Mercantile.

To Farmers.

The attention of farmers is called to the

BICKFORD & HUFFMAN DRILL.

I have sold between one and two hundred of those celebrated drills in the last two years, without a single complaint. They are admitted to be the best in the market. Last year I could not supply the demand for them, because some farmers were late giving their orders. All who want them this season will please give me their orders early, so that there may be no disappointment.

The attention of farmers is also called to the celebrated

Oliver Chilled Plow.

I have sold over five hundred of these plows within the last two years without a complaint. There are none equal to them the farmers say. As I have made arrangements to supply them hereafter at a

REDUCED PRICE,

Those who want will find the present a good time to order.

oct18,81yr

Cathartic Pills

Combine the choicest cathartic principles in medicine, in proportions accurately adjusted to secure activity, certainty, and uniformity of effect. They are the result of years of careful study and practical experiment, and are the most effectual remedy yet discovered for diseases caused by derangement of the stomach, liver, and bowels, which require prompt and effectual treatment. AYER'S PILLS are specially applicable to this class of diseases. They act directly on the digestive and assimilative processes, and restore regular healthy action. Their extensive use by physicians in their practice, and by all civilized nations, is one of the many proofs of their value as a safe, sure, and perfectly reliable purgative medicine. Being compounded of the concentrated virtues of purely vegetable substances, they are positively free from calomel or any injurious properties, and can be administered to children with perfect safety.

AYER'S PILLS are an effectual cure for **Constipation or Costiveness, Indigestion, Dyspepsia, Loss of Appetite, Foul Stomach and Breath, Dizziness, Headache, Loss of Memory, Numbness, Biliousness, Jaundice, Rheumatism, Eruptions and Skin Diseases, Dropsy, Tumors, Worms, Neuralgia, Colic, Gripes, Diarrhœa, Dysentery, Gout, Piles, Disorders of the Liver, and** other diseases resulting from a disordered state of the digestive apparatus.

As a Dinner Pill they have no equal.

While gentle in their action, these PILLS are the most thorough and searching cathartic that can be employed, and never give pain unless the bowels are inflamed, and then their influence is healing. They stimulate the appetite and digestive organs; they operate to purify and enrich the blood, and impart renewed health and vigor to the whole system.

HALLETT & Co., Portland, Maine.

Agricultural.

Ensilage and Its Preparation.

This word which is only a few years old, grows out of the discovery made by a Frenchman, Auguste Goffart, that green crops, when stored in water tight pits called silos, under a heavy pressure do not rot, but are preserved fresh and sweet, and retain all their nutritive juices for a year or more; and that, when offered to cattle in this condition in the winter, are preferred to any dry food. It is not surprising that the discovery made a sensation among farmers and cattle feeders in this country, and that there is exhibited a keen desire to know all about it; for not only can a great deal more in weight of green food than dry be raised on an acre, but ensilage possesses the advantage of supplying cattle with succulent summer food in the winter—an advantage of great value to milch cows. Any green crop that stock are fond of when in a growing state is good material for ensilage—grass, clover, rye, young corn, sorghum, and vegetables; but corn, clover and the grasses are most generally used, because when growing they are full of juice, which is lost in curing hay or fodder, but preserved in the silo. Several kinds of green crops may be packed in the same silo, and the ensilage is said to be improved by the variety. Corn, either drilled and cultivated or sown broadcast, and in its most juicy condition, is the basis of most ensilage experiments in this country; it may be packed in the same silo with clover or grass of any kind cut green, and successive crops of corn may be planted for mixture with different kinds of grasses in their season. As it is estimated that ten to twenty tons' weight of green crops may be cut from an acre of good soil—five to ten times as much as the weight of a dry crop of grain or hay—it is easy to see how much more profitable it is to save green crops in the form of ensilage than to allow them to mature and dry. Mr. J. W. Wolcott of Boston, who owns a farm near that city, raised 460 tons of ensilage on thirty-four acres—being fourteen tons to the acre—last year. By raising two crops on the same soil he has gathered as much as twenty-one tons per acre. On one piece of ground he gathered thirty-one tons per acre, but "that corn was fourteen feet high," he says. He adds: "I am satisfied that an acre of ground will keep a cow twenty-four months."

