The Transcript

THURSDAY MORNING, AUG. 4, 1887.

ighty-two cts. was the Baltimore quotation for prime wheat on y.

rs. T. R. Hubbard & Son make announcement to farmers in this erning fertilizers.

District Democratic Club will he town hall in Kennedyville, August 9th, at 8 P. M.

—Mr. Wm. Janvier advertises to sell on Saturday, the 13th inst., at his farm, some desirable live stock and other personal property.

—Mr. T. W. Eliason, Jr., calls attention of farmers in this issue to his "Chester Compound" and "Ammoniated Superphosphate" brands of fertilizers.

—The Baltimore *Sun* has a special correspondent in Europe this summer, and his letters, which appear from time to time in the *Sun*, are very interesting.

—Rev. Mr. Christian, Rector of St. Matthews Church, Houma, La ,will preach and administer the communion at St. Clement's, Masseys, next Sunday, at 10½ o'clock A. M., and have evening service at Millington.

—Mr. Thos. Mullen, one of the candidates for sheriff in the 3d district, was in town on Tuesday. Mr. Mullen seems in excellent spirits, and says he is prepared to lay the other candidates out on the day of nomination.

—The Maryland Prohibitionists have placed the following ticket in the field: For Governor, Summerfield Baldwin, Baltimore city; for Comptroller, Thomas E. Wright, of Dorchester county; for Attorney-General, James Pollard, Balto. city.

—The Easton *Democrat* of last week says: "Bishop Adams will be in Easton on Wednesday or Thursday next. The Bishop's family will arrive later in the season and will occupy the residence of the late I. C. W. Powell, Esq., which has been rented for that purpose.

—Downes & Jennings, formerly of 33 Hanover street, Baltimore, have, as will be seen by their advertisement elsewhere, removed to 407 Second street. They are located on the ground floor of the handsome "Rialto" building, directly opposite the Chamber of Commerce. At their new location they will be pleased to see their old friends.

—The Kent Guards, after considerable deliberation, concluded to join the encampment of the State militia at Hagerstown. The State steamer Governor McLane took the Guards to Baltimore on Monday afternoon. They will no doubt have a pleasant time among the hospitable people of Hagerstown, and learn something of camp life besides.

—Mr. John Bell, proprietor of the Rose Hill Nursery, located near Chestertown, makes a number of interesting statements connected with his nursery stock, which he will offer for sale this fall and next spring. Mr. Bell left documents at the *Transcript* office showing that he purchased 100 bushels of natural seed from Tennessee. The documents consisted of the bill of the man who supplied them and railroad and steamboat shipping receipts.

—A negro woman named Maria Mayze was arrested by Officer Simpson on Monday, charged by H. H. Barroll, Esq., with throwing slops and filth in the street. She was fined one dollar and costs by 'Squire Burgess. It would be well if it was generally understood that throwing slops of any kind in the street will make the party offending liable to arrest and fine. It would also be a good thing for the health of the town if those who know of such offenses being committed were to lodge complaint against the offenders as did Mr. Barroll in this case.

—The Denton *Journal* says: "Mr. John R. Griffin, who has perhaps the largest crop of peaches in Caroline county, has sold his entire yield to Croft & Co., Baltimore packers, for fifty cents per basket, delivered at Coward's Point wharf, on Tuckahoe River. This enterprise will divert to Baltimore the whole crop of peaches which Mr. Griffin for years has sold in New York. The transaction was made through Messrs. Crew & Loane, commission merchants. Mr. Griffin expects to deliver about 20,000 baskets, which will net the neat sum of at least $8,000.

—Orphans' Court, Tuesday, Aug. 2, 1887. —Present, Judges Walker, Hyland and Stevens.

On application, letters of administration on the personal estate of Enoch Jones, late of Kent county, deceased, were granted to Eliza Jones and James H. Hurtt, and Wm. B. Nailer and Enoch J. Moffett were appointed to appraise the personal estate of said deceased.

