FOR CONGRESS:

HON. HENRY PAGE,

OF SOMERSET COUNTY.

MR. WILLIAM B. USILTON says: "We are not now and never have been an aspirant for Insurance Commissioner. We are seeking *no* office."

EVEN Republican Ohio is now claimed for a twenty thousand Democratic plurality. Is the millennium so near? If so, let Pennsylvania fall in line for the great love feast.

ACCORDING to the figures of the Hungarian Minister of Agriculture, in estimating the world's wheat crop, Europe will require over 170,000,000 bushels of wheat this year from North America, India and Australia.

REV. J. H. HECTOR, a colored lecturer of national reputation, says:

"The Force bill is not the thing to benefit the black men. The future welfare of my race can be advanced only by education, sobriety and religion. I also believe that the rewards of citizenship should depend on the intelligence of the voter. If you in the North had so large a class of uneducated people as they have at the South, you would take precisely the same attitude that the educated classes of the South do, and you would not consent to any Force bill or similar measure."

AS THE summer is drawing to a close, the time approaches in which the Board of Public Works will elect a commander of the oyster navy to succeed General Joseph B. Seth, who now holds the place. There are several candidates openly announced, among whom are Capt. T. C. B. Howard, now in the service; Col. Wm. Henry Legg, of Queen Anne's county; Capt. J. Fletcher Wilson, member of the House of Delegates from Kent county; Capt. C. R. Leonard, member of the House of Delegates from Talbot county; Capt. Hedge Thompson, of Talbot county, who was formerly in the oyster navy; Capt. Wm. H. Thompson, of Baltimore, and the present incumbent, Gen'l Seth.—*Centreville Observer.*

OUR worthy Chestertown contemporary last week made the startling announcement, that Thomas Gray, the English poet, in 1750, wrote his beautiful poem, "Elegy Written in a Country Churchyard," *for that* journal. Now, we have no recorded evidence that the poet was either a prophet or the son of a prophet, that he should have foreseen or anticipated 142 years in advance, the existence of the celebrated Chestertown journal or its editors-in-chief. Since we have, however, numerous striking evidences of the imaginary qualifications of the gentlemen for whom this beautiful poetic gem was *especially* written, and whose copy-right and sole-title to the manuscript have been glaringly outraged for 142 years, it is only fair to infer, that this is only an intentional display of those powers of imagination. Of course, it was not intended to mislead or deceive, for there is scarcely a public school pupil in Kent county who does not know that the poem was written by Thomas Gray in 1750. At any rate, gentlemen, the public can but appreciate your good taste, though it may have been a condescension in allowing Mr. Gray to contribute to the Kent county journal.

WE HAVE no further comment to make upon the drunken brawls and free fights, which at times disgrace our streets, other than to say that it is a most uncomplimentary reflection upon the community at large. The whole trouble is traceable to several rum-holes, which in open violation of law and decency, hold high carnival within the very shadow of our courts of justice, and while our officers stand helplessly by. In officer Kelley, Chestertown has a fearless, conscientious and watchful conservitor of the peace; our courts stand ready to apply the remedy to the cancerous sores which are preying upon the very vitals of law and order in the community, yet they are impotent and helpless, to a great extent, to even mitigate the trouble, and why? Simply because of a sickly, vitiated and demoralized public sentiment which fails to strengthen the hands of the law and its officials, but stands by and rather encourages, than frowns upon the flagrant violations of our laws. Neither our courts nor our officers are responsible for the flagrant disregard of certain laws which are hourly violated in our midst. Let but the people at large say that the law *shall be observed*, and in less than forty-eight hours, every illicit den in the county would prepare for an unceremonious leave-taking. A wise, manly and aggressive public sentiment is the only key to the perplexing problem. It matters not that a law is bad, if it bear the stamp and dignity of law, it will bind equally every law-abiding citizen, and will be ignored by those who respect neither persons nor things in their damnable practices only to the extent that the most salutary provisions would be made abortive and useless. If the law prohibiting the sale of liquor in Kent county is vicious of itself, the people who voted for it are called upon to repeal it, but unless it *is* repealed and so long as it remains a law, by every sense of honor, of patriotism and of manhood let us uphold and sustain it. Uphold and sustain it not from any feeling of sentimentality, but from a feeling based upon that broader and more substantial sense of honor, which calls upon every American citizen to sustain and vindicate the magesty of the laws which govern him and protects the right of every citizen alike.

