CLAIMS FOR OLD-AGE INSURANCE IN MARYLAND

A statement issued today by Luther Becker, Manager of the Baltimore office of the Social Security Board, shows that 233 claims for old-age insurance were certified for payment to eligible persons in this area during January 1939.

Since the start of the program, on January 1, 1937, 3,665 claims, amounting to $165,730.95, have been certified for payment to persons living within the counties of Baltimore, Harford, Anne Arundel, Howard and Cecil, and the city of Baltimore, which comprises the area served by the Baltimore office.

A little more than half, or 2,118 of these clams were filed by relatives of deceased workers who were employed in jobs covered by the Social Security Act and who died before receiving benefits. A total of 1,547 claims were paid to insured workers in jobs that come under the Act.

Since the old-age insurance provisions went into operation on January 1, 1937, more than $211,857.41 in benefits, representing about 4,701 claims were certified for payment to citizens of Maryland. Of the number, 310 claims were approved by the Social Security Board during January 1939 and certified to the United States Treasury for payment. The average amount of claims certified for payment in January in this State was $65.41. More than one and a quarter million dollars in old-age insurance benefits, representing about 18,700 claims, were certified for payment throughout the United States during January. Since January 1, 1937, more than 285,600 claims, totaling $13,000,000 have been certified.

CHRISTIAN SCIENCE SERVICES

"Substance" will be the subject of the Lesson-Sermon in all Churches of Christ, Scientist, on Sunday, March 12.

The Golden Text will be from Prov. 3:6: "Honuor the Lord with thy subtance, and with the first-fruits of all thine increase."

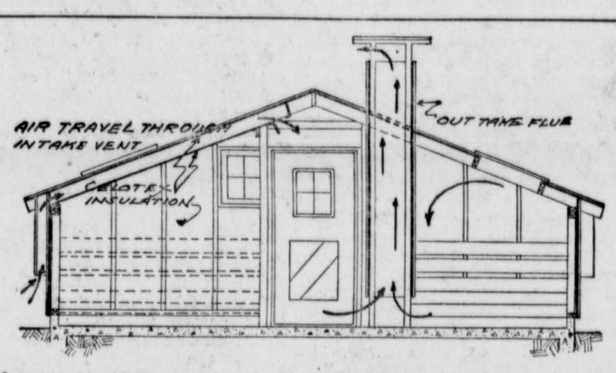
Among the citations comprising the Lesson-Sermon will be the following from the Bible, Psa. 113:2; "Blessed is the name of the Lord from this time forth and forevermore."

The Lesson-Sermon also will include passages from the Christian Science textbook, "Science and Health with Key to the Scriptures," by Mary Baker Eddy, among which is the following, page 468, "Substance is that which is eternal and incapable of discord and decay."

WHEN CRIME POSES AS SPIRITUALISM

Investigator makes starling disclosures about charlatans who betray and plunder heartsick victims. One of many interesting features in the March 19th issue of The American Weekly, the big magazine distributed regularly with the Baltimore Sunday American. On sale at all progressive newsstands.

HOG PROFITS CONSTANTLY THREATENED BY DISEASE

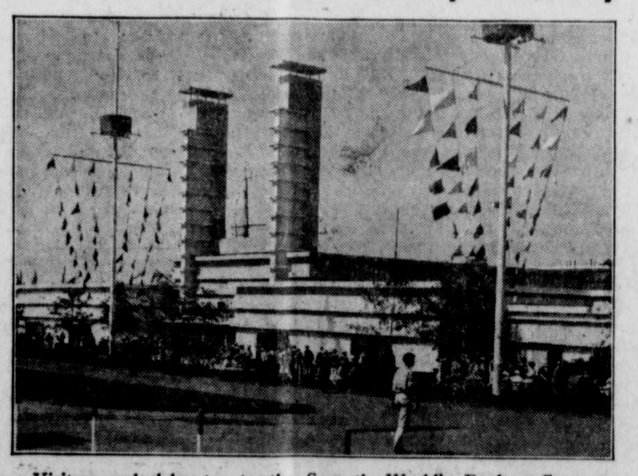


If we could reduce the annual toll of swine diseases by 50 per cent, the profits of our farmers would be increased by tens of millions of dollars. This statement by the "American Foundation for Animal Health" clearly demonstrates that something should be done to check these appalling yearly losses.