When the silo is opened in winter the contents are found in a sort of cheesy condition, and require to be sliced off with a sharp ax. They have undergone a slow and slight fermentation which does not impair their merits as feed and not offensive to cattle. Indeed, the first smell of ensilage is said to "set cattle wild for it," and they prefer it to any other kind of feed.

Silos are variously constructed. The usual plan is to dig pits ten feet wide, fifteen feet deep, and as long as may be desired, on sloping ground, and make them water-tight with cement. Mr. C. W. Mills, of Pompton, N. J., prefers to build a strong frame, boarded up tight and close with thick lumber, entirely above the ground, something in the fashion of an ice-house. The green crops may be packed into them, either whole or cut up with a cutter; each plan has its advocates, though the weight of opinion is in favor of cutting, as it allows of closer packing. As the crops are thrown in they are trodden down as closely near the edges as possible, and when the silo is full it is covered and weighted with heavy rocks or earth, and then shedded over to protect it from the weather. In a few weeks the ensilage is "ripe," and ready for use. One end of the silo, if built along the ground may be opened and the ensilage cut out and fed as it is wanted. Its quality will depend on the crops of which it is made and the care with which it is packed away. Nearly all animals will eat it; cattle like it and thrive on it; and for which cows it is particularly valuable, as it increases their flow of milk and keeps them in a cheerful, healthy condition.—*Missouri Republican.*

To Grow the Lima Bean Successfully.

The Lima bean is one of our most popular and desirable vegetables; but for one reason or another many people have trouble in getting them to do well, and some people in getting them at all. This bean loves heat, dislikes cold moisture, and delights in loose rich soil. Those who wish to succeed have to be careful that all the conditions are fully insured. In order to guard against damp the earth is drawn into good sized hills, so that any superabundant moisture can pass rapidly away. If the soil be heavy, a large portion of road sand or even finely-sifted coal ashes should be mixed with the soil in these hills, and if one can have access to a cow yard, well decomposed manure from such a locality is the perfection of food to the Lima bean. Then in planting, they ought to be set but just beneath the surface, or they will be very liable to rot in pushing their way through. Push them in the ground edgewise, with the eye downwards, as the sprouting germ comes up the sooner.

But with even all these precautions for dryness, food and warmth, people often plant too soon; a cold rain follows and the seed rots. Four sound looking beans are enough for each hill, and if all grow and do well one may be taken out. But as a very sure—we may say certain—guarantee against the seed rotting *grease with tallow* the beans before planting. We have in fact never failed in our own crop, in following out this method, unless through a prolonged drought like that of last year, and even then we had at least half a crop.

Ducks in the Farmer's Door Yard

Some farmers have an ample back-yard in the rear of their dwellings and outhouses, for chickens, turkeys, guinea hens, etc., and might add to their list of fowls Aylesbury or Pekin ducks without much trouble, and greatly to their advantage. They do not need a pond. A small vat or trough daily supplied with fresh water is sufficient. Clean water and a clean trough is good for everything that has feathers, and should be daily supplied to all the fowls in the yard. A good flock of large white ducks is ornamental among other fowls, as well as profitable. They give but little trouble, and usually are healthy and prolific.

Food for Roses.

Get some soot from a chimney or stove where wood is used for fuel, put it in an old pitcher, and pour hot water upon it. When cool, use it to water your plants every few days. When it is all used fill up the pitcher again with hot water. The effect upon roses that have almost hopelessly deteriorated, is wonderful in producing a rapid growth of thrifty shoots, with large thick leaves, and a great number of richly-tinted roses. Never despair of a decayed rose bush until this has been tried.