Letters of administration d. b. n. c. t. a. on the personal estate of Wilson Register, dec'd, were granted to James H. Baker.

—County commissioners met on Tuesday, August 2d. Full board present.

Board entered into a contract with L. W. Finely, agent Wrought Iron Bridge Co., for 38-foot bridge over Cypress branch, Millington, for $418.50, to be completed by the 1st day of September.

The examiners, James M. J. Byron, Samuel Burgess and Joseph R. Usilton, on the Broad Neck road made a favorable report on the extension of road to Lankford's bay, and located a landing thereon. The report lay over for further consideration.

Wm. J. Conlyn presented his official bond as constable for 5th district, which was approved and ordered to be filed for record.

Sunday citizens of 1st district presented their petition for a bridge over stream at Dreaka's mill, which was filed.

Court was further engaged in passing accounts to be paid by orders on collectors.

Personal Notes.

C. T. Westcott and family are at Asbury Park.

Mrs. Wilbur Eliason, Miss Anna R. Brown and Miss Hallie Beck are at Asbury Park.

Miss Carrie Harding, of Winston, N. C., is visiting at Rev. S. C. Roberts'.

Hon. W. H. Bians, of Baltimore, is summering at "Willsondale," the fine bayshore resort of Mr. Peter A. Willson, near Tolchester.

Messrs. S. Franklin and Chas. S. Smith have returned from a stay at Blue Ridge Summit, both feeling better for the mountain breezes.

Rev. J. H. Turner, Principal of Lutherville Female Seminary, was in Chestertown on Tuesday.

Mr. and Mrs. A. N. Ebaugh are visiting friends in the county.

Mrs. David B. Stewart, of Baltimore, is spending part of the summer at her old home in Kent.

Prof. A. E. Twiford has been in Chestertown during the past week. He will shortly leave for Sing Sing, New York, where he has a very pleasant position as Professor of Mathematics in St. John's boarding school for boys.

The Entertainment at Stam's Hall.

The entertainment at Stam's Hall on Thursday evening of last week for benefit of Sacred Heart Church, was a success, both as to musical and dramatic features. The audience, because of the intense heat, was not large. The first farce, "Betsy Baker," was a very laughable affair, introducing a husband so fond of his wife that she became tired of his devotions. The fun of the play consisted in a plot by which she was cured. Messrs. Maher and Furst and the Misses Wilson and Welch took the characters.

The musical portion of the programme consisted of a baritone solo, by Mr. Harry Furst, a vocal duet, by Mr. Hofsteller and Mr. Furst, a quartette by the Misses Mason and Rinn, and Messrs. Hofsteller and Furst, a flute solo by Mr. James A. Prevost, a soprano solo by Miss Georgie Masson, and a tenor solo by Mr. L. Hofsteller. Each of the renderings was appreciately applauded by the audience, but when Miss Georgie Masson, in response to an encore, sang "Coming thro' the rye," she was compelled to come on for a third time and give the audience more of it. The entertainment closed with a very lively farce, entitled "Cabman No. 93." Mr. Furst was the retired stock broker of the play, Mr. Maher was "No. 93," Miss Wilson was the stock broker's wife, and Miss Welch was the serving maid. Each character was well taken, the play was very funny, and the audience was highly entertained. Miss Rinn was the pianist, and played very delightfully between the acts. The *Transcript* was honored on the day following the entertainment with a pleasant call from three of the ladies and two of the gentlemen.

A New Principal for Washington College Elected.

