An Open Letter to the Farmers of Queen Anne's County . . .

You handle all your own business and there's a lot of detail in running a farm. You must direct it all yourself.

Naturally you want any help you can get. A telephone is an efficient assistant. It will save your time, your energy and your money. A telephone will make you money—far more than the few cents a day that it costs.

It will keep you in touch with markets—getting the best prices.

It will summon help in emergencies such as fire and illness.

It provides social contacts.

Farming is a business. Every business needs a telephone. The cost? Very low, only a few cents a day.

There's Long Life in This New ALL-STEEL McCormick-Deering Spreader
THE new McCormick-Deering No. 4-A *all-steel* spreader is convenient, low, and compact. It features a rust-resisting, non-warping box built of heavy-gauge galvanized steel containing copper. Capacity is 60 to 70 bushels. Eight roller bearings and Alemite lubrication, combined with perfect alignment in all parts, provide unusually light draft.
There are five spreading speeds. The manure is torn and shredded by a saw-tooth upper beater, a spike-tooth lower beater, and a wide-spread spiral before it is spread in an even layer over the soil. Special equipment available includes an endgate for hauling semi-liquid manure, a brake, and a lime-spreading attachment.
Come in and see this new spreader at our store . . . or phone us and we will come out and tell you all about it.
