PERSONAL AND SOCIAL.

We are very glad to state that Mr. Herman Blackway, who has been in a Baltimore hospital for special treatment for appendicitis, is very much improved and will soon be at home.

Mr. James H. Brice, who has been suffering with a mild case of typhoid fever, is able to be out. Mr. E. D. Jones and little Miss Cora McWhorter are also reported very much improved.

Miss Edith Clark, of Baltimore, has been a guest of Mrs. Marion deK. Smith during the past week.

Mrs. Fritz Jette and children left town yesterday for Baltimore, where they will sail for Germany to join her husband, who left several weeks ago for the fatherland. Mrs. Jette went to Baltimore several days ago and secured her passports through the German Consul, and also arranged for her stateroom and tickets.

Mrs. J. T. Coleman, of Philadelphia, spent a part of the week with Mr. and Mrs. Clinton C. Jones.

Quite a number of base-ball enthusiasts motered to Cambridge on Tuesday to witness the game between the Cambridge team and the Philadelphia athletics.

Mr. Merritt Brown has accepted a lucrative position in the street car shops of Altoona, Pa.

Miss Louisa Urie was confined to her room last week by sickness.

Mr. Sappington and family, who have been spending the summer at their home here, returned to Baltimore Saturday.

Miss Anna Wood, who has been spending some time with her nephew, Mr. Milton Dill, in Baltimore, has returned to her home near Worton Point.

Mr. Neavitt Stafford, of Pennsgrove, N. J., spent the week-end with his parents, in Chestertown.

Miss Helen Urie, who has been spending several weeks in the Adirondack Mountains, returned home last week and left Monday for College in New York.

Miss Annie Duyer was quite sick several days last week.

Many Chestertown and Kent county boys who are working at Dupont's Powder Mills are "making good." Among them are: Messrs. Neavitt Stafford, Hamilton Duncan, Merrick Horn, Geo. Peacock, Walter Mann, Julian Jeter, Harry Hadaway.

Mr. Loice Rust returned Saturday from a week's visit to his brother, Mr. Harry Rust, in Philadelphia.

Mr. and Mrs. Bailey, the latter of whom was before marriage Miss Anna Bryan, spent the week-end at the Watts House.

Miss Mary Wallis, of Baltimore, is a guest of her sister, Mrs. William F. Malin.

Mr. Earl Gitt has returned home after a pleasant vacation at his home in Hanover, Pa.

Mr. Christ Alevizatos, who had a severe injury to his head and a broken arm several weeks ago in an auto accident, has developed blood poison in the arm that was broken.

Mr. Merritt Rasin, of Baltimore, spent several days last week a guest of his brother, Mr. A. Parks Rasin.

Mrs. A. S. Crawford has taken apartments at the home of Mr. Horace Reed.

Mr. Pearson, the well-known catcher of the W. C. base-ball team last year, is recovering from a severe case of typhoid fever at his home in New Jersey.

Mr. Louis Ford will tenant Mr. Skinner's Brice farm next year.

HICKS' FORECAST FOR OCTOBER.

Frosts on First of the Month Followed by Colder Weather.

A reactionary storm period is central on the 1st and 2nd, possibly extending to the 3rd and 4th. The earth's autumnal equinox is still in force, and the Mars period begins at the opening of October. As we pass from September into October, it will be natural for reactionary disturbances to be in transit from west to east. These disturbances will pass the central valleys, in the form of falling barometer, cloudiness and rain, on and touching the 1st and 2nd, followed by rising barometer, northerly winds and clearing, much colder weather. Frosts at night from about the 2nd to 4th.

The first regular storm period is central on the 7th, extending from the 5th to 10th, inclusive. This regular vulcan period is strongly reinforced by the moon on the equator on the 7th, and in conjunction with earth and sun on the 8th. The earth and the mars disturbances overlap the period, also the mercury disturbance adding its disturbing force to the whole combination. These storms will reach their culminating crisis on and next to the 7th, 8th and 9th, each successive day adding strength and extent to storm areas, as they pass the central regions of the country, and on to the Atlantic coast regions. Heavy October thunder storms will center on and touching the 7th. The temperature will remain high, the barometer low, and storms will continue in aggravated form over the 8th, and into the 9th, reaching eastern extremes about the 9th and 10th.

The second reactionary storm period is central on and touching the 13th and 14th. The mercury brace is central on the 18th, and its influence will dominate weather and storm conditions from about the 7th to the 18th, causing prolonged cloudiness and threatening weather from one period to another. But these conditions will rise into decided disturbances on and touching the 13th and 14th. Rains will have a tendency to early sleet, and marked cold will come with the rising barometer following.

The second regular storm period is central on the 18th, extending its influence from the 16th to the 31st inclusive. The regular vulcan period is strongly reinforced by the combined influences of mercury and mars. The moon passes over the celestial equator on the 20th, going from south to north declination This fact promises to temper the atmosphere with warmer, southerly winds, with October rains and thunder storms on and about the 20th.

The third reactionary storm period is central on the 23rd, 24th and 25th. The opposition of the Moon on the 22nd, will tend to bridge over the time from the preceding perid, bringing continued threatening weather into this reactionary period. At all events you may look to see quickened barometric changes, with responding cloudiness, precipitation and winds, on and touching the 23rd, 24th and 25th, followed promptly by rising barometer, spurts of early snow, and clearing, colder weather.