One million six hundred thousand acres are devoted to beet cultivation in Europe.

Practical Undertaker

OF LONG EXPERIENCE.

I would respectfully inform my friends and the public generally, that I am now better prepared to furnish everything in the furniture line, than I have been in the past.

My ware-house contains 5500 square feet of flooring, which is at all times stocked with stock pertaining to my business, and which will be sold as cheap or cheaper than can be bought here or elsewhere.

Having no other trade or profession, I am in the business for life, health permitting, and do not intend to be undersold or excelled in any particular pertaining to my business.

Myself and son Harry will give our personal attention to the business, and I recommend him as capable to attend to all business in my absence.

REPAIRING

done neatly and with dispatch. Stock of

PICTURE FRAMES

always on hand made to order. Thanking you very kindly for your patronage in the past, I earnestly solicit a continuance in the future.

Undertaking a Specialty.

I shall continue to give the undertaking department of my business my special attention, and having had thirty odd years experience in the business, I feel sure I can give satisfaction in the attention of all funerals entrusted to my care.

I have one of the best hearses and keep in stock everything necessary to furnish the best funeral.

Corpses preserved in ice when requested. Remember my prices shall be as low as the very lowest. Respectfully,

JOHN MASON.

Easton, April 25, 1882yr

To the Farmers.

THE TALBOT COUNTY PAPER MILLS COMPANY will now contract for WHEAT STRAW, to be delivered at a convenient time hereafter. A little more care in stacking and ricking, will insure so much better keeping as to enable farmers to spare at least half of their straw, the mass for which would nearly pay for their phosphates. Apply to

R. B. DIXON, Treasurer.

jan29tf

THE GOLDEN SHEAF.

A Fertilizer specially adapted to the Soil of the Eastern Shore of Maryland.

$20 PER TON.

Sold at a very small profit on cost of production and clear of Agents' commissions.

THE COMPOSITION NO SECRET.

Made Without Sand or Dirt.

FOR SALE BY

THE OXFORD GUANO CO., Oxford, Md.

W. H. SETH, Secretary.

The attention of Farmers who desire to secure a good fertilizer at a reasonable price, is respectfully called to the above named brand.

The object of the manufacturers has been to originate a compound of plant foods directly adapted to the soil of the Eastern Shore of Maryland, and to fix the price therefor at the lowest possible figures; cutting off all agents fees of $5 and $6 per ton and adding to the actual cost only a very small profit. We think this fertilizer has as much intrinsic value as most of the high price manures, and feel confident that farmers who may think proper to use it will say, that in its effects upon the soil, it will equal them.

The analysis, as made by Prof G. A. Liebig, shows it to contain:—

Ammonia, from	7.75 to 1.25	per cent.
Phosphoric Lime, from	5.00 to 7.00	"
Lime	33.10	"
Carbonic Acid	26.07	"

The lime and carbon, which are essential to plant growth, are obtained from oyster shells ground to powder, instead of being burnt. This combination not only dispenses with the necessity for dirt or sand to hold the chemicals, but is a most valuable assistant to their action.

We are also manufacturing ground lime, which we propose to put upon the market at a low price. aug30-6m

CARRIAGES.

Persons wanting new carriages will find it to their interest to give me a call, as I can furnish them at lowest rates with McLear & Kendall's best Wilmington made carriages. This firm makes as fine carriages as are made in the United States.

FRANK G. WRIGHT.

Easton, June 14, 1881.

Samaritan Nervine.

SAMARITAN NERVINE

Cures Epileptic Fits, Spasms, Convulsions, St. Vitus Dance, Vertigo, Hysterics, Insanity, Apoplexy, Paralysis, Rheumatism, Neuralgia, and all Nervous Diseases. This infallible remedy will positively eradicate every species of Nervous Derangement, and drive them away from whence they came, never to return again. It utterly destroys the germs of disease by neutralizing the hereditary taint or poison in the system, and thoroughly eradicates the disease, and utterly destroys the cause.

