Unfair Competition

By RAYMOND PITCAIRN
National Chairman
Sentinels of the Republic

Picture a store-keeper, a dairy-farmer, or a small manufacturer who through years of industry has established a moderately successful business. Out of its returns he supports his family, and pays wages, taxes, insurance and all the other costs that such enterprise entails.

Then into his community enters a competitor. This rival is more fortunately situated. He doesn't have to worry about making a living, or meeting tax bills, or showing a favorable balance at the end of the year. A rich uncle takes care of all that for him.

How long could the store-keeper, or dairy-farmer, or manufacturer continue to meet such competition?

That, in effect, is the question raised by an official report recently submitted at Washington by the Committee on Government Competition with Private Enterprise.

It reaches the conclusion that, except in such fields as national defense, research, conservation and the like, Federal competition is "wholly destructive."

What attention will official Washington give this significant report? That is difficult to say.

For years, citizens who have seen their own taxes used to underwrite competition against them have protested against those methods—without success.

For years, they have pointed out that government competes against private enterprise in more than 200 lines—including certain agricultural products, construction materials, harness, textiles, clothing, printing and a host of others.

For years they have pointed out what the Committee now emphasizes in its report. Namely:

"That government expenditures will be reduced and revenue increased if the Federal Government withdraws from competition with private enterprise except under the conditions specified.

"That under normal economic conditions government competition with private enterprise . . . contributes to the development of a socialized industry.

"That a revival of private industry will permit the return of labor to its normal occupations, will hasten the return to American standards of efficiency and maintain the dignity of labor which has made the American working man the nation's greatest single influence for the advancement of democratic ideals."

Protests of the nation's workers and taxpayers against Bureaucracy's unfair competition have gone unheeded. Will an official report fare any better in protecting them in their constitutional right to earn a living? Let's hope so

In the words of the report itself, "The government's true function is to protect and promote the economic activities of its citizens—not to supplant them."

Ax of Prehistoric Giant

There were giants on the earth in the old days. This conclusion seems to be justified by the finding of a stone ax wielded by prehistoric man. The ax weighs 14.5 pounds. It was found in Norfolk, England, in strata that underlies glacial deposits indicating that it was produced and used by a race that antedated the Ice age. The deposit belongs to the early Pleistocene epoch and the man who used it may have lived 1,000 millenniums ago. No skeletons of giant human beings have been found to give support to the theory that a race of giants at one time inhabited the earth but no other theory has been offered to account for the gigantic size of this flint ax.

Gold in California

The first discovery of gold in California was in 1842 near the San Fernando mission near Los Angeles. No real importance was attached to the discovery until February 9, 1848, when the daughter of James W. Marshall, the overseer of a mill owned by John A. Sutter, found a piece of nugget in a mill race on a branch of the Sacramento river near Coloma. This discovery started the gold rush to California. James W. Marshall died old, alone and almost penniless in a mountain saloon.

Symptoms of Hysteria

Hysteria, a morbid state of the nervous system, produces a variety of symptoms, including high fever, which closely resemble those of organic diseases and are difficult to diagnose, writes No. 10,375, State penitentiary, Deer Lodge, Montana, in Collier's Weekly. Some time ago a man, afflicted with recurring spells, was operated on—over a period of years—by five different surgeons who were convinced by his condition that he had appendicitis.

Flowers Feminine, Trees Masculine

All flowers and grasses are considered by the Japanese to be feminine, while trees are masculine. Buds represent the female, and perfect flowers are used to denote the male. It's a man's world, after all, for overblown and withered blossoms revert to the feminine gender. The front of a leaf is masculine, but a leaf turning its back is not; and a large leaf gallantly enfolding a smaller one is considered to convey the idea of a man.

The Wood Thrush

The Wood Thrush, like the other thrushes, feeds on the ground among the forest litter. Thus, with his cinnamon-brown back, wings and tail, he is not easily seen. On his white underparts are the telltale black spots and lines which mark the thrushes. His trim feet and legs are a delicate creamy gray in color. The upper part of his beak is black, the lower part yellow.

