Do You Carry A Spare Tire?

Mention is often made when an auto is seen without a spare tire on the machine, that the owner is taking a long chance. To change a tire on the road is only a matter of a few minutes when you have a spare, but if you have to take it off and inflate it with a new tube, it is a long job, and lost time.

If then a spare tire is necessary to the autoist, how much more necessary is a bank account with a good balance necessary to every one of us when times of financial stress are upon us. These times, unfortunately, come to all of us just as the flat tire comes occasionally.

Why not be prepared by opening your account HERE AND NOW?

We will save you time and money, by assuring your funds the necessary safety.

EXTRA POWER
In the Driving Range!
That's Why the 1924 Cleveland Excels In Traffic Get-away and Hill Performance

Between 10 and 35 miles an hour, the new "extra power" motor of the 1924 Cleveland Six develops up to 30 per cent. more horsepower than the average light six motor at exactly the same speeds.

That's why the 1924 Cleveland rushes past bigger and costlier cars on hills—why the Cleveland owner simply steps on the accelerator and shoots swiftly ahead in traffic while the drivers of other sixes are still shifting gears.

ECONOMY AND SILENCE.—When you drive the 1924 Cleveland and see how easily it out-performs the average light six, please remember this important fact:

Its faster traffic pick-up and greater speed on hills is achieved not by putting a big noisy, inefficient motor under the hood—but by the use of a smaller motor scientifically developed to combine superior performance powers with greater economy and silence.

RUGGED AND LIGHT.—Built only of the fines talloy steels, the Cleveland chassis combines great strength with lightness. With less dead weight to carry, tires last as high as 20,000 miles. For the same reason, oil and gas bills are smaller.

FISHER BODIES.—All closed models have handsome Fisher bodies, beautifully proportioned and brilliantly finished. The sedan seats five comfortably. There is ample leg room for every passenger. Seats are deep, low, and upholstered in the finest taupe plush.

DRIVE IT.—Drive the 1924 Cleveland with its new power plant and sixteen other big improvements! Even if it were not powered by the finest motor of its size ever placed in an automobile, it would still be the soundest investment in the light six field!

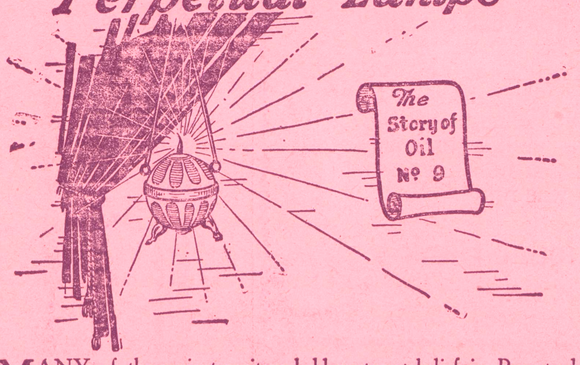
Perpetual Lamps



MANY of the ancient writers held a strong belief in Perpetual Lamps. In the older literature there are frequently found descriptions of lamps which had been burning in ancient sepulchres, and that were extinguished as soon as the outside air rushed in. When Paul III was Pope, (1534-1549), such a lamp was found in the tomb of Tullia, Cicero's daughter. which had been burning for 1550 years.

AT ABOUT the same time, at the dissolution of the monasteries, a lamp was found that is said to have been burning for 1200 years. Two of these lamps are now in the Leyden (Holland) Museum

Of course, we do not attempt to claim that The Red "C" Oil or The White "C" Oil, same except in color; will make your lamps burn perpetually. But we do say, and we mean it, that by using this excellent Oil your lamps will burn longer for every gallon of Kerosene you buy. Long-burning, free from all smoke and odor, it is the superior Oil for Lamps, Stoves and Incubators.

The Red "C" Oil — A bright red color to brighten your lamps
The White "C" Oil — A sparkling, crystal-clear, white Kerosene
