Farmers, List Your Repair Needs

It would be hard to find a farmer who at some time or another had not lost valuable time waiting for necessary repair parts. Take this territory and total up the time lost in this way and it will astonish you. And all because repairs are not odered as early as they should be.

There is no better time than right now—just before the busiest season on the farm—to go over your machines carefully, make a list of repairs you are likely to need and send it to us. With this list in our hands, we can order our stock so as to be prepared to meet every call promptly.

Repair part service is a necessary part of our business. We realize what it means to you in time and money to get what you need at once. Help us to help you by making up your list now and sending it in to us.

ENTRANCE EXAMINATIONS

Engineering Scholarships

Entrance examinations, under the auspices of the College Entrance Examination Board, will be held June 18-23, 1923, in the Civil Engineering Building, Homewood, beginning at 9 A. M. each day.

Applications for Scholarships in the School of Engineering, established under provisions of the Laws of Maryland, Chapter 90, 1912, will now be received. If there is more than one applicant for a particular scholarship, competitive examinations must be taken September 21, 1923, beginning at 9 a.m.

Each Legisaltive Distirct of Baltimore City and each County of the State, with the exception of Howard, will be entitled to one or more scholarships for the year 1923-1924, in addition to those already assigned.

Under the provisions of the Act of Assembly, the County and City Scholarships in the School of Engineering are awarded only to deserving students whose financial circumstances are such that they are unable to obtain an education in Engineering unless free tuition be granted them.

The Scholarships entitle the holders to free tuition, free use of text books, and exemption from all regular fees. One of the scholarships in each County and in each Legislative District of the City carries also the sum of $200.

Scholarships may be awarded to graudates of Loyola College, St. John's College, Washington College, Western Maryland College, University of Maryland (Maryland Agriculture College), Mt. St. Mary's College and Rock Hill College.

Address The Registrar for blank application forms and for catalogues. The next session begins Tuesday, October 2.

THAT BAD BACK

Do you have a dull, steady ache in the small of the back—sharp, stabbing twinges when stooping or lifting—distressing urinary disorders? For bad back and weakened kidneys Chestertown residents recommend Doan's Kidney Pills. Read this Chestertown statement:

Mrs. S. Pfeffer, 102 Cannon St., says: "I gladly recommend Doan's Kidney Pills to anyone in need of a kidney remedy. I have used Doan's at different times when my kidneys were troubling me and they never failed to give relief. The least cold I took settled on my kidneys and my back became weak and and painful. Mornings I felt dull and sluggish and the action of my kidneys was irregular. Doan's Kidney Pills were the right remedy for me and soon put a stop to the backaches and other signs of kidney trouble."

THE DEL-MAR-VIA TRIP

Chestertown Business Men Saw Many Things Well Worth A Journey Much Longer To See

A party of fifteen, representing the Business Men's Association of Chestertown, Md., made a three day tour of the Del-Mar-Via Peninsula on May 21st. with gratifying results not only to be junketers themselves but to the towns visited. The tour was a source of inspiration of the sightseers from the classic shores of the Chester and a source of pride to the enthusiastic committees that everywhere accorded them a generous welcome. Even those who had previously made casual trips through this section had never before quite realized its industrial, commercial and agricultural progress and up-to-dateness.

Here is a territory famed in song and story; rich in historic memories; renowned for beauty of river and plain—yet, withal, teeming with centres of modern commerce and industrial culture.

Chestertown is the educational center of the Eastern Shore; the home of Washington College, founded in 1733, and said by many tourists to be the prettiest town along the route. It has been called "The Venice of Maryland;" a community surrounded by romatic associations; set in historic atmosphere and endowed with rare natural beauty. Yet its commercial and industrial life is lagging behind the more so-called progressive towns of the greater peninsular community. And the Association plans to develop this side of Chestertown, so long neglected.

Under the inspiration of such an intensive appraisal of the Peninsula one must realize that there is a form of culture of a very definite and positive nature that is no less educational and cultural than the environs of a college town noted for its beauty and classic arts.

In Salisbury an organization committee has raised $204,000 in two weeks toward the erection of a new hotel. This achievement follows closely upon the building of the ultra modern M. P. Church, complete in every detail, at a cost of $150.000. The McCready Hospital in Crisfield, in equipment surpassed many big cty infirmaries, is testimonial to the same enterprising genius of the Shore farther south. The new theatre in Easton, the Masonic Temple in Cambridge, the remarkable small town fire department in Princess Anne; these are eye openers to those who think of the Del-Mar-Via Peninsula as merely a pleasant place in which to live.

One crosses over to Delaware and finds the Caulk Dental Plant in Milford—the coming dental centre of the world—with laboratories in process of building wherein all diseases of the mouth will be studies by specialists. An experimental room will contain forty dental chairs. In this establishment is listed the name and address of every dental surgeon in the world.