The board of governors and visitors of Washington College on last Tuesday evening took up for final consideration the appointment of a principal to succeed Prof. Wm. J. Rivers, late principal of the college. James A. Pearce, Esq., the secretary to the board, has received applications from a large number of prominent educators. Prof. T. N. Williams, of Wilmington, Del., was elected by a majority vote from among the number. The newly elected principal is 46 years of age, was born in Dorchester county, Maryland, and is a graduate of Dickinson College. He was for a number of years principal of the Cambridge high school. He removed to Delaware, and was for four years State Superintendent of Public Instruction for that State. He is endorsed by Hon. Thomas F. Bayard, Senator Saulsbury of Delaware, Hon. Chas. B. Lore, of Wilmington, and Judge Goldsborough, of Cambridge.

Prof. A. E. Twiford has also been released from his engagement, he having been offered a more lucrative position at Sing-Sing, New York.

The board of trustees have made other changes in connection with the college. The weekly board for students is reduced from $4 to $3, and the tuition per annum from $40, $50 and $60 to $25, $30 and $40. These reductions will make the annual cost for boarding students very moderate, or the annual cost of board and tuition considerably less than $200.

This Fall's Fair.

The Kent County Agricultural Association is making preparations for an exhibit this year that will surpass any that has hitherto been held. The fair will be held four days—Tuesday, Wednesday, Thursday and Friday, the 20th, 21st, 22d and 23d days of September. Each day there will be interesting features. It will be noted by reference to advertisement elsewhere that the racing purses are considerably larger than they have ever been before, and each day the racing will be interesting. In the large new building which will be ready by Fair time, there will be room for a very much larger display of special exhibits than has ever before been made. The managers will exert themselves to make an attractive display in all departments. Any information as to exhibits, exhibit space, or any other matter in reference to the Fair, will be answered upon communication with Mr. W. B. Stephens, the secretary, Hanesville, Md.

Horses Killed by Heat and Lightning.

James Taylor, of Kennedyville, while driving a fine young horse from Middletown on Friday afternoon, noticed him stagger in front of the farm of Samuel A. Merritt. He had just time to take the horse from the carriage when he fell, and in a short time was dead. Mr. Taylor had refused $175 for the animal a few days before.

Robt. A. Bowers, of Still Pond, was the owner of a fine young Clydesdale stallion, for which he had been offered $250. The horse fell dead while plowing on Saturday.

Perry Rasin, living near the same place, had a valuable young horse killed while plowing last week.

Samuel Mann, Lynch's, lost a young mare on Saturday, overheated while plowing.

Thomas Fortner, Locust Grove, had a horse prostrated by the heat, which was relieved with difficulty.

Samuel Roseberry, Still Pond, is reported to have lost a horse while threshing.

Samuel J. Hill, Locust Grove, had three mules and a horse killed by lightning on his farm near Blackbird.

Oliver M. Miller, Melitota, lost on Monday of this week his driving horse; killed while plowing fallow.

Wm. French on Saturday lost his fine grey stallion, killed at the plow.

The air last week was very close, and working animals suffered severely. Many good horses that did not die, were no doubt permanently injured. Young and spirited animals suffered most.

Forty-Seven Bushels to the Acre.

The capabilities of the land in this county have for a long time been under estimated, and its capacity has only occasionally been tested by experiment. Some years ago if a farmer in this county had said he intended and expected to harvest forty bushels of wheat on an acre of ground he would have been laughed at by a less thrifty tiller of the soil and adjudged a regular "gas-pipe," and yet, Mr. James U. Dennis, a few weeks ago, threshed out on his Egypt farm, adjoining Princess Anne, the product of twenty-one acres of land sown to wheat, and realized on an average a little over 47 bushels to the acre, including the rakings. This information has been obtained from the most reliable source and may be relied upon as a fact. The average is certainly a good one and the result should set other farmers to thinking and induce them to make greater efforts to get the most out of their lands. Of course there are soils adapted to the growth of wheat, and there are other soils upon which this crop cannot be grown profitably.