Well up on the list of disease fatalities is swine influenza, caused by sudden changes of weather, continued cold and rainy spells, and poorly ventilated, or drafty quarters. The best safeguard therefore is to see that hogs are properly housed and kept in good vigorous condition.

The accompanying drawing demonstrates how the simple addition of cane fiber insulation board to a hog house can provide weather protection for any season of the year. Such insulation conserves the body heat of the animals in winter, and assists in keeping the house at an even comfortable temperature. Ventilation, an essential factor in maintaining dry, healthful quarters, requires insulation. In the well insulated and ventilated hog house, harmful moisture will not collect on the walls and roof. This means a dryer house which, according to proved tests, is decidedly helpful in preventing disease.

World's Poultry Congress to Present Birdseye View of Worldwide Poultry Industry



Visitors and delegates to the Seventh World's Poultry Congress, Cleveland, Ohio, July 28 to August 7, 1939, will find the Hall of Nations and States a fruitful source of interest. This great building has been set aside for the educational exhibits that depict the progress, scope and importance of the poultry industry throughout the world. Elaborate exhibits from at least forty to sixty overseas nations will be found here, picturing poultry raising methods and the economic importance of the industry in those nations. Our own U. S. Government exhibit, constructed at a cost of $35,000.00, will picture the government's interest and participation in the industry, the surprising importance of poultry as an economic factor and the many ramifications of the industry. State exhibits from every state and territory will feature many of the local phases of the industry. Secretary of Agriculture Henry Wallace is president of the Congress.

The policeman is a monarch of the seize.

Tolls revenue at the Panama Canal comes to $50 a minute.

BRUCKART ADMITS 'TERRIFIC' HOBBY—IT'S MATHEMATICS

William Bruckart, author of The Midland Journal's "Washington Digest" column, admitted publicly this week that he has a "terrific hobby."

The hobby: working with figures.

Seated at his desk in Washington, D. C., the famous capital correspondent who enjoys one of the largest followings ever acquired by a journalist, whittled away at a pencil

WILLIAM BRUCKART
Author of "Washington Digest."

preparatory to delving into the latest governmental financial summary.

"I've been doing this for years," Bruckart admitted while digging out a clean scratch pad. "It's just a hobby, I suppose, but there's nothing I like better than to take a budget apart and see what makes it run!"

Bruchart's column is followed closely by practically all readers of The Midland Journal because this Washington correspondent has long enjoyed a reputation for straightforward reporting and comment on capital developments.

A native of Missouri, he began his active newspaper work at Wichita, Kan., later moving to the Kansas City Star. He went to Washington with United Press, subsequently joining with the United States Daily when David Lawrence started that paper. At the same time he worked for the Philadelphia Public Ledger syndicate.

WHAT'S GOING ON IN HOLLYWOOD

All the news of screenland, pictures of your favorite stars and other interesting features will be found in the Green Spotlight magazine, distributed regularly with the Baltimore Sunday American. On sale at all progressive newsstands.

Every time the hand of your watch swings around once, another 700 money orders were filled out in America.

Main Entrance to the Building of The Christian Science Publishing Society in Boston, Massachusetts

ADVERTISING DAIRY PRODUCTS

Through a national campaign now being worked out...it is hoped that $1,000,000 will be raised for an advertising campaign to boost dairy products.

If dairy farmers can be assured of fairly decent milk prices in line with production costs, they can well afford to spend a reasonable amount of money advertising the greatest agricultural industry in the nation. That is one very important way to increase consumption for the benefit of everybody's health, and to get markets for the benefit of every dairy farmer's pocketbook.
