Ice 2¢ A CAKE

CROSLEY ICYBALL REFRIGERATOR

PROTECT YOUR HEALTH - SAVE FOOD

THE Crosley Icyball Refrigerator provides effective refrigeration at an extremely low cost.

The Crosley Icyball Refrigerator does not require electricity for its operation. All that is required is a regulated heating of the Icyball unit each day, for approximately the space of one hour and one-half. Gas may be used, or an oil stove to cook the unit. The result of this cooking is a clean dry cold lasting until the next day.

We have the Crosley Icyball Refrigerator on display in our store. Come in and be convinced of the real value, simplicity of operation and the beauty of these refrigerators.

FARMERS,

LIST YOUR

Repair Needs.

It would be hard to find a farmer what at some time or another had not lost valuable time waiting for necessary repair parts. Take this territory and total up the time lost in this way and it will astonish you. And all because repairs are not ordered as early as they should be.

There is no better time than right now—just before the busiest season on the farm—to go over your machines carefully, make a list of repairs you are likely to need and send it to us. With this list in our hands, we can order our stock so as to be prepared to met every call promptly.

Repair part service is a necessary part of our business. We realize what it means to you in time and money to get what you need at once. Help us to help you by making up your list now and sending it in to us.

THRIFT IS NOT PENNY PINCHING

"Several people have challenged the idea of thrift education in the school curriculm, saying that it teaches miseliness to the children." It embodies the point of view held by many and has come as the direct result of the false teachings of those who confuse money saving and thrift.

Persons who object to the teachings of thrift in the schools are within their rights if they have in mind simply this penny pinching conception of it. It is a fact that the encouragement of thrift, if designated as mere saving, would in all likelihood encourage miserliness upon the part of many children.

It was for this very reason that the American Society for Thrift as long ago as 1915 began laying the foundation for a thrift course in the schools of America through which the children would be taught the thrift of personal progress, climination of waste, efficiency, good health and good morals. For many years educators from all parts of the country gave thought and effort to the creation of concrete lessons in thrift. More than a year ago these efforts were reduced to the tangible form of an outline course of study in thrift, which, during the school year now drawing to a close, has found its way into thousands of classrooms.

What the children of America may gain from this course of study in thrift is suggested by the following except from one of its early chapters: "To apply one's self to the earning of money, to spending less than earned, and to investing wisely, constitute a large and important part of a rational thrift program. In addition to this, there are certain social aspects that need emphasis. The thrift of time, the thrift of energy, the thrift of health, conservation of natural resources all have a place in thrift work in school."

This writer recognizes the danger of going no further in the teachings of thrift than an appeal to the children to save their pennies. Such teachings would undoubtedly lead to miserly habits on the part of many but the teaching of a broad, progressive concept of thrift, meaning in a word the elimination of all waste, is not only advisable but is becoming more and more necessary for those who would hold their place in the race for personal success as the activities of mankind are organized today.

WORTON
