Making Progress

Are you richer today than you were yesterday? No? Then you are a little poorer. Are you better today than you were yesterday? No? Then you are a little worse. Are you nearer to your port today than you were yesterday? Yes—you must be a little nearer to some port or other; for since your ship was first launched upon the sea of life, you have never been still for a single moment; the sea is too deep, you could not find an anchorage if you would; there can be no pause until you come into port.—Van Dyke.

DO THIS when you wake up with a Headache

ENJOY RELIEF BEFORE YOU'VE FINISHED DRESSING

Bayer Tablets Dissolve Almost Instantly

In 2 seconds by stop watch, a genuine BAYER Aspirin tablet starts to disintegrate and go to work. Drop a Bayer Aspirin tablet into a glass of water. By the time it hits the bottom of the glass it is disintegrating. What happens in this glass . . . happens in your stomach.

When you wake up with a headache, do this: Take two quick-acting, quick-dissolving BAYER ASPIRIN tablets with a little water.

By the time you've finished dressing, nine chances in ten, you'll feel relief coming.

Genuine Bayer Aspirin provides this quick relief because it is rated among the quickest methods for relief science has yet discovered.

Try it this way. But ask for it by its full name, BAYER ASPIRIN; not by the name "aspirin" alone.

Useless Worry

Today is the tomorrow you worried about yesterday—and all is well.

DISCOVERED
Way to Relieve Coughs
QUICKLY

IT'S BY relieving *both* the irritated tissues of the throat *and bronchial tubes*. One set of ingredients in FOLEY'S HONEY & TAR quickly relieves tickling, hacking, coughing . . . eases and soothes irritated throat linings to keep you from coughing. Another set *actually* enters the blood, reaches the affected bronchial tubes, loosens phlegm, helps break up cough and *speeds recovery*. Check a cough due to a cold before it gets worse, before others catch it. Check it with FOLEY'S HONEY & TAR. It gives quick relief and *speeds-up recovery*.

hotel Collingwood

Small, quiet and select. Especially desirable for ladies traveling alone. Home of the famous Collingwood Chestnut Room. Single from $2. Double from $3.

45 WEST 35TH STREET NEW YORK

what Irvin S. Cobb thinks about:

This Changing World.

NEW YORK.—They say poker is dying out, its place being taken by bridge, a game played with 52 cards and frequently, as between partners, with fully 52 times that many harsh words. I look for a revival of tit-tat-toe. You can quarrel over that, too.

And out on the dude-ranches, old cowhands, who once were almost rough with heifers and calves, are being schooled in discreet love-making and other romantic exercises to qualify them for celebrating Be Good to Debutantes week next summer.

Irvin S. Cobb

And it no longer excites national interest when the plaintiff in a breach of promise suit, or even a suit for alimony, is a man. Or at least such is the impression which his lawyer, in addressing the jury, would create.

• • •

Soot-Laden Cities.

LOS ANGELES may have its drawbacks (loud cries of "no!" from all native sons, including the foreign-born ones), but she certainly spoils a fellow for the clinker-laden, smut-freighted atmosphere of many other cities.

Take Chicago, where the weather bureau, if so inclined, frequently might report a two-inch fall of soot. Or Pittsburgh, where a chap comes home for a week looking as though he'd been cleaning out a soft-coal stove. New York is nothing to brag on, either. Leave a snow-white pup out over night and he could pass for a Dalmatian.

Yet heating engineers say that proper smoke consumers would produce such saving in fuel cost as to pay for themselves in about one year. Can it be these big city folks would rather not save money, or just naturally don't care a dern? Or possibly the citizens fear they might collapse their lungs and choke to death did they start breathing something remotely resembling fresh air?

Outwitting the Laundry Man.

SEEING a Pullman porter pry open a car window with one of those burglars' tools which Pullman porters carry for that purpose gave me an idea.

I'm going to buy one to use on dress shirts when they come back from the laundry with the little flaps on the collar band cemented down over the back button hole. The laundries may claim it's starch, but I know better—it's concrete and high-grade concrete at that. It acts like it and tastes like it, as you may have noticed on licking same. With the aid of this happy device, I shall save my nervous system, my salivary juices, my fingernails and—if profanity be a grievous sin—probably my immortal soul as well.

But I don't suppose anything can be done about the eighteen or twenty pins with which every efficient laundry hand pins up a dress shirt before delivering. And perhaps we'd better not try—it would reduce the consumption of pins in this country by from one-half to two-thirds, and goodness knows the industrial balance is already upset.

Large Ears

Large ears, like large mouths and noses, show a good strong character, often with literary ability, but they must be well shaped, not too prominent and have large loose lobes. If large and shapeless, they often indicate a gross nature, especially if red and fleshy.—Pearson's Weekly.

Keeping Up With Science

Radio Robot Flies Eight Miles Aloft for Weather Data

Tiny Storage Battery Has Been Devised

Pasadena, Calif. — Scientists here as a step toward improved weather forecasting have made a robot balloon, which constantly calls down to earth radio reports of temperature, pressure and humidity from altitudes as lofty as 40,000 feet (nearly eight miles).

