HOME—

How much will you pay for safety, for permanence, for comfort?

Portland Cement, the material making this possible, is the cheapest of all products undergoing a complete process of manufacture.

A permanent, fire-safe home can be built for from 2% to 5% more than one of impermanent materials. The protection of your investment, the safety of your loved ones, can be assured for a ridiculously small outlay. And such a home is warmer in winter, cooler in summer, and more sanitary the year 'round.

Ask your building material dealer for facts and figures on such construction. Your contractor will also tell you that it is more rapid, as well as safer, than temporary building.
