(Continued from sixth Page.)

pathologist at the Agricultural College, has just returned from a week's trip through Tennessee, where he has been studying the conditions of the seedling peach. It is a well-known fact that Tennessee does not produce all the peach seeds from which trees are propagated, although it is said that the most of them come from that section. Professor Townsend will make a report on the subject a little later.

Professor Johnson who started West on Tuesday together with Prof. Townsend and Mr. G. L. Stewart, will go direct to Chicago, and from thence to Benton Harbor, Mich., where they will study the great peach belt along Lake Michigan. This belt is about one hundred and fifty miles long and ten miles wide. The investigators will be the guests of R. Morril, the "peach king of Michigan." In speaking of the trip Professor Johnson said that some twelve or fifteen years ago the peach industry in this section was annihilated by the peach yellows. The orchards have been reinstated and are in better condition and more extensive than before. He said:

"We want to know how they accomplished this, and we propose to find out, if possible. We will be absent about one week, and will continue our inspections of nurseries and orchards upon our return, which will be about August 22."

RAILROADS NEW DEPARTURE.

The Baltimore and Ohio Railroad, recognizing the value of a scientific development of its agricultural and horticultural interests from a commercial standpoint, has created a new department to take charge of them under the general management of Mr. W. W. Wood, the industrial agent of the road. The immediate direction of the work was offered to Prof. Johnson at a salary of $2,400 per year, and he has had the matter under consideration for some months. He has decided, however, that he could not afford to accept it at this time, and that such a move would not be fair to the people of the State, as it would mean that he would have to leave the work and investigations of two years unreported. Prof. Johnson was asked to recommend some one else for the position, and named his assistant, Mr. Guy L. Stewart, who has been appointed and began his new duties on August 15. Mr. Stewart is a graduate of the Michigan Agricultural College, and came to this state two years ago. Since that time he has been connected with the work of the college and experimental station. He is well-known throughout the State, and has lectured on nature study before the school teachers of all the counties.

Prof. Johnson says that the time is speedily coming when other corporations will follow this move of the Baltimore and Ohio, as the conditions and times demand experts along this line.

THEY SAY

That no woman can be too good to be true.

That it is not unusual for a tailor to file a suit.

That a pistol is doubly dangerous when the owner is loaded.

That the man who sees an opportunity is the one to seize it.

That about the only thing a man can't lie out of is eating onions.

That the manager of a theatre is obliged to depend upon his income.

That all the world's a stage, and every star part has hundreds of understudies.

That in financial circles you will find sharpers even when the market is dull.

That it stands to reason that the ossified man should be hard to get along with.

That even if a woman is as young as she claims to be, no other woman will believe it.

That some girls are really too sweet to fall in love with. The fly that gets stuck on the molasses finds himself in a lot of trouble.

That for about six months after he graduates the college youth expresses a willingness to "consider offers of remunerative positions." After that he begins to hustle for a job.

YES, there is something radically wrong with the small boy who likes to have his hair cut.

A Minister's Good Work.

"I had a severe attack of billious colic, got a bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy, took two doses and was entirely cured," Rev. A. A. Power, of Emporia, Kan. "My neighbor across the street was sick for over a week, had two or three bottles of medicine from the doctor. He used them for three or four days without relief, then called in another doctor who treated him for some days and gave him no relief, so discharged him. I went over to see him the next morning. He said his bowels were in a terrible fix, that they had been running off so long that it was almost bloody flux. I asked him if he had tried Chamberlain's Colic, Cholera and Diarrhoea Remedy and he said, "No." I went home and brought him my bottle ond gave him one dose; told him to take another dose in fifteen or twenty minutes, if he did not find relief, but he took no more and was entirely cured." For sale by M. A. Toulson, druggist, Chestertown, Md.

SUBSCRIPTION TO THE TRANSCRIPT $1.00 per year.

"A Bright Little Boy"

Would be sure of a welcome in almost any home. But what a welcome he would have in a home where the hope of children had been extinguished. What a welcome this particular "bright little boy" did have in such a home, may be judged by the closing paragraph of his mother's letter, given below. There is no room for the whole letter, which recounts a story of fifteen years of suffering and a perfect cure by the use of "three bottles of Dr. Pierce's Favorite Prescription, two bottles of 'Golden Medical Discovery,' and some of the 'Pellets.'"

In many instances childlessness is the result of conditions which are curable. It has often happened that when "Favorite Prescription" has cured a woman of female weakness and the nervous condition attending it, her return to health is signalized by the birth of her first child. "Favorite Prescription" makes weak women strong, sick women well.

"I cannot tell half that Dr. Pierce's medicine has done for me," writes Mrs. T. A. Ragan, of Norris, Watauga Co., N. C. "It will do all that is claimed for it—prevent miscarriage and render childbirth easy. It has given me a bright little boy, and I would not have had him had it not been for your wonderful medicine. I cannot say too much in praise of it; I think it is worth its weight in gold. I thank God for my life, and Dr. Pierce for my health."

"Pleasant Pellets" clear the complexion.