COL. W. J. VANNORT LAYS SIEGE TO THE RECORD OF COLLECTOR BURCHINAL.

Col. Wm. J. Vannort, of Kent county, was in town yesterday, and in conversation with a representative of the *News*, said: "My attention has been directed to an article in your paper of last Monday in laudation of the great abilities of Surveyor Burchinal, and, after summerizing that gentleman's unbroken series of triumphs, the conclusion is reached, that in Kent county he has eliminated me as an adversary from politics. I thank you for the word "eliminate." And since you opened your columns to Surveyor Burchinal to proclaim his triumphs, possibly you will not close them to one attacked, by his name having been unnecessarily dragged into public print.

"It is true that Surveyor Burchinal has tried to eliminate me for my years of faithfulness to him as a friend. Whether he has done so the future must proclaim. He is a great eliminator and I am not his first would-be-victim. When Deputy Collector under Colonel Wilkins, the then Collector of the port of Baltimore, he eliminated him. It is accredited that he was in process of eliminating Soran S. Baker when the rough hand of death prevented the eliminating touch. He now holds a commission under President Harrison, procured for him by the Hon. Louis E. McComas. He has by open hostility and abuse sought to eliminate McComas. He has also, while holding office under President Harrison, sought to eliminate him by opposing his renomination, declaring his preference for a dark horse after the nomination. He went into the camp of James A. Gary, whom in times past he had eliminated, and whom rumor says he now stands ready to eliminate again; but Gary saved him the trouble by dumping him. In the late contest for delegates to Minneapolis he was beaten in his Congressional district and played the policy dodging game by supporting Higgins, who voted against President Harrison's renomination. The support of Kent county was tendered any candidate other than Russum. Afterwards Burchinal hedged with the latter. All this was eliminating, and your lucidness will never obscure the real merit of his eliminating powers.

"His strength is in the primaries. Your test seems to be that ordeal. You deem a man strong or weak, powerful and influential according to the number of persons he can dragoon to the primaries, not the associates he has among the cultured and the worthy who never attend them—the polite and the refined.

"Well, take your test. At the recent primaries in Chestertown, a place of 3,000 inhabitants, Burchinal, an office-holder, was compelled to throw himself into the breach, and after drumming the town all morning, he succeeded in making a ticket composed of Burchinal, Westcott, Lucas and two colored men. Burchinal appointed Lucas judge and himself clerk of the election.

"The Surveyor declared himself and the balance of the ticket elected as delegates to the County Convention, which sent him a delegate to the Congressional Convention. All the best element of the white and old colored Republicans held aloof from the farce.

"You see the result of elimination by the great eliminator. He has eliminated the white Republicans of Kent county from his standard, and you will find in due time that he will be among the eliminated, your galvanic action to the contrary notwithstanding."—*Baltimore Sunday News.*

POLITICAL.

Hon. Barnes Compton has for the fifth time received the Congressional nomination to represent the Fifth District in the Lower House of Congress.

Edwin H. Brown, Esq., will take the stump during the approaching campaign.

Hon. James E. Ellegood has received an invitation from Mr. B. B. Small, chairman of the committee on speakers of the National Democratic Committee, to take the stump in any States which he may select.

The Baltimore *News* says, in referring to Senator Toadvin for Insurance Commissioner: "It is claimed by some of the people from the lower section of the Eastern Shore, that the appointment should be given to Wicomico county. 'Kent has the Comptroller, and it would be unfair to give it another big office. Talbot has the Senator and Commander of the Oyster Navy, Dorchester has the Secretary of State, Somerset has the Congressman, Caroline has the Librarian, while there are innumerable small offices scattered throughout all the counties across the bay except in Wicomico, which has fewer men in office than any other, except, perhaps, Queen Anne's county. We think we should be given the Insurance Commissioner, and we intend to ask the Board of Public Works to give it to Senator Toadvin,' is what a Wicomico man had to say about the matter a day or two ago."