SAMARITAN NERVINE

Cures Female Weakness, General Debility, Leucorrhœa or Whites, Painful Menstruation, Ulceration of the Uterus, Internal Heat, Gravel, Inflammation of the Bladder, Irritability of the Bladder. For Wakefulness at Night, there is no better remedy. During the change of life no Female should be without it. It quiets the Nervous System and gives rest, comfort and nature's sweet sleep.

SAMARITAN NERVINE

Cures Alcoholism, Drunkenness and the habit of Opium Eating. These degrading habits are by far the worst evils that have ever befallen suffering humanity. Thousands die annually from these noxious drugs. The drunkard drinks liquor not because he likes it, but for the pleasure of drinking and treating his friends, little thinking that he is on his road to ruin. Like the Opium Eater, he first uses the drug in small quantities as a harmless antidote. The soothing influence of the drug takes strong hold upon its victim, leading him on to his own destruction. The habits of Opium Eating and Liquor Drinking are precisely what eating is to alimentiveness, as over-eating first inflames the stomach, which redoubles its cravings until it paralyzes both the stomach and appetite. So every drink of liquor or dose of opium, instead of satisfying, only adds to its fierce fires, until it consumes the vital force and itself. Like the gluttonous tapeworm, it cries "Give, give, give!" but never enough until its own rapacity devours itself. Samaritan Nervine gives instant relief in all such cases. It produces sleep, quiets the nerves, builds up the nervous system, and restores body and mind to a healthy condition.

SAMARITAN NERVINE

Cures Nervous Dyspepsia, Palpitation of the Heart, Asthma, Bronchitis, Scrofula, Syphilis, diseases of the Kidneys and all diseases of the urinary organs. Nervous debility, caused by the indiscretions of youth, permanently cured by the use of this invaluable remedy. To you, young, middle-aged and old men, who are covering your sufferings as with a mantle by silence, look up, you can be saved by timely efforts, and make ornaments to society, and jewels in the crown of your Maker, if you will. Do not keep this a secret longer, until it sapps your vitals, and destroys both body and soul. If you are thus afflicted, take Dr. RICHMOND'S Samaritan Nervine. It will restore your shattered nerves, arrest premature decay, impart tone and energy to the whole System.

SAMARITAN NERVINE

Cured my little girl of fits. She was also deaf and dumb, but it cured her. She can now talk and hear as well as anybody.

PETER ROSS, Springwater, Wis.

SAMARITAN NERVINE

Has been the means of curing my wife of rheumatism. J. B. FLETCHER, Fort Collins, Col.

SAMARITAN NERVINE

REMOVAL.

JOHN D. CHANCE, House and Sign Painter and Paper Hanger, notifies his friends and customers, and all wanting work done *cheap*, and in the *best manner*, in his line of business, that he has moved his PAINT SHOP next door to Tuthill's hardware store, near THE STAR office, and opposite the jail, where he is prepared to do, or contract to do, all jobs in his line, and respectfully asks a call from all wanting work done. jul27,80

BRICK AND TILE.

Salmon Brick, Arch Brick, Red Brick, Paving Brick, Well Brick, Pressed Brick, and

TILE

from 2 to 7 inches vent, at all prices, from $12 to $75 per thousand.

WE are now prepared to deliver bricks in any part of Talbot county, or anywhere on the water or or railroad out of the county, at 20 *per cent.* BELOW OLD PRICES, *for the cash.* We have a heavy stock on hand, of splendid quality, and are determined to command the trade of this section, if SUPERIOR BRICKS and LOW FIGURES will do it.

Our stock of Tile is very heavy, and we sell it very low for CASH; but are prepared to enter into arrangements with farmers, who may want to put in tile, and who may not have the cash, to give them SIX or NINE months credit. The tile ought to go in, and the spring land be made productive, and we are willing to help those who are short of money.

We invite a call from all those in want of either brick or Tile.

JOSEPH H. WHITE, Easton.