Fine Japanese Blades

Among the arts and crafts of Japan the work of the swordsmith stands high, and Japanese blades are unsurpassed even by those of Damascus or Persia.

A. T. & T. Company Reports Improved Telephone Service

Telephone service last year was maintained on a high standard with more than 83 per cent of all local calls being completed on the first attempt as compared with 80.9 per cent in 1929, President Walter S. Gifford of the American Telephone and Telegraph Company informed the stockholders

WALTER S. GIFFORD

in his recent report. The fact that the telephone was not answered immediately, the report shows, accounted for nearly all of the calls not completed. In the six years since 1929 operating errors on local telephone calls decreased 40 per cent. Dial telephone service improved through a 12 per cent decrease in irregular uses by persons dialing and a 40 per cent decrease in operating and equipment irregularities.

The average time required for long distance telephone connections was reduced from 2.8 minutes to 1.4 minutes and 92 per cent of these calls were handled while the person calling remained at the telephone as compared with 71 per cent in 1929. As a result of these and other betterments 750,000,000 telephone calls or about 3 per cent of the total calls made in 1935 were handled with much more satisfaction to telephone users than would have been the case in 1929, Mr. Gifford states. Commendations received from users are evidence that the improvements were appreciated. Criticisms of local and toll service last year were less than one-third those in 1929.

Ninety-five out of every 100 telephones installed in 1935 were by appointment as compared with 57 out of every 100 in 1929. Telephones were reported out of order on the average only once in about twenty-four months, as compared with twenty months six years ago. The percentage of troubles cleared on the day reported was increased from 87 to 96. The percentage of long distance telephone calls affected by unsatisfactory transmission was reduced nearly one-half.

It is not enough, Mr. Gifford said, that general averages on telephone service should be satisfactory. It is also very important to keep at a minimum the cases of individual telephone users or groups who for one reason or another may be temporarily receiving service that is below average and is not satisfactory. There has been steady improvement in the uniformity of good service, with 1935 setting the record.

Research and development work progressed satisfactorily on broad band systems of transmission which will provide an increased number of independent communication channels over existing types of open wire and cable circuits. Work on the terminal and intermediate equipment for these systems and for the radically new form of transmission cable, referred to in the 1934 annual report, was vigorously pushed last year.

In the field of materials there were important developments during the past year in the production of a new alloy, which results in loading coils of smaller size and lower cost; the development of a lead calcium battery alloy, which provides the advantages of less obnoxious gas and less waste of power in storage batteries; and the development of a new form of rubber insulating material having a very low moisture absorption and great stability for underground use.

Intercommunication by telephone on a nation-wide scale can be accomplished to the satisfaction of telephone users only through an integrated system national in scope. The Bell System is one organic whole—research, engineering, manufacture, supply and operation. It is a highly developed relationship in which all functions operate to make a universal nation-wide interconnected service. The thousands of telephone companies and rural telephone lines which are neither owned nor controlled by the Bell System are co-ordinated for this nation-wide service by connection with the system.

Mound of Earth Memorial to Beloved Polish Hero

The most interesting monument of Cracow, Poland, to Americans is the great mound of earth which the entire Polish nation built to the memory of Kosciuszko, who served as Washington's adjutant during the Revolutionary war, notes a writer in the Chicago Daily News.

Kosciuszko also fought for the independence of Poland and after his death the Polish people revived their ancient way of honoring heroes. From all over the country peasants came bringing earth in their long, flowing sleeves and aprons to deposit on the site here. The mound is 1,000 feet high and is crowned with a large granite block marked "To Kosciuszko."

Kosciuszko's tomb is in a vault of the Cathedral of Cracow, a national sanctuary for Polish kings and heroes. A silver coffin, that of Stanislaus, the patron-saint of Poland, stands in the middle of the church, and near one of the chapels is a crypt containing the ashes of the greatest Polish poet, Adam Mickiewicz.