"If the position is to be awarded upon merits, Queen Anne's should have it by unanimous consent of all the counties, as she gives the largest Democratic majorities and holds fewer positions under the State government. Why not give it to her?"—EDS. *Centreville Record.*

Senator Faulkner says that West Virginia is as safe for the Democracy as is Texas.

Congressman Bynum has challenged Governor Wm. McKinley to a joint debate, to take place at the great tin-plate rally at Elwood, Ind., on the 13th inst.

Cholera's Scourge.

All Europe is threatened with a most appalling scourge of Asiatic cholera. Russia has 100,000 dead, and thousands are daily dying in the stricken districts. In spite of every precaution, the disease has spread, until France and England have been brought within the circle of the infection, and the ghostly spectre is knocking at our own doors. Every seaport in the United States is being vigilantly guarded, and it is hoped that America may escape.

It is appalling in this connection to note the extent of the cholera plague in Russia. Official bulletins account for 75,000 deaths. But the actual death list in the Empire traceable to this disease is probably over rather than under 87,500, for less than one-third of the centres of Russia's rural population are connected by the telegraphic system, and big places like Kischeneff are known to have been ravaged for weeks with the pest, yet are never mentioned in official returns.

In 1832 this country was visited, and a number of cases of the real Asiatic type made its appearance in Queen Anne's county. During the camp at Wye, in August of that year, the greatest consternation was caused by the death on the camp ground of a colored man belonging to Major Massey, of Queenstown. The negro weighed over two hundred pounds, but in less than six hours the man was dead and was a mere skeleton, weighing scarcely a hundred pounds. Let the sanitary condition of our town be kept in perfect order, and the danger from disease in our midst will be materially lessened.

STATE AND PENINSULA.

Mr. J. Spencer Wright died in Queen Anne's county, aged fifty-eight years.

A colored man fell dead of heart disease while engaged in worship at Wye Camp, Queen Anne's county.

A special peach train has been put out on the Western Maryland Railroad for the benefit of Washington shippers and growers.

The coroner is investigating the supposed coffee-poisoning case in Queen Anne's county. Three negroes died at Centreville from poison administered in coffee.

The annual inspection and review of the Maryland State fishery force took place at Bay Ridge yesterday and regatta of sailing vessels of the fleet on Thursday, to-day.

One night last week some one burst open the corner-store of the African M. E. Church, near Queen Anne's this county, in search of money. The miscreants finding no wealth, demolished the furniture and riddled the parsonage near by with bullets.—*Centreville Observer.*

A thirteen-year-old boy was bitten in Westminster, last week, by a dog which subsequently gave symptoms of hydraphobia. After becoming rabid another child was bitten. The animal then ran to Henry Zimmerman's house in the same neighborhood, where it bit several dogs, cats and pigs and attacked the chickens.

The citizens of Easton have an opportunity to locate a factory in the town. Messrs. M. Strauss & Co., of Baltimore, are desirous of establishing a factory in Easton, and it is only necessary to secure the desired labor to induce the firm to open a factory here that will give employment to 100 women and girls. Let the Board of Trade take hold of this matter, and assure Messrs. Strauss & Co. that the labor will be furnished.—*Easton Star.* This is a pointer for Chestertown.

Foreign and Domestic News.

The great switchmen's strike at Buffalo, has collapsed.

103 miners last week perished in an English mine, as the result of an explosion.

It is calculated that $5,000,000 has been sent from Mexico to the United States to pay for grain imported.

'Squire Beasley, the "marrying magistrate," of Aberdeen, Ohio, is dead, after having tied 10,000 hearts.

Two women were shot to death while placing a wreath of flowers on the grave of a friend in a London cemetery.

