly manned and directed, to successfully combat and so keep under control any fire that may break out in our midst, as to prevent any serious conflagation—such, for instance, as the one that recently laid waste so large a portion of Easton. The committee—which was appointed some time since by the Fire Insurance Company—has, through its chairman, Chas. T. Westcott, Esq., had extensive correspondence with numerous makers of fire apparatus, and the conclusion arrived at is, that a good hand engine, with the one already possessed by the corporate authorities, will meet our needs in this particular. The question of buckets, fire-ladders, &c., is a minor one and can easily be settled. We hope that the matter will be carried to a prompt consummation, and a proper organization also effected; for without it apparatus cannot be effectively used, whatever its character or capacity. And when definite plans are finally settled upon, we think the town authorities should pass an ordinance, requiring, under heavy penalty, the public carters to turn out with their teams, at the first alarm of fire, and be in readiness to haul water wherever needed. Of ourse, they should be properly compensated. The utility of such an arrangement, we think, was plainly manifested at the late Voshell House fire, where, though only one team was used, a vast amount of water, in barrels, was brought and effectively used in quelling the flames.

Peninsula Fair Premiums.—The Middletown Transcript, of last Saturday, publishes the entire list of premiums awarded at the late Fair held near that place. The following were taken by citizens of Kent:

A Good Performance.—Our citizens have so often been victimized by strolling magicians with high-sounding titles, that they now fight shy of such performances; so that Monday night, when Prof. Seymour gave an entertainment very few attended; but those who did so witnessed a most excellent performance. We shall not attempt a description of the numerous feats; but as one of them was of a character seldom witnessed by most of our citizens, we think it worthy of a brief notice. The Professor erected on the stage what he styled a cabinet, an enclosure formed by four curtains held in position by a light frame-work of iron rods. At the back of it was a small square post, attached to the floor and held in an upright position by small iron stays. The cabinet contained nothing else, save a small camp-stool. Seating himself on the camp stool, the performer's hands were, by a gentleman of the audience, securely tied together behind his back, and then made fast to an iron ring in the upright post; a strap was placed around his neck and also made fast to the post, and lastly his legs were firmely bound together. An attendant then placed a banjo, tambourine and a small ordinary bell in the Professor's lap, the curtain in front was drawn, shutting off the view from the audience, when the tambourine and banjo were played upon, the bell rang, and then thrown over the top of the curtains out upon the stage. The sound of the instruments then ceased, and the curtain was immediately drawn, revealing the Professor apparently in the same position and as securely bound as at the moment the drawn curtain concealed him from the spectators; the tambourine and banjo were lying on his lap. An ordinary wooden-seat chair was then placed in the cabinet by his side, a hammer, nail and piece of wood laid upon it, the curtain again drawn, when at once the sound of the hammer was heard. As soon as it ceased the curtain was removed, and the performer was found tied apparently as securely as ever; but the nail had been driven into the piece of wood. He then requested some one from the audience to take a seat on the chair by his side and grasp him by the arms. A gentleman did so, (being first blindfolded), the curtain was drawn, and the Professor's voice was heard, saying—"Do you feel hands being rapidly passed over your person?" "I do indeed," said his companion in the cabinet, "and a good many hands at that." The curtain was again removed and the parties found in the same position as when first concealed from view, and the Professor seemingly as securely bound. Several of the audience went into the cabinet and "interviewed" the spirits, but none of them expressed a desire to repeat the visit. The "Punch and Judy" performance was first-class, and kept the audience in a continual roar; the Professor being as good a ventriloquist as a slight-of-hand performer.

Tuesday morning Prof. Seymour set sail for Annapolis. Had he remained and given an entertainment that night, a full house would no doubt have rewarded him. We learn that he expects shortly to return; when, with proper notice, we think he will be certain to have a good audience.

Orphan's Court, Tuesday, Oct. 8, 1878.—Present, Judges Nicholson, Shallcross and Willson. Mary S. Hynson, exec'x of the late Thos. W. Hynson, returned her first administration account and distribution of $11,508.43 cash in hand; also a list of additional sales, both of which were ordered to be recorded. The release of George W. Howard and wife and Geo. W. Howard, trustee for Celeste Clark, was received and ordered to be recorded. Jacob Highley, one of the executors of John Kennedy, returned a list of sperate and desperate debts due said deceased, which was examined and ordered to be recorded.

A Talk With Fruit Growers.

I HAVE now growing, on my farm, a fine seedling Peach Nursery, (from the seed of the Smock,) of over 200,000 trees.

Being from Smock seed, and growing on land that never grew trees before, they must prove especially hardy and prolific.

I shall bud 50,000 (commencing June 15th) for this Fall's planting; such trees will run from 3 to 4 feet in height.