The farmer of good judgment can easily tell good wheat land from that which is not, and should govern himself accordingly. The twenty-one tract referred to above was, it may be safe to say, well adapted to the growth of wheat; it was well prepared and sown at the rate of two bushels per acre—one bushel drilled each way across the field—and four hundred pounds of good fertilizer applied to the acre, two hundred pounds sown each way. It seems to us that even at the low figure at which wheat has ranged for several years past, it can be grown at a profit if anything like the above average can be reached.—*Somerset Herald.*

Still Pond Items.

STILL POND, Saturday, July, 30, '87.

The Still Pond Agricultural Club was called to order by the president, Norris Barnard, at 4 P. M.

In the absence of the secretary, the president appointed W. D. Pennington secretary pro tem. Reading the minutes and roll-call was dispersed with.

N. Barnard read a letter from Prof. Edwin F. Smith, of the Agricultural Department at Washington to a private citizen, to the effect that he intended to visit the orchards contiguous to Still Pond, with the view of making a thorough investigation of the disease known as "yellows," and requesting aid and information from the different growers.

On motion, an earnest and cordial invitation was extended to the professor to deliver a lecture on "peach yellows, pear blight," &c., before the club on Saturday, the 6th of August, when it was hoped every fruit-grower in the county would be present to profit by it.

Under Questions, W. D. Pennington asked: "Is there an orchard in the county, over three years old, that is not affected by the yellows? If there is he has not seen any. He had understood they are not contagious by grafting; that if an effected limb be cut off and put in a perfectly healthy one, it would not convey the disease to it; but he is inclined to think different; it will communicate itself to the healthy part.

E. B. Pennington: Thought the disease contagious, and could be communicated to healthy parts of the same, and to trees on every side by contact. Had known perfectly healthy trees to get the disease by effected limbs coming into contact with the limbs of the tree nearest it, and the disease always appeared in those limbs next the diseased tree. There is, so far as he knows, no cure; the only remedy being to cut the tree down, If the limbs were cut off close to the body of the tree they would bring forth vigorous limbs, but the fruit would be premature. So it is best to cut them down entirely and burn the bush, if not the disease would spread.

J. F. Wilson: Thought the disease contagious; it might be communicated by actual contact, but is also communicated by the winds, at blossoming time, carrying the pollen to healthy trees. Honey bees will also, he thinks, carry the disease from tree to tree in the process of extracting honey from the blossoms. He had noticed that the disease attacked the trees in some one particular line of direction; it would seem to follow the prevailing direction of the winds at the blooming season. He would not allow a yellows tree to bloom, as the winds would certainly spread it to others, and if the pollen be diseased, the fruit fructified by such will also be diseased. Any tree effected by yellows should be destroyed in toto. The pear blight had been known to be arrested by sowing the orchard down in grass, but whether it would effect the yellows in the peach he could not say. He has a small orchard of the Louise and Troth variety now, ten years old, down in grass; has never seen any yellow therein.

N. Barnard: Had noticed four trees on the farm of Mr. Crew which had the yellows badly. That gentleman had cut them back close to the body in the spring, and they had put forth a healthy and vigorous growth without the slightest sign of yellows; he should watch those trees with interest, to see whether the fruit may be diseased or not. With regard to pear blight, in New York they lime and salt, and slit the tree by running a penknife up and down the bodies, and splitting the bark; there is generally a superabundance of sap, and when that is let out, and salt and lime used, there is but little or no blight. There is nothing which the farmer plants but is preyed upon by some noxious insect or disease, but we must hold on to our peaches, and we must fight; they will always continue to depredate, but remedies will be discovered. Let us not be discouraged. In New York the growers are fighting all the time. If one tree dies let us plant another in its place and never give up.