Two cases cholera have been discovered at Glasgow, Scotland, among German immigrants on the way from Hamburg to America.

Near Cator, N. Y., on Monday, a boy, while cutting bundles for a threshing machine, accidentally cut the feeder's hand, which so infuriated him, that he immediately caught up the lad and threw him into the rapidly revolving cylinder, where he was ground to atoms. The brother of the unfortunate boy witnessed the bloody deed, and with a blow from the fork felled the murderer to the ground and perforated his body with a pitch fork.

Beware of Ointments for Catarrh that Contain Mercury,

as mercury will surely destroy the sense of smell and completely derange the whole system when entering it through the mucous surfaces, such articles should never be used except on prescriptions from reputable physicians, as the damage they will do is ten fold to the good you can possibly derive from them. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, O., contains no mercury, and is taken internally, acting directly upon the blood and mucous surfaces of the system. In buying Hall's Catarrh Cure be sure you get the genuine. It is taken internally, and made in Toledo, Ohio, by F. J. Cheney & Co. Testimonials free. ☞ Sold by druggists, price 75c. per bottle.

Niagara Falls in Early Autumn.

The third excursion to Niagara Falls via Royal Blue Line, over a new route, has been arranged for Thursday, September 8th. A special train with parlor car will leave Camden station, Baltimore, at 8.45 A. M., passing through the scenic Wyoming and Lehigh valleys, the Pennsylvania coal fields, and arriving at Niagara Falls at midnight. No more favorable date for the excursion could be selected, as early autumn is the most pleasant season in the northern lake region, and traveling is then most comfortable. Tickets will be good to stop off at Buffalo, the weird glen Onoko, Mauch Chunk and Elmira, near Watkin's Glen, and as tickets have a ten day limit, ample time will be afforded for side trips to the famous resorts in southern Canada and northern New York State. Round trip from Baltimore $10.00.

* OFFICE OF *

Local Board of Health.

Attention is again called to the necessity of placing ourselves and our premises in as high state of sanitation as possible. To do this requires some little trouble, but the results warrant this, as well as some expense. The extreme hot weather, interspersed with occasional showers, threaten to make sickness, provided care is not exercised and proper precautions taken. In no way are we so liable to be made sick as by using impure drinking water. It is not enough to know that your well water looks clear and is cool, but see that there is no leakage or drainage into the well. Do not use a well that is allowed to receive storm water, drainage or slops, too frequently this is the case. All premises should be well and thoroughly cleaned, outhouses attended to, cellars and vaults cleaned and aired, and especial attention should be paid to that fruitful source of trouble, THE PIG PEN.

When there may be a patient sick with fever or bowel trouble the actions and passages of all kinds should be disinfected and then carried sufficiently far as to prevent all chance of draining into the water supply. All persons sick of typhoid, or other infectious or contagious diseases should be isolated. No intercourse should be had by any other than those whose duty it is to nurse them. Infants should be cautiously fed and properly clothed. When taken sick proper advice should at once be sought. For the assistance of the public it is thought well to give a short list of disinfectants:

For excrements—A solution of Chloride of lime 4 parts, water, 100 parts; a solution of Bi-chloride of Mercury 1 to 500, poison.

For masses of organic material, privy and vaults.—Powdered, Chloride of Lime; Plaster and Chloride of Lime.

For bedding, clothing, linen, etc.—Boiling 40 minutes: immersion in solution Bi-chloride of Mercury 1 part, water 1,500 parts for 4 hours.

For the sick room—Plenty of fresh air; burning Carbolic Acid, Turpentine and Benzoic Acid, so that the fumes may go through the house.

Especial care should be taken that the excretions of the sick should not be emptied in the same closet used by the well, even though disinfected. There are at this time, as is generally the case during August and September, occasional cases of Typhus fever. While this disease may not be contagious in the sense that small-pox is, it is so by contact with the discharges to some extent, and directly infectious when the water supply becomes affected, therefore especial attention is called to this trouble. The law requires all cases of Typhus fever occurring