The flying radio station weighs only two pounds and the balloon is five feet in diameter. The radio emits a 1.7 meter wave, which is one of the shortest wave-lengths used for a practical purpose. The apparatus has already made one flight to 30,000 feet.

To reduce the weight of California Institute of Technology's soaring weather station, the smallest yet devised for such an ultra-short wave, Louvan E. Wood, graduate assistant who designed the meteorograph, has developed a tiny two-volt storage battery that will rest on a fingernail. Weighing 4½ grams, this battery will be used in a series of about 50, replacing a dry cell battery system.

Broadcasts Humidity Records.

In addition to temperature and pressure, the station is designed to broadcast humidity records. The present method of gathering these data is by airplane. Perfection of the radio system will provide a faster means of obtaining the data for forecasting purposes.

Except for the elimination of one or two technical difficulties in the recording of data, the radio method of gathering meteorological information aloft is on the eve of practical use.

By gathering weather data up to altitudes of 40,000 feet, meteorologists will be able to refine the new system of air-mass forecasting.

Tiny One-Tube Radio.

The radio, credit for which goes to Capt. O. C. Maier of the United States signal corps, has one tiny tube that transmits a constant signal, interrupted by a timing device that translates the data for broadcasting. This timing mechanism is a watch that has been refined, and develops one two-and-a-half-millionth horsepower, 25 times more than an ordinary watch.

Early Palestine Favored Heads Bulging in Back

London.—The curious fashion of shaping one's head to make it bulge high at the back was known to early inhabitants of Palestine, so British archeologists digging at ruins of Lachish have discovered.

Several skulls, apparently pressed and bound to this shape in the pliant stage of childhood, have been unearthed. They are believed to date from an earlier time than the conquest of the Promised Land by the Israelites.

The odd-shaped skulls are pronounced by archeologists similar to the head of the famous Pharaoh of Egypt. Akhnaton, whose family had this peculiarity, though whether the Egyptian king's long head was naturally deformed or intentionally so has long been debated by scientists.

STAR DUST MOVIE AND RADIO

• By VIRGINIA VALE •

IF YOU failed to see "One Way Passage" when it was originally released (and apparently everybody failed to see it then), you may have another chance, if one of your local theaters follows the example of one of the New York ones and shows it again.

Hailed as one of the best pictures of its time, it ran into bad luck because it came along when the depression was at its height. People just weren't going to the movies then.

It's still a grand picture. William Powell is as expert in it as he is now—but he looks a lot younger. Kay Francis is very lovely, and Frank McHugh proves that then, as now, he is one of our best comedians.

—•—

Incidentally, that same McHugh is coming right along. He is to have a perfect role in "Three Men on a Horse" — in fact, he's to be starred in it. Among others who are said to have wanted that same role are Eddie Cantor. Well, it's McHugh whom you'll see playing it on the screen. And his excellent performance is the result of the fact that a long career on the stage (he started as a child, appearing in melodramas with the rest of his family) taught him practically everything there is to know about acting.

Frank McHugh

—•—

Whether you like football or not, you'll be amused at "Pigskin Parade"—it's hilariously funny. And the Yacht Club Boys do plenty to make it amusing.

—•—

Helen Hayes does a good deal of rehearsing for her "Bambi" broadcasts, and during the off moments that occur at all rehearsals she knits. Does it fast, too—she can turn out mittens and socks in no time at all, and the results are turned over to a charitable organization for distribution.

—•—

One of the reasons given by Paulette Goddard Chaplin for keeping her marriage a secret was that she wanted to make good under her own name. But the speculation that has been going on for ever so long as to whether she and the famous comedian were engaged, were married, or were just friends has kept her name in the papers, coupled with his always. She appeared in a picture with him, it was announced that he would direct her in two more. Can't see why it would make any difference if the marriage had been announced when it took place. Except, perhaps, in the amount of publicity.

Paulette Goddard

—•—

ODDS AND ENDS . . . If you have missed Al and Lee Reiser, the clever piano team, be advised that they've dropped their Thursday broadcasts and are now heard Tuesdays and Fridays . . . They say that Rosalind Russell may win this year's Academy Award for the best performance for her acting in "Craig's Wife" . . . "The Good Earth" has been cut at last—now they'll start on the previews . . . And some day we'll all be able to see it . . . Robert Taylor may have to postpone vacationing in Honolulu if the ship strike isn't settled soon . . . But motion picture people are accustomed to postponing a vacation again and again before they finally take it . . . Spencer Tracy, just through with "Captains Courageous," will start soon on another all-masculine picture.

Household Questions

Chocolate stains may be removed from table linen by sprinkling the stain with borax, then pouring boiling water through the linen.

• • •

Cane-bottomed chair seats can be tightened up by washing them in a weak solution of salt water and then drying in the oper air.

• • •

Do not throw away the outside leaves of cauliflower. Cut in inch pieces, boil until tender and serve with white sauce.

• • •

Potatoes used in salad should be thoroughly chilled and with sharp knife cut into half-inch dice. Add rest of ingredients and mix with fork. This will aid in preventing salad from becoming "mushy."

• • •

When sending a book through the mail cut corners off stiff envelopes and put on book corners. Protected in this way corners will not bend.

• • •

Parsley for potatoes and salads will keep bright and fresh in color if scalded before mincing.
