The One-Horse Farmer

"What hope is there for a one-horse farmer if any?" asks a reader. It all depends on the kind of man he is, while having only one work animal is a handicap, there are worse. For instance, we'd rather risk making a paying crop with one mule on rich land than to try it on poor land with a dozen mules. Peas, beans and the clovers can be grown as well by the one-horse farmer as by the large, and crop rotations that will build up the land are just as easily possible with the small fellow. Get out of the one-horse class if you can, of course, but the mere fact that you are a one-horse farmer by no means shuts the door of hope. One of the most successful farmers we know, a man rated at $300,000, started thirty years ago with a single gray mare and an unlimited supply of spunk. Yes, the one-horse farmer has a chance, and a good one.
