FARMERS URGED TO SAVE CLOVER SEED

Scarcity Of Local Seed Indicated

Indications are that farmers with good clean stands of red clover either of 1936 or 1937 seeding would do well to consider saving clover seed. We are informed that the crop will again be short which means that prices will be high. Even though a farmer saves only enough for his own use it would be a paying proposition and if he has a surplus, locally grown seed is in popular demand.

Apparently the 1937 seeding will suppy a fair crop of seed in many instances. While it is not a common practice to save seed from new stands of clover it seems advisable to do so this year. The fact that the plants have advanced to the stage that they are producing seed this year and the further fact that considerable seed will shatter out during the harvesting process—the chances for a good stand in '38 are equally good whether the crop be saved as seed or as hay or left standing.

FERTILIZER LOANS FOR WHEAT AVAILABLE

County Agent McVean, has just been notified that farmers who need money with which to buy fertilizer at cash prices but have no other source of credit may again secure some help from the Emergency Crop Loan office as in previous years.

The loans must be secured by a crop mortgage and in the event that a tenant seeks a loan he must secure the landlords waiver to the extent of the amount of the loan. These loans have been of value to a number of farmers in previous years and doubtless will serve a similar group this year. County Agents office will help farmers prepare their applications.

FARMALL FARMING Is Still 'Way Ahead of Any Other

McCORMICK-DEERING

THE FARMALL way of farming row crops is still the cheapest and best way. There isn't any other that can touch it. FARMALL owners have been able to cut production costs to the very bone—they are in a position to take advantage of any upturn in farm prices and profit by it.

Make the FARMALL investment yourself and enjoy all the advantages that FARMALL power brings to its users. There is a size for every farm now with the addition of the FARMALL 12 for small farms. Other sizes are the FARMALL 20 which handles 2 plows, and the FARMALL 30 for 3-plow work. Remember there is only one true FARMALL—the McCormick-Deering.

Come in and let us tell you about it. Or better yet, call us for a demonstration of the FARMALL that is best suited for your farm.
