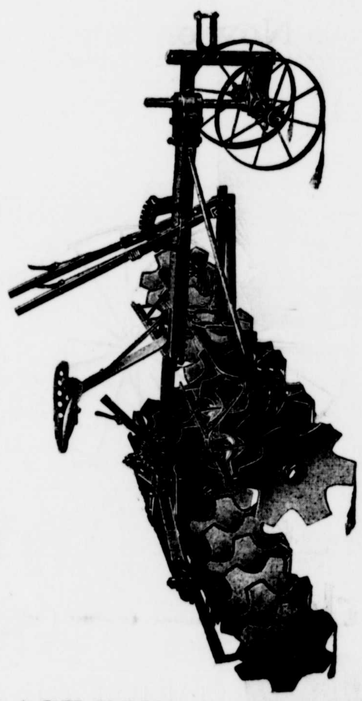
## IMPERIAL Double Disc Harrow.



It harrows the ground twice in one operation, saving the labor of a man and two horses. It enables the farmer to do his work in one-half the time, making the most of favorable weather and soil conditions. It gives better results than any other harrow and leaves the ground in better condition.

In construction the Imperial Double Disc consists of a complete out throw harrow with a second harrow (in rear) attached, which throws its gangs inward, just the reverse of the first harrow. The forward harrow cuts the soil and throws it outward; the rear harrow works it again and throws its back. Leaves the surface pulverized and perfectly level. The rear gangs follow the front gangs in turning and the dirt is not thrown up in ridges at the corners. Every inch of ground is pulverized and leveled.

The rear gangs may be quickly and easily detached and the machine used as a single disc harrow if desired.

## Sells Fine Cattle.

Mr. S. S. Hepburn has sold to Mr. Wm. McKenney, of Centreville, his fine herd Angus bull Eolate. This animal would have brought on Philadelphia market at quoted prices $100. Mr. McKenney purchased the fine animal for stock purposes. Mr. Hepburn also sold to Mr. Wm. J. Hepburn a fine young Augus male and heifer. Much more inquiry is now being made for fine bred stock of every description than heretofore. Mr. Hepburn is one of the most progressive stock raisers in the county. Any information any one may desire in reference to one of the best grades of cattle in the county, as well as for thoroughbred sheep, etc., will do well to communicate with Mr. Hepburn, whose postoffice is Kennedyville.