W. D. Pennington asked if any one present had made any move towards doing away with fencing. Road cattle can get to any part of his farm, except where he has his own stock, and though there are some upon his road, yet they have not so far done him 50 cts. worth of damage. The owners seem to have an eye upon them and will not let them come too near his premises. He does not intend to repair his road fences, but leave them entirely open. He will hereafter fence only against his own stock. Where he has no fencing he works clear up to the line, turning his horses around on the road, thus saving quite a number of bushels of corn. If he had fence he could not, especially if the corn were anyways large, cultivate to within several feet of the line, and in turning round, would break down and destroy much of it, which he saves by doing away with fencing. He proposes to avoid the expense of building and repairing fences, and hopes to see his neighbors do the same.

G. W. Price: Keeps all the gates on his farm open, and not a hoof has trespassed thus far; the difficulty, however, in abandoning the fence system entirely, would be in regard to our own stock. Cattle, horses, sheep and hogs cannot all be kept in the same pasture. Those having young must be separated from the rest or the young and helpless will suffer from the stronger. But he is inclined to do away with all fencing, where it can be done. He had pulled down four division fences on his farm within the last ten years, and finds he gets along just as well as when he had them. His gates are always open, but his stock never goes on the road.

Henry Kreusen: Experimented by leaving his road gate open one day, when he found after a time a cow trying to trim his young pear orchard for him. He thought it cheaper to pasture the cow, and did so.

J. F. Wilson: Leaves his road gates open; one single cow trespassed upon him, which he turned in the field with his own cattle. The owner took it out early the next morning and he has had no further trouble.

E. B. Pennington: Thought it would be a good idea to have adjustable, portable fences, which could be easily moved and placed where needed.

N. Barnard: Is ready to tear down all fences except that necessary for permanent pasture. The system is liked wherever it has been tried, in New Jersey, around Norfolk and Petersburgh, Va. There is no necessity for this tremendous expense to build and keep fences in repair. The law does not compel us to do it. By keeping them up we stand in our own light. It is our own faults. Let us abandon the fence system now, at once and forever. It will not discommode in the least, but save a heavy tax and expense, which can be put upon the soil or in the building. Ask those who have tried it if they would be willing to return to the old system, and I venture the assertion that not an individual would respond aye.

W. D. Pennington asked concerning the law for division fences.

J. S. Harris and others stated that the law required each party to keep up his part of a division fence. In case one party failed to do so, the other could by due notice of intention and his failure to comply after being notified, put up the neighbor's part of the fence, and recover at law for the cost of construction.

G. W. Price moved a committee be appointed to perfect arrangements for forming an "Insect Bureau," to secure the proper furniture, cabinet, jars, &c., and agricultural and entomological reports from the department of agriculture at Washington, which, upon being carried, the chair appointed G. W. Price, H. C. Wallis, J. S. Harris, Henry Kreusen, a committee for one year.

The hour having arrived, the club adjourned to meet on Saturday.

Louise, youngest daughter of Isaac R. Starkey, died this morning, after a protracted illness. TULLYVEOLAN.

Kennedyville Items.

KENNEDYVILLE, Aug. 2d, 1887.

Editors Transcript:—Our village is still in existence and flourishes as the green bay tree, though Cruso, your former correspondent, seems to have forgotten us. Saturday night last the streets were lined with vehicles and the sidewalks thronged with people. All the merchants seemed busy.

Nearly all the wheat is threshed and sold, the price ranging from 76 to 82 cts. Some have stacked and will hold until October.

Corn is remarkably good and, while the hot nights of the last few weeks may not have been conducive to sleep, they made many an ear of corn.

We are sorry to say that some of our good people are quite sick. Hon. Wm. T. Hepbron is suffering severely from nervous prostration, augmented by the heat. On Sunday he was too unwell to be seen by those who called on him. Mr. John Barwick has been quite ill, but we are glad to say is rapidly recovering. Rev. Albert Walker, the rector at Shrewsbury, was too unwell to hold service on Sunday. The services were read by Dr. Boone, of Shanghai, China, brother-in-law of the rector. Rev C. R. Blades has been confined to his bed and was unable to preach on sunday. He has just returned from a visit to the lower counties, where he probably contracted the malaria from which he is suffering. Mrs. John R. Bennett, who for some time has been dangerously ill, is slowly recovering.

