Agricultural.

Double use of Farm Implements.

Henry Ives in the N. Y. Tribune, tells how he makes some of his agricultural implements do double duty as follows:

"It is almost frightful to think of the multiplication of farm implements in these days of great improvement in agricultural tools; there is not a branch of tillage but has some 'labor saving' especially designed for it. Many times, however, the farmer by exercise of little skill, can do different classes of work with such tools as he has, and there is no one that can be utilized in this way to better advantage than the common grain drill. For more than twenty years I have found it better for planting corn and beans in drill rows, and beets and carrots, also, where quantities are to be grown for stock, than any of the planters made expressly for these seeds, besides doing the work much more quickly and easily. I also sow any kind of grain broadcast with it, by taking off the teeth, when it will do better than any broadcast seeder in the market. I thus make it do the work of five different tools, and if the grass seed and fertilizer attachments are added, it will make the drill count good for seven uses, for each of which many farmers think a special implement necessary.

"For beets or carrots I take the quantity of seed required, and as these seeds germinate much surer and quicker by being previously soaked in warm water for one or two days, I, in this way, keep them moist until they are well swollen.

"Then after partially draining off, I mix them with about a bushel of fine middlings for each acre to be sown, rolling and robbing the seed into this until it is evenly mixed and will incorporated with the meal, so as to flow readily. Then use such teeth of the drill as give rows of proper distance apart (mine is an eight inch drill and I use every third tooth, making rows two feet apart,) taking off or tying up the others, and shutting off the feed to them in the hopper. Then by gauging the drill for sowing three bushels to the one bushel of this prepared seed and meal through the one-third of the teeth used, and plant about an acre an hour as well as a seed drill, and I think even better, besides doing the work more quickly and giving the chance of soaking the seed before planting."

The Clinging Ivy

It is a popular error to suppose that ivy growing on the walls of a house make it damp. The attachment of ivy to walls, so far from injuring them and causing dampness, is an advantage. If dry when planted, ivy will keep them so. If damp, as the plant overspreads their surface the dampness will disappear. Where dampness prevails ivy sucks out the moisture, and its thick foliage will prevent the access of rain to the structure; and thus it is not only a remover but a preventative, of dampness. The only danger attending the planting of ivy on buildings is where fissures occur in the walls, in which case the shoots and roots will enter, and, if left undisturbed, their growth will soon begin to tell upon the building; and will, by increase of growth, push against the side of the opening, thereby enlarging it, and eventually so weaken the wall as to cause it to fall. When the wall is sound there is no such danger, for the plant does not make fissures, although quick to discover them.

Cleaning Horses by Steam.

A WHIRLING BRUSH THAT DOES ITS WORK SWIFTLY AND HISSES HOSTLER FASHION.

A curious machine, which cleans horses by steam, is in daily use at the Third Avenue railroad stables, replacing the carrycomb. Its standard rate is one hundred horses in ten hours, but lately it cleaned one hundred and twenty-two between 7½ A. M., and 5:40 P. M., with an hour's intermission for dinner. To test it, extra speed was put on, and one horse was actually cleaned in one minute and fifteen seconds, and more thoroughly than by the ordinary process.

The horse is led under a bar, from which depends on each side of him arms with universal joints. Turning on the arms are brushes a foot in circumference. These are revolved by steam through the arms and cross bar at an ordinary rate of eight hundred revolutions a minute, which can be increased to one thousand. A man on each side takes hold of the arm close to the brush and applies the brush to the horse. The steam that whirls the brush makes a noise a good deal like the hissing of a hostler. The universal joints allow the arms and brushes to be moved in any direction.

Beginning at the head, the men move the brush along the sides, back and belly, and down the legs of the horse to the feet. A cloud of dust arises in the air, and in two minutes the horse looks like a different creature. The horses were a little nervous at first, but after a few seconds all appeared to be pleased with the operation.

At the Third Avenue Railroad stables it takes six men thirteen and a half hours to clean or half clean 128 horses by the ordinary process. If the steam brush is passed over the horse at a moderate speed once, each square inch is actually brushed more than if an ordinary brush had been passed over it four hundred times. The dust settles on the floor, accumulates rapidly, and is shoveled into a wheelbarrow and carted away.—*N. Y. Sun.*

The Handsomest in the Drove.

When he had finished with the climate, soil and productions of Idaho, one of the group asked:

"How about educational facilities?"

"That's the only thing we lack," replied the old man with a mournful sigh. "We've got schools enough, but we can't keep no teachers."

"What's the trouble?"

"Well, take my school, for instance—only two miles from the nearest house, eminently situated on the top of a hill and paying the highest salary. We can't keep a teacher over two weeks."

"Do they die?"

"Some do, though it's no place for dying. We had a young fellow from Ohio, and he met a grizzly and whistled for him. The grizzly cum. We had another, and a widder run him down and married him inside of a month. The third was lame, and the Injuns overtook him. Then we tried women folks. The first one got married the night she lit down there; I took the second about the middle of the third week, and the next one was abducted by a stage robber."

"Why don't you get the ugliest, homeliest woman you can find—some perfect old terror, like that lantern-jawed, razor-faced female over by the ticket window?"