The third regular storm period is central on the 30th, extending from the 28th to November the 3rd. With the exception of the regular Vulcan influence, and the Mars period, there are no other causes for abnormal disturbances at this time. The Moon is at last quarter on the 30th, the central day of the period, three days southward from its extreme north declination. Falling barometer and October rains will appear in the west early in this period, and from about the 30th up to November the 3rd, these storms will progress daily to the eastward, with falling barometer and warn, threatening weather east of storms, and rising barometer, snow squalls and colder, clearing weather west of storm centers.

LAYS 287 EGGS IN 330 DAYS.

Delaware Hen, World's Champion, Was Hatched In Maryland.

A new world's record for egg-laying competitions was established on Sunday, when Lady Eglantine, a white leghorn, laid her two hundred and eighty-seventh egg in 330 days at the Delaware College agricultural experimental station, Newark, Delaware. Lady Eglantine is contesting in the fourth annual international contest under the auspices of a newspaper of Philadelphia. The best previous record was 286 eggs in 365 days, made last year by a Plymouth Rock hen.

The new champion is an American hen, bred from an English strain at the Egl ntine Farms, Greensboro, Md. Five hens of this strain have laid 1,138 eggs in 47 weeks.

The average hen lays about 70 eggs a year.

Cold Weather Signs Are Numerous.

Weatherwise people of this section are predicting a long, cold winter, giving as their reason for such belief the fact that the trees are beginning to turn fully three weeks ahead of the usual time; squirrels have hoarded up an unusual number of nuts; spots on the "wishbone" of the turkey indicate cold weather; large flocks of birds and wild geese are to be seen flying southward; the bountiful crops of the past summer, which nature has provided for just such weather conditions, and the intense heat of the past summer. All of these are supposed to infallibly indicate extreme cold weather next winter.

Peculiarity of English Language.—A conductor and a brakeman on a Montana railroad differ as to the proper pronunciation of the name Eurelia. Passengers are often startled at this station to hear the conductor yell: "You're a liar! You're a liar!" And then from the brakeman at the other end of the car: "You really are! You really are!"

Paint

Every gallon costs a painter's day's work.

Poor paint, more gallons; good paint, less gallons.

Every extra gallon adds to your job its price and the painter's day's work; not far from $5 a gallon.

There are a dozen good paints and hundreds of poor ones. Devoe is one of the dozen. The chances are; there isn't another in this town.

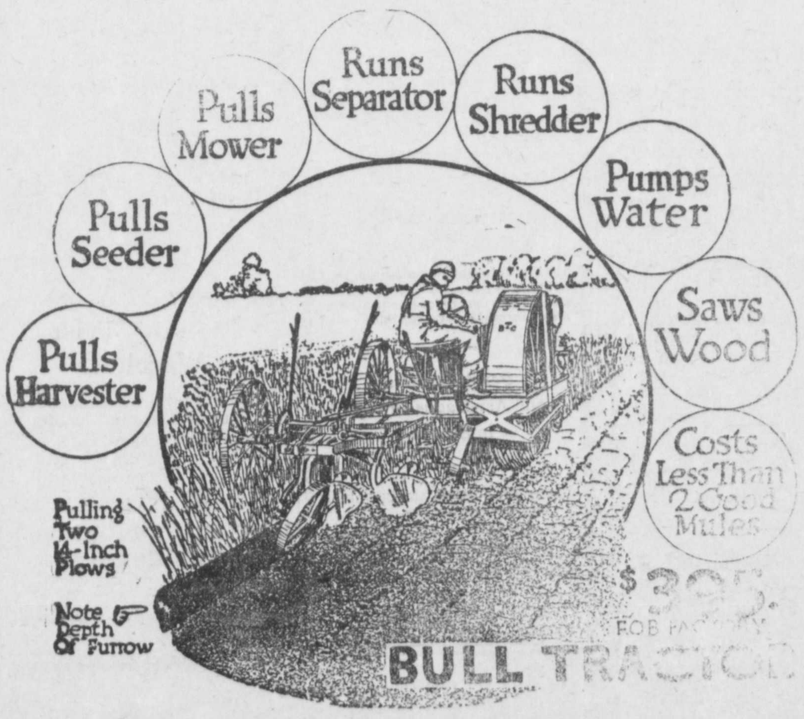
DEVOE

Chas. P. Jones, Millington, sells it.

Dr. H. C. HUGHES, Dentist

Local anaesthetics usedin extracting. Crown and Bridge Work. Special attention given to children's teeth.

OLD TRANSCRIPT BUILDING,
CHESTERTOWN, Maryland



AT LAST

Here is a powerful little machine which does the work of five horses—never gets tired—costs less for fuel than horse feed AND STOPS EATING WHEN IT STOPS WORKING.

Because it travels continuously and faster than horses, ONE MAN with the BULL TRACTOR can plow more than TWO MEN with two three-horse teams. Pulls your Plows, Seeders, Harvesters, Mowers, Drills, Disks and then does any belt work requiring up to twelve-horse power. Guaranteed as long as you own it. Saves you money every day you use it.

Write at once for Descriptive Illustrated Booklet and special offer to farmers.

A Public Demonstration will be given upon the arrival of a carload lot now in transit. Full particulars as to time and place announced later.

SPECIAL PRICE ON BOILER TUBES.

H. D. OREM,

Agent for Kent and Queen Annes Counties, CHESTERTOWN, MARYLAND.