The young child of F. A. Roeder died on Monday morning.

Kennedyville has several visitors from a distance. Mrs. Austin, of Easton, is visiting Mrs. Warren; Miss Mamie Dewees has as guests Miss Mary H. Dewees and Miss Anna Bisbing, of Norristown, Pa.; Miss Mamie Toulson, of Wilmington, is visiting Miss Gertie Rasin; Misses Carrie and Nettie Harper, of Baltimore, are visiting Miss Carrie Jacobs. An old friend and former resident of Kennedyville, G. O. Dewees, of Brentford, Del., paid his old home a visit on Sunday, and was gladly welcomed by his friends.

The grange still meets, though the hot weather deters many members from coming out. The grangers will soon begin to look around for their phosphate. They buy in a body for the cash, and their order this year will come close to 200 tons if it does not exceed it. A considerable amount of money is saved to the farmer in this way and a good lesson taught them as to the advantages of the cash system.

There will be but few peaches shipped from this station this year. John R. Bennett has a fair crop on his young orchard. On some other orchards there is a sprinkling, but not anything like a crop.

The rainy weather has badly injured most of the oats.

D. U. Dewees, our builder, is hard at work on the buildings of E. B. Pennington.

Plowing fallow is the order of the day with the farmers.

We are all waiting perspiringly for the cold wave. REMUS.

Notes from Sassafras.

SASSAFRAS, Aug. 1st, '87.

Miss Della Stradley, of Townsend, Del., is visiting Miss Rachel Clayton.

Miss Mary Stewart, of Smyrna, is visiting Miss Bessie Clift.

Miss Della Clayton, of Middletown, is visiting Miss Carrie Johns.

Misses Jennie McWhorter and Christa Foulke are guests of Miss Bertie Morris. Former from Millington and latter from Wilmington.

Rev. Mr. Adams, of Middletown, Del., will preach at the M. E. Church both morning and evening on Sunday next; sacrament following morning services.

The Methodist Protestant Sunday school will join the "grand union Sunday school excursion" for Tolchester to-morrow. A pleasant trip is hoped for.

Mr. B. F. H. Caulk lost a valuable mare on Thursday last with the heat, after a long drive. Mr. Caulk is unlucky with his drivers. INNOMINATA.

New Advertisements.

The following new advertisements appear in this issue:

Sale of personal property, by William Janvier.

Advervisement of Kent County Agricultural Fair.

Adv. of notice to those desiring privileges at Kent Fair.

John Bell's Rose Hill nursery.

Fall fertilizer adv. of T. R. Hubbard & Son.

T. W. Eliason, Jr., adv. of fertilizer brands.

Ratification notice in case of John C. Sutton vs. James A. Sutton and others.

Examiner's notice of postponed meeting.

MABLEY & CAREWS'

CHIT-CHAT.

Yes, we will help you to keep cool during these hot and languid days of summer. Why are we in business if it is not to provide for the comfort and dress of our patrons? You will find a marvelous stock of seasonable goods at our store. Lightweights in neatest, most attractive and stylish paterns, all sizes. Can fit the largest man up to 50 inches breast measure. Summer goods for Men, Youths, Boys and Children. Materials that are new and attractive. Better qualities and better made garments at prices 25 to 30 per cent. less than are named by any other concern in Baltimoe. In the line of Summer Goods we keep in stock an abundant assortment of genuine and imitation *Seersuckers*, Drap D'Ete, Suitings in Linen, Alpacas, Mohairs, Crinkled Coats, Pongee Silk Coats and Vests, Serge Suits, Linen Duck Suitings, Light Worsteds, White Vests, Office Coats, Dusters. &c. We couldn't begin to tell you how liberally we have provided for your wants during the summer season. We'll only say you'll not be disappointed for we are bound to have just what you want.