The cathedral and the other churches of Cracow are particularly worth a visit by the tourist on religious festivals, especially Corpus Christi day. At this time girls dressed in white and blue carry gaily colored images of Mary from church to church, and the entire city turns out for the processions.

Nova Scotia Discovered 3 Times

Nova Scotia, the Atlantic province of Canada, claims three discoverers. John Cabot landed on Cape Breton island in 1497, decided he was the discoverer and claimed it for Henry VII of England. Jean Denys, a Frenchman, touched on it in 1506 and thought that he had discovered it. In 1524 Jean Verrazano, a Florentine under the commission of Francis I of France, came across it and claimed it for his patron. In fact, he claimed the entire American coastline from Nova Scotia to the Carolinas, and "all the regions beyond." Although there is no proof, there is everything of a convincing nature to make fairly definite that Leif Ericson, the adventurous Viking, discovered Nova Scotia away back in 1000.

Lancelet Used as Food

China uses the lancelet, a transparent sea animal, for a food.

FACTS AND FIGURES ON YOUR TELEPHONE BY

Edwin H. Hill

Improvements in the business of the Western Electric Company resulted in sales last year of $105,417,000, which was an increase of 15 per cent over 1934. Sales to Bell Telephone Companies were $97,554,000 and to others $7,863,000, President Edgar S. Bloom reported to the stockholders.

For the first time since 1931 the operations of the Western Electric Company and its subsidiary and associated companies resulted in a profit, earnings for the last year having been $2,620,279, which compares with a loss in 1934 of $7,751,548.

The return on investment (gross sales less current liabilities) was 1.9 per cent, which compared with previous earnings was 1.6 per cent less in 1934, 3.3 per cent in 1933 and 2.7 per cent in 1932. For the sixteen years previous to 1931 the return on investment averaged 7 per cent and for the twenty years previous to 1935 averaged 4.5 per cent.

At the close of the year the company's plants were operating at about 27 per cent capacity and the volume of business was sufficient to provide five days' work a week for the great majority of employees. The number of employees at the end of the year was 21,033 as compared with 17,148 in June, 1933, the low point in employment during the depression, at which time also the majority of employees were working four and one-half days or less per week.

Initials on Lincoln Pennies

The initials V. D. B. on some Lincoln head pennies minted in 1909 are those of Victor D. Brenner, the medalist and sculptor who designed the coin. But this part of the design was soon withdrawn by the Treasury department and consequently the artist's initials appear on only part of the Lincoln pennies bearing the date 1909. Many thousands of the initialed cents were circulated, however.

NOTICE TO DELINQUENTS IN THE PAYMENT OF CORPORATION TAXES, TOWN OF GARRETT PARK, MD.

By virtue of the power and authority vested in him by the Act of 1912 Chapter 790 (as amended) of the General Assembly of Maryland, if the taxes shown to be due in the following list, together with interest accrued and the proportional cost of advertising be not paid before Saturday, May 2 1936, the Clerk and Treasurer of the Town of Garrett Park, Md., will sell at Public Auction to the highest bidder FOR CASH, on

SATURDAY, MAY 2, 1936,

at 3:00 o'clock, P. M., in front of the Post Office in Garrett Park, Md., the hereinafter described pieces or parcels of land or property, situated in the Town of Garrett Park, Montgomery County, Md., and assessed to the persons named, or so much thereof as may be necessary to pay the total amount of taxes, penalties, interests and costs due and unpaid for the current year and such arrears, if any, as may be due from previous years on each piece or parcel or from each person or corporation assessed, as provided by section 260 of the amended charter. Such interest, penalties and costs to be computed to date of sale. All conveyancing, recording, etc., at the expense of the purchasers.

Assessed in the name of	Description of property	Taxes and penalties	Cost	Total
Chisholm, Julian J.	Lot 14, Section 55 Lot 15, Section 55	$52.78	$3.50	$56.28

J. PAUL SMITH, Clerk and Treasurer,
Town of Garrett Park, Maryland.

DONALD A. DELASHMUTT,
Solicitor
Rockville, Md.