"Why don't we? Stranger, you Eastern folks will never understand us pioneers of the world—never. That's my wife—the identical school teacher I married, and she was the handsomest one in the drove.—*Detroit Free Press.*"

THE GOLDEN SHEAF.

A Fertilizer specially adapted to the Soil of the Eastern Shore of Maryland.

$20 PER TON.

Sold at a very small profit on cost of production and clear of Agents' commissions.

THE COMPOSITION NO SECRET.

Made Without Sand or Dirt.

FOR SALE BY

THE OXFORD GUANO CO., Oxford, Md.

W. H. SETH, Secretary.

The attention of Farmers who desire to secure a good fertilizer at a reasonable price, is respectfully called to the above named brand.

The object of the manufacturers has been to originate a compound of plant foods directly adapted to the soil of the Eastern Shore of Maryland, and to fix the price therefor at the lowest possible figures; cutting off all agents fees of $5 and $6 per ton and adding to the actual cost only a very small profit. We think this fertilizer has as much intrinsic value as most of the high price manures, and feel confident that farmers who may think proper to use it will say that its effects upon the soil, it will equal them.

The analysis, as made by Prof G. A. Liebig, shows it to contain:—

Ammonia, from	1.75 to 1.25	per cent.
Phosphoric Lime, from	5.00 to 7.00	"
Lime	35.10	"
Carbonic Acid	26.07	"

The lime and carbon, which are essential to plant growth, are obtained from oyster shells ground to powder, instead of being burnt. This combination not only dispenses with the necessity for dirt or sand to hold the chemicals, but is a most valuable assistant to their action.

We are also manufacturing ground lime, which we propose to put upon the market at a low price.

Samaritan Nervine.

SAMARITAN NERVINE

SAMARITAN NERVINE

Cures Epileptic Fits, Spasms, Convulsions, St. Vitus Dance, Vertigo, Hysterics, Insanity, Apoplexy, Paralysis, Rheumatism, Neuralgia, and all Nervous Diseases. This infallible remedy will positively eradicate every species of Nervous Derangement, and drive them away from whence they came, never to return again. It utterly destroys the germs of disease by neutralizing the hereditary taint or poison in the system, and thoroughly eradicates the disease, and utterly destroys the cause.

SAMARITAN NERVINE

Cures Female Weakness, General Debility, Leucorrhœa or Whites, Painful Menstruation, Ulceration of the Uterus, Internal Heat, Gravel, Irritation of the Bladder, Irritability of the Bladder. For Wakefulness at Night, there is no better remedy. During the change of life no Female should be without it. It quiets the Nervous System and gives rest, comfort and nature's sweet sleep.

SAMARITAN NERVINE

Cures Alcoholism, Drunkenness and the habit of Opium Eating. These degrading habits are by far the worst evils that have ever befallen suffering humanity. Thousands die annually from these noxious drugs. The drunkard drinks liquor not because he likes it, but for the pleasure of drinking and treating his friends, little thinking that he is on his road to ruin. Like the Opium Eater, he first uses the drug in small quantities as a harmless antidote. The soothing influence of the drug takes strong hold upon its victim, leading him on to his own destruction. The habits of Opium Eating and Liquor Drinking are precisely what eating is to alimentiveness, as over-eating first inflames the stomach, which redoubles its cravings until it paralyzes both the stomach and appetite. So every drink of liquor or dose of opium, instead of satisfying, only adds to its fierce fires, until it consumes the vital force and then itself. Like the gluttonous tapeworm, it cries "Give, give, give!" but never enough until its own rapacity devours itself. Samaritan Nervine gives instant relief in all such cases. It produces sleep, quiets the nerves, builds up the nervous system, and restores body and mind to a healthy condition.

SAMARITAN NERVINE

Cures Nervous Dyspepsia, Palpitation of the Heart, Asthma, Bronchitis, Scrofula, Syphilis, diseases of the Kidneys and all diseases of the urinary organs. Nervous debility, caused by the indiscretions of youth, permanently cured by the use of this invaluable remedy. To you, young, middle-aged and old men, who are covering your sufferings as with a mantle by silence, look up, you can be saved by timely efforts, and make ornaments to society, and jewels in the crown of your Maker, if you will. Do not keep this a secret longer, until it taps your vitals, and destroys both body and soul. If you are thus afflicted, take DR. RICHMOND'S Samaritan Nervine. It will restore your shattered nerves, arrest premature decay, impart tone and energy to the whole System.

BRICK AND TILE.

Salmon Brick, Arch Brick, Red Brick, Paving Brick, Well Brick, Pressed Brick, and

TILE

from 2 to 7 inches vent, at all prices, from $12 to $75 per thousand.

WE are now prepared to deliver bricks in any part of Talbot county, or anywhere on the water or on railroad out of the county, at 20 *per cent.* BELOW OLD PRICES, *for the cash.* We have a heavy stock on hand, of splendid quality, and are determined to command the brick trade of this section. SUPERIOR BRICKS AND LOW FIGURES will do it.

Our stock of Tile is very heavy, and we sell it very low for cash; but are prepared to enter into arrangements with farmers, who may want to put in tile, and who may not have the cash, to give them SIX OR NINE months credit. The tile ought to go in, and the spring land be made productive, and we are willing to help those who are short of money.

We invite a call from all those in want of either brick or Tile.

JOSEPH H. WHITE, Easton.