Let us pass over the high grade furniture factory in Easton; the last word in lumber factories in Salisbury; factories of all kinds and descriptions visited by the tourists; and come back to the great strawberry auction market in Marion Station, the largest in the world, with a capacity of shipments of from 30 to 40 carloads a day and where 75 to 100 wagon loads wait daily for the auction block. Let us skip to Allan's nurserary, on the outskirts of Salisbury, where 10,000,000 strawberry plants were started last spring; where 350 acres are in fruit and where 25,000 peach trees are in process of growth; to the Harrison Nurseries in Berlin—10,000 acres— one of the show places of the shore; the Picking Duck Farm in the same city with 27,000 ducks from the incubator stage to six weeks old and with 1000 Pekin duck breeders; to the Consumers' Ice Company in Crisfield with sea food of all kinds in cold storage—and over to Selbyville in Delaware where the strawberry market holds place with Marion Station as being the largest in the world, and which is also the heart of the tomato country.

It was a remarkable journey, replete with every form of enjoyable entertainment, and left a deep impression upon those so fortunate as to go. In short, the party returned to Chestertown, proud of their own community but refreshed with new vision of the future..

AN INTERESTING LETTER

Mrs. Evelyn Harris, Writing To The Baltimore News, Gives Some Information Worth While

May 23, 1923.

Editor, The Baltimore News,
Baltimore, Md.

Dear Sir:

Dr. Symons has an interesting article in last nights paper, but he did not quite finish it. If the man tilling the soil is the owner, he gets the whole of the $25.00 a week, but if he is a tenant, he gets just $12.50 a week, according to his figures.

The owner of a hundred acre farm, is a man who has saved his money, by sacrifice, and by working his own family, usually, and has invested from $6,000 to $10,000 in his farm, buildings machinery and stock. This is a small estimate of what is needed on one hundred acres. A man with the same amount invested in a business in the city, is considered a business man, and as such, expects first of all to be able to get 6 per cent. on his investment. Is the farmer different?

The farmer must at least have four horses, 2 wagons, plows, cultivators, hoes, shovels, forks, a reaper, binder, mower, harness for these different things, corn planter, drill, a barn, a stable, a wagon shed and several other smaller buildings. He will have to spend on the average, $130.00 for fertilizer, $32.00 for seed wheat, $3.35 for seed corn, $21.00 for grass seed. Any catalogue will give you the list price of the implements needed, and I've given other prices.

Dr. Symons made up his figures from Gov't reports. He did not get them from the average Maryland Farmer, whose total for the 100 acres will be $636.00, for 1922.

The average yield for this state is 15 bus. of wheat to the acre, and the average farmer must sell it as soon as thrashed, as he owes the money for fertilizer, etc. and the price this year, (1922) was just 80 cents a bushel, or a total of $192.00 the farmer in Maryland actually received. On corn, the average for the state 30 bushels to the acre, and when shelled this year, was sold at 60 cents, or $288.00. On hay, the average for the state is one ton to the acre, and the price was $16.00, making $256.00 for hay, or a grand total of $636.00, just 6 per cent. on the investment the farmer had made.

As he owned this land, he was able to go to the bank, put a mortgage on it, and get the $186.35 which he has spent to grow it, and for HIS living, and the living of his family, he had nothing. His taxes also had to be paid, and likely he was in arrears about three years, for during the past three years, conditions have been practically the same, except on several occasions, after all the money had been spent on the crop, the hail storms cleaned them up, and there was no gross sales anyplace.

The prices Dr. Symons gave, were prices which SOME BODY RECEIVED FOR THE FARM PRODUCTS, but they were the fellows who were buying from the farmer at a low price, and selling at a high figure, as they could get the capital with which to hold them, and the farmer couldn't.

Eggs were sold by the farmer at 20 cents a doz., and in six months will be sold to the city man for 75 cents a doz., and it costs very little to hold them, but Dr. Symons can get prices at which eggs were sold in 1922, which will not at all compare with prices the farmer received at farm, for the eggs.

As 80 per cent of the farmers in Marylan are tenant farmers, he divides with the landlord, and would receive for his work, from sun to sun, just $318, for his labor, out of which he pays half of expense, or $93.18, leaving just $225.00 for over 300 days of hard work, and interest on money in stock and implements. Any wonder they're getting radical? Any wonder they're deserting and just leaving everything. Any wonder they're committing suicide? Whats the difference between starving and hanging? Undertaker gets you just the same. And I'm married to one.

EVELYN HARRIS.

—John W. Nelson, of Crisfield, ran into an unlighted fish trap at the site of the sinking of the old battleship Texas, near Tangier Island, recently, and nearly lost his life.