Assignee's Sale

Of Valuable Improved Property at Gaithersburg, Montgomery County, Md.

BY VIRTUE of the power and authority contained in a certain mortgage from Albert F. Meem, unmarried, to Rosa M. McDonald and others, dated September 2, 1910, and duly recorded among the Land Records of Montgomery County, Maryland, in Liber No. 217, folio 142, the undersigned, assignee for the purpose of foreclosure, will on

Saturday, April 18, 1936, at the hour of 3 o'clock, P. M.

offer for sale at public auction on the mortgaged premises all the lands and property described in said mortgage, same being part of a tract of land called "Zoar", containing ½ acre of land, more or less.

The property has a frontage of 83.44 on Chestnut Street and a depth of about 100 feet from the corner of Chestnut and Meem Avenues, in the town of Gaithersburg, Montgomery County, Maryland, and apparently corresponds with Lot No. 16 in Meem's Addition to Gaithersburg, as shown upon a plat duly recorded among the Land Records of said County in Plat Book No. 2, Plat 136, and is the same land and premises whereon the late Albert F. Meem resided at the time of his death.

Improvements consist of a 2 story frame dwelling house containing about 8 rooms, with porches front and back. It adjoins the property of Mrs. John Briggs and on the rear the property of George A. Ninas.

Terms of sale: cash, of which a deposit of $200.00 will be required on the day of sale. Balance payable in cash upon ratification of sale by the Circuit Court for Montgomery County. Conveyancing and revenue stamps at the cost of the purchaser or purchasers.

DONALD A. DELASHMUTT,
Assignee for the purpose of foreclosure.

WILLIAM F. PRETTYMAN
Solicitor
Rockville, Md.

Mortgagee's Sale

Of Valuable Improved Property at Cabin John Park, Montgomery County, Md.

BY VIRTUE of the power and authority contained in a certain mortgage from David Victor Hall, unmarried, to The Citizens Building and Loan Association of Montgomery County, Inc. dated December 3, 1929, and duly recorded among the Land Records of Montgomery County, Maryland, in Liber No. 491, folio 60, the undersigned will, on

Saturday, April 18, 1936, at the hour of 4 o'clock, P. M.

offer for sale at public auction on the mortgaged premises all the lands and premises described in said mortgage, same being Lots Nos. 5 and 6, in a subdivision of land in said County known as and called "C. E. Benson's Addition to Cabin John Park, Montgomery County, Md." as said subdivision is laid down and described upon a plat duly recorded among the Land Records of said County in Plat Book No. 3, Plat 231.

Being the same land coveyed to David Victor Hall by Charles E. Benson and wife, by deed dated January 16, 1925, and duly recorded among the Land Records of said County in Liber No. 368, folio 48.

Improvements consist of a comfortable 1 story frame dwelling house, completely remodeled in the early part of 1930. The land fronts on Harris Street, in said subdivision, and is convenient to Washington and other points by the famous Conduit Road. An opportunity is given for the purchase of an attractive small dwelling property at small cost, near to the Potomac River and its numerous recreational facilities.

Terms of sale: cash, of which a deposit of $200.00 will be required on the day of sale. Balance upon ratification of said sale by the Circuit Court for Montgomery County. Conveyancing and revenue stamps at the cost of the purchaser or purchasers.

WILLIAM F. PRETTYMAN,
Attorney named in mortgage to make sale.

NOTICE

In Montgomery County all alcoholic beverage licenses expire at midnight, April 30, 1936. Renewals cannot be issued unless applications therefor are made. Such applications should be filed with the Secretary not later than April 10, 1936.

Protests against the issuance of renewal licenses will not be considered unless made and filed not later than March 31, 1936, nor unless signed by ten residents or owners of real estate of the voting precinct where the place of business is located as required by law.