I shall bud the balance in August, for planting the following fall. As must all planters have preference for special varieties, I propose to take orders, before the budding is done, customers furnishing their own buds if they prefer; so that all may be accommodated. Do not fail to give this matter proper consideration, and send in your orders early. By so doing you can secure just the varieties you want; but if delayed till you are ready to plant, nurserymen may not have the kinds you prefer. I will give instructions how to forward buds, upon inquiry.

I HAVE A GENERAL ASSORTMENT OF ALL KINDS OF NURSERY STOCK.

Twenty years' experience as an extensive Fruit Grower and Nurseryman, certainly entitles me to a reasonable share of patronage on this peninsula.

OZONE.

The advance of general intelligence and the progress of science has rendered it necessary that the medical profession re-investigate the

NATURE AND CAUSE OF DISEASE

and if possible discover new and more potent remedies for its cure. It is a well known fact that the science and art of medicine has in no wise kept peace with the advancement of the collateral sciences. Although great improvements have been effected within the last fifty years, as evinced by the fact that blood-letting, blistering, heroic doses or mercury and other

UNSUCCESSFUL METHODS OF TREATMENT

have been superseded by a far more rational system of practice, yet the knowledge of diseases and of remidies for their cure is almost exclusively monopolized by members of the medical profession, while the universal requirements for medical knowledge and remidies to cure disease render it

IMPORTANT THAT EVERY FAMILY

SHOULD BE IN POSSESSION OF SUCH FACTS AS WILL ENABLE THEM TO PERPETUATE LIFE AND ALLEVIATE SUFFERING.

PROF. W. PAINE, . M. M, D.,

The author of numerous works or medicine, and a teacher of more than thirty years in all departments of medicine and surgery, observing that nearly all the information of a medical character designed for the people, emanated from charlatans or medical mountebanks, has determined upon introducing the results of his

SCIENTIFIC INVESTIGATIONS AND DISCOVERIES

DIRECTLY TO THE AFFLICTED, so that all may receive the benefits of a long and arduous life of medical and surgical research and triumphant discoveries. The result of his researches is that Ozone is the

ANTISEPTIC ELEMENT

that prevents decay, fermentation and disease of all organic structures; that the atmosphere is pure and healthy only when

CHARGED WITH OZONE;

that its absence generates disease; that salt preserves meat when ozonized, and when the Ozone is removed the meat decays; that when the body is properly charged with Ozone,

DISEASE CANNOT EXIST,

and that its absence gives rise to almost every conceivable malady, such as CATRRH, CONSUMPTION, DYSPEPSIA, KIDNEY DISEASE, SKIN AFFECTIONS, NERVOUS DEBILITY, NEURALGIA, ALL FORMS OF FEVERS, RHEUMATISM, DIPHTHERIE, CANCER, and the growth of PARASITES.

The parasites, or microscopic germs, that creates disease, exist in the air, water and food, as well as in all portions of the body, but they are prevented from affecting the healthy tissues as long as the

BODY IS PROPERLY OZONIZED.

The Doctor has discovered a method of producing Ozone both a POWDER AND LIQUID FORM.-

LIQUID OZONE,

OR CATARRH VAPOR, when inhaled or taken into the stomach, antagonizes VRY FORM OF DISEASE, PURIFIES THE BLOOD, and almost immediately RESTORES THE PATIENT TO HALTH. It is perfectly innocent, and may be used with the greatest freedom by every one. It is put up, WITH FULL DIRECTIONS, in four ounce bottles at 50 cents, and eight ounce bottles, $1.

He also has prepared a pill, the

LIVER RENOVATOR,

that is highly ozonized, so that, while it purges the Liver, it disinfects the body and kills the germs of disease. 25 cents a box. The

BLOOD, STOMACH AND LIVER TONIC

gives tones to the stomach and body and enriches the blood. $1 per bottle. The

ANTISEPTIC OR ANTIPERIODIG POWDERS OR PILLS

will cure every form of

CHILLS AND FEVERS,

leaving the system free from disease. $1 per box.

The Professor has also fitted up a large and elegant HOTEL, THE PEABODY, NINTH ST., BELOW WALNUT, PHILADELPHIA, in which he has private consulting offices, and where he receives patients FROM ALL PARTS OF THE WORLD, and cures thousands of cases of Catarrh, Consumption, Cancer, etc., that NO OTHER TREATMENT CAN REACH. No one visiting Philadelphia should fail to stop at the

PEABODY HOTEL.

Invalids wishing to place themselves under the Doctor's professiona, carel may obtain SPECIAL RATES.

Medicines sent when ordered, and for sale by druggists and agents.

The Doctor has also for sale the following works, written and published by himself.

Domestic Practice of New School Remidies, 600 pp., $3.00.
Large Practice, 1000 pp., $6.000.
His "short Hand" Practice will when ordered be mailed on receipt of a three cent stamp.
