PEOPLE WAKING UP IN WICOMICO.

The Salisbury Advertiser in it issue of last Saturday sounds a note of warning to the people of Wicomico in a most significant editoral from which we clip the following strong statement, because of similar conditions existing in Kent county:

"There comes a time in the life of every organization when, if it is to live new blood must be diffused through its veins.

"This is due to the fact that after a while the old heads, who for years have been running things come at last to regard the organization as a piece of their individual property, and handle its affairs not as trustees, but as sole owners.

"The younger element, though willing to give to their elders the veneration and respect to their advanced years, yet are not satisfied to always act as servants or slaves.

"This is true in organizations from which there is no rewards to those in charge except honor; in organizations where the duties are in comparison with the rewards ardous.

"In a political organization the same is true as in other organizations, except in case of new blood, even more so.

"Rewards in the way of honors and in the way of the emoluments of office cannot be separate from party.

"It matters not how much one may theorize on the public good being the only excuse for a party's living; no matter how one may speak of the noble duty of citizens to give to their party and their country their services.

"Here, in this county, Wicomico, there is no use of sane men attempting to dodge the question. If the Democratic party is to live as the dominant force in this county, it must get clear of the old stagnant waters and inject new blood in its veins.

"From the beginning to the end there is an imperative demand for a change."

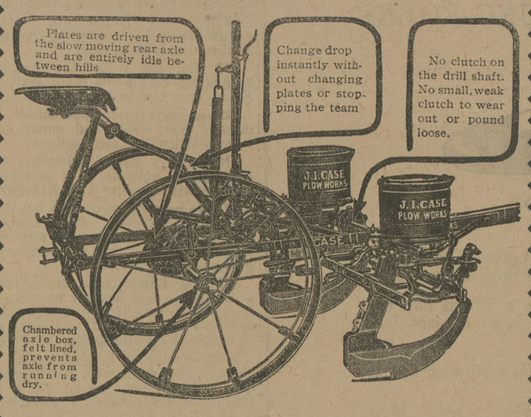
"No Clutch on the Drill Shaft"
OF THE J. I. CASE PLANTER



On all Planters other than the J. I. CASE Power Drive the action of the plates is controlled by a clutch on the running drill shaft.

The clutch soon wears out and may fail to work when you need it most. Avoid this danger by buying a J. I. CASE Power Drive Planter where the parts performing the function of the drill shift clutch are found on the slow moving MAIN axle. They are made heavy and strong. Don't buy until you see this accurate and reliable planter.