By order of the Liquor Control Board for Montgomery County
Ira C. Whitacre, Secretary.

The Great North Road

The Great North road, between Auckland and Wellington in the North Island of New Zealand, was built as a military road by the British at the time of the Maori war, about 1840. An interesting part of the road passed the 1,000-foot eminence known as Taupiri hill, a sacred burial ground of the Waikato Maori kings. When the road was first built so strong was the taboo on this hill that travelers approaching the hill were required to leave the road and pass the hill by canoe on the Waikato river, resuming land travel after they were well past.

Earlyday Pickpockets in England

During the Eighteenth century the courts and levees held in the royal palaces of England welcomed almost anyone. Consequently pickpockets were numerous and active. However, writes Andrew W. Robertson, London, Eng., in Collier's Weekly, these "mixed" receptions were stopped in 1792 after one of these light-fingered lads, during a levee at St. James' palace, made the inexcusable mistake of picking all the pockets of the prince of Wales.

Leukemia Similar to Cancer

Leukemia is characterized by an excessive number of immature white cells in the blood. In leukemia, as in cancer, the cells that multiply with such disastrous effect are malignant cells with characteristics of their own that form a new and abnormal growth. The disease further resembles cancer in that it can arise from a variety of causes, the form it takes depending on various factors.

IMPORTANT NOTICE

The General Assembly of Maryland, Special Session of 1936, enacted Chapter 10 imposing taxes to raise funds for State Aid to the Needy. The items taxed are:

BEER—2-7/16c per gallon when sold or delivered by any manufacturer or wholesaler licensed by the undersigned to any retail dealers in this State.

MANUFACTURE OF DISTILLED SPIRITS—5c on each proof gallon of whiskey or other spirits distilled for beverage purposes in this State.

TAX ON ADMISSIONS—1% gross receipts from sale of admission tickets to shows, athletic events, etc., as further set forth in Act, payable by person operating business.

FRANCHISE TAX—Additional tax on domestic and foreign corporations.

TAX ON TOILET ARTICLES AND COSMETICS—10% on all such articles, as more fully set forth in law, payable by person selling at retail.

Law effective for period April 1, 1936 to March, 31, 1937.

Further information supplied upon request.

WM. S. GORDY, JR.,
State Comptroller,
Annapolis, Md.

Note:—Emergency Gross Receipts Tax Law expired March 31, 1936; however, receipts received subsequent to March 31st from sales made during the period from April 1st, 1935, to March 31, 1936, are subject to the tax, and those persons liable for such tax must file reports and remit tax under that law until their tax liability is satisfied.

PUBLIC SERVICE COMMISSION OF MARYLAND

ORDER NO. 28961

Before the Public Service Commission of Maryland. Case No. 3934.

In the Matter of the Application of Washington Suburban Sanitary Commission for Authority to Issue $350,000, Principal Amount, of its Series "JJ" Bonds.

The above mentioned petition having been received and filed, it is, this 24th day of March, 1936, by the Public Service Commission of Maryland,

ORDERED, That the same be, and it is hereby, set for hearing at the office of the Commission, Baltimore, Maryland, on Thursday, April 30th, 1936, at 11:00 o'clock, a. m.

PROVIDED, the applicant cause a copy of this order to be published in some newspaper published in Prince George's County, Maryland, and in some newspaper published in Montgomery County, Maryland, at least one time in each paper before the 30th day of March, 1936, and at least two additional times thereafter in each paper before the 29th day of April, 1936.

True Copy—Test:
FRANK HARPER,
Secretary.

"Mountain of Hellfire" Emits Ammoniacal Gases

Over a great area on the frontier between Baluchistan and Persia everything is dead. Not a bird, beast, or reptile, not even an insect, survives. They have been gassed by the "Mountain of Hellfire"—as the Persians call the volcano of Koh-i-Tafatan. The crater pours out dense clouds of ammoniacal gas which destroy every living thing and even burn up all plant life, says Tit-Bits Magazine.