MABLEY & CAREW.

In our Furnishing Goods Department we are selling the braided edge *genuine* Mexican Hammocks at 98c. each. We have them in plain white and fancy colored cords. These goods are selling elsewhere at $1.50. We sell first-rate, strongly made Hemp Cord Hammocks for 77c. You cannot buy them in other stores for less than $1.25. Now, while we're talking about things in our Furnishing Goods Department, we'll just say that this one department of our business is *really a store within a store*, so complete and perfect is its assortment and variety of goods. We sell more Men's Furnishings of every description than any three exclusive stores in Baltimore combined. We are Importers, Manufacturers and Buyers, and sell at prices (in many instances) less than small dealers have to pay for their goods. The great success of our Furnishing Department is fully established in the fact that our business in this branch alone has increased three fold since last January. Stock includes goods from ordinary up to the very finest qualities. Shirts, Collars, Cuffs, Hosiery, Underwear, Neckwear, Gloves, Umbrellas, in fact everything that you would expect to find in a first-class establishment, and more too.

MABLEY & CAREW.

NOTE—If you wish to buy *Furnishing Goods* at prices fully 25 per cent. less than are charged elsewhere in Baltimore, send for our *Furnishing Goods Price List.*

We must say a few words to you about our Children's Department. We have made almost a life-long study of every feature connected with the production of juvenile wearing apparel. The great care we take in the manufacture of children's clothing, the judgment we exercise in selecting materials, the immensity of our display and the wonderful variety of goods we keep in stock, all combine to rank us *First* in this department as we are leaders in every other branch of our business. We will not bore you with a long enumeration of goods and prices, but we will and *do* extend a cordial invitation to every parent to visit this model department whenever you come to the city. Our Boys' and Children's Hat Department is also another interesting feature of our business. We have introduced every new style this season in Children's Straw Hats and sell at prices fully a third less than you'll have to pay at Hat Stores.

MABLEY & CAREW.

Complete Base-Ball Outfit, consisting of Bat, Ball, Belt and Cap, presented with every suit sold in our Children's Department.

Make our store your headquarters when you visit the city. Packages checked free at our first-floor bundle counter. Strangers, visitors and everybody always welcome to examine goods whether purchasing or not.

Send us your name and address and we will mail free, our interesting fashion book, "Correct Dress," also rules for self-measurement and set of handsomely colored frosted cards.

FREDERICK FOUNTAIN,

—AGENT FOR—

R. J. BAKER & CO.,

BALTIMORE, MARYLAND,

MANUFACTURERS OF

HIGH GRADE FERTILIZERS

—AND—

Pure Chemicals for All Formulas.

ANALYSES:

Pure Ground Raw Bone	*Pure Dissolved Raw Bone*
5 to 6 per cent. Ammonia,	*3 to 3½ per cent. Ammonia,*
50 to 52 per cent. Bone Phos.	*32 to 36 per ct. Bone Phos*

It is no longer a question for the farmer to determine whether Fertilizers pay him or not it but remains for him to determine the kind and quality which pay him best. We make a specialty of furnishing in quantities to suit the purchasers every article used for the purpose of fertilizing the soil. We sell it separate or will manipulate and mix it to order according to any formula which may be required. Our brands of Ammoniated Bone Super Phosphates we guarantee to be made of the best and purest materials, and which have stood successfully the test and competition of 40 years, we respectfully commend to farmers who are not governed in their purchases by the low prices regardless of the more important considerations of quality. We have also a carefully prepared Fertilizer for Peach Trees, Corn and Oat Fertilizer, Bird Guano and Potash. Pure Dissolved South Carolina Bone Phos., Muriate of Potash, Kainit, Sulphate of Ammonia, Nitrate of Soda, Agricultural Salts, Ground Plaster, and all Chemicals used for ertilizing purposes.

SPECIAL FORMULAS COMPOUNDED.