This is the only mountain which produces this particular gas, but not the only one which exudes poison gas. In 1912 the volcano of Katmai in Alaska exploded, producing the biggest crater in the world, which is now known as the Valley of Ten Thousand Smokes. Here sulphurous gas streams out from rifts, and it is death to approach one of these deadly vents.

The Sakura Shima volcano in Japan blew up in 1914 and overwhelmed the city of Kagoshima. The loss of life was over 70,000, and a great number of these people were suffocated by pestilent gases which rushed up from earthquake fissures a long way from the mountain itself.

Before the great Chilean earthquake of 1857 poison gas rose in the floor of the Bay of Payta and killed enormous quantities of fish and crabs. They floated on the surface and were washed up on the beach, forming a wall-like line three to four feet high and twelve miles long.

The most ghastly disaster of recent times was the destruction of the beautiful city of St. Pierre by a cloud of gas and dust flung out by Mont Pelee. Within a matter of moments 40,000 people were blotted out.

Andersonville Prison Grounds

At first Andersonville Prison grounds contained 22 acres, and the area was later increased to 27 acres. As many as 33,000 prisoners were at times crowded into the enclosure.

EXECUTOR'S SALE

Of Improved Real Estate in Montgomery County, Maryland

By virtue of the power and authority contained in the Last Will and Testament of Ella F. West, late of Montgomery County, Maryland, deceased, the undersigned will, on

Saturday, May 2, 1936, at the hour of 2 o'clock, P. M.

offer for sale at public auction on the premises all that house and lot near Darnestown, Maryland, containing 2¾ acres of land, more or less; being the same property which was conveyed to the said Ella F. West by her husband, Amos West, by deed dated August 24, 1908, and duly recorded among the Land Records of said County in Liber No. 200, folio 86; being also the same premises where the said Ella F. West resided at the time of her death.

The property fronts for approximately 200 feet on the concrete public highway leading from Darnestown to Seneca by a depth of nearly 600 feet.

Improvements consist of a 6 room frame house with porch in front and enclosed porch in rear. Electricity is supplied by power line running past the property and there is a well of good water at the door and a fine garden spot. This sale offers opportunity for the purchase of a comfortable home in an attractive village within convenient driving distance over improved State highways to Washington and to Rockville and Poolesville and other county towns and also to the Potomac River, which is becoming more and more popular for recreational purposes.

Terms of sale: one-third cash, of which a deposit of $250.00 will be required when the property is knocked down. Balance of purchase money in two annual instalments payable in one and two years after date of sale respectively, with interest at 6%, or all cash at option of purchaser. Reasonable financing arrangements with a responsible purchaser may be made if desired.

Conveyancing and revenue stamps at the cost of the purchaser.

WILLIAM F. PRETTYMAN,
Executor of Last Will and Testament of Ella F. West, deceased.

ORDER NISI

In the Circuit Court for Montgomery County, sitting as a court of Equity. No. 7189 Equity.

Prince George's Bank and Trust Company, et al.,
vs.
American Security and Trust Company, et al.

ORDERED, this 6th day of April, 1936, by the Circuit Court for Montgomery County, sitting as a Court of Equity, that the sales made by Maude E. Lightbown and American Security and Trust Company, Executors and Trustees, under the will of Charles M. Lightbown, deceased, to Carlin B. Taliaferro and Ruth Taliaferro; Lottie W. Cannon and Beatrice B. Cannon; Charles F. MaGruder and Julia L. MaGruder; Hettie E. Reigelman; and Francis L. Gaver and Margaret Louise Gaver; and reported in the above entitled cause be ratified and confirmed, unless cause to the contrary thereof be shown on or before the 2nd day of May next; provided a copy of this order be inserted in some newspaper published in said Montgomery County once in each of three successive weeks before the 2nd day of May, 1936. The report states the amount of said sales to be $4,150.00, $3,850.00, $4,950.00, $3,900.00, $2,850.00, respectively.
