The Most Pleasant Shopping Place In Baltimore -:- -:-

¶ "I don't know why it is," said an out-of-town customer, "but whenever I come to Baltimore to shop, I spend most of my time at Hochschild, Kohn & Co.'s. You have such nice merchandise, your salespeople are so polite and accommodating, and I feel so thoroughly at home in your store, that it is a real pleasure to shop there."

¶ We have been busy for nearly twenty years, devising new ways in which to make this store a pleasant place to shop—a place where customers would come again and again.

¶ Any reliable store can sell dependable merchandise. Any honest merchant will charge only a fair price for his wares. What, then, will make people come to one store in preference to others?

¶ Good Service.

¶ Hochschild, Kohn & Co.'s is the store of Good Service. Test it whenever you come to Baltimore to shop.

Hochschild, Kohn & Co.

Baltimore, Md.

PERSONAL AND SOCIAL.

Mr. Howard L. Dodd, accompanied by his uncle, Dr. Harry L. Dodd, went to the State Sanitorium at Sabillasville on Friday for the benefit of his health. Mr. Dodd has not been in good health for sometime and he believed the change and treatment at the sanitorium would be beneficial. His wife and interesting little girl are with her parents in Baltimore.

Miss Nettie Gooding, the faithful vice-principal of the Chestertown High School, is spending sometime in Baltimore.

Mr. Walter Perkins, of Philadelphia, and friend, Mr. Sharp, son of Judge Sharp, of Michigan, spent the week-end with relatives and friends here.

Prof. and Mrs. Mark Creasy will spend a part of the summer at their home in Bloomsburg, Pa. Prof. Owen C. Blades will spend the summer at his home in St. Michaels.

Mr. Leo Schaeffer, of Baltimore, spent Sunday with his wife and son at the home of her grandparents, Mr. and Mrs. James Brice.

Mrs. A. M. Bowers is visiting her son, Rev. Dr. J. S. Bowers, and family at their summer home, near New Freedom, Pa.

Miss Alice Crane, of Baltimore, has been visiting Mrs. C. L. Hynson during the past week.

Rev. Dr. and Mrs. D. L. Greenfield and son, Dr. Kent Roberts Greenfield, arrived in Chestertown on Saturday evening on the Christian Endeavor excursion. Dr. Greenfield stood the trip very well and is enjoying the rest and quiet at the home of Mrs. B. F. Fleming on Front street.

Mr. Jack Collins, of Centreville, who graduated at Washington and Lee University last week, and sister, Miss Mildred Collins, attended the commencement and dance on Wednesday.

Mr. and Mrs. Joseph A. Wickes are enjoying the breezes of Atlantic City. They are registered at the St. Charles.

Miss Beatrice Crew, of Wilmington, is a guest of Miss Lourine Smith.

Misses Mildred Hickman and Florence Walls, of Massey, will spend their vacation in Rock Hall, Baltimore and elsewhere.

Rev. J. L. Ward made the address at Rock Hall High School Commencement Thursday evening.

Mrs. Robert Huey is visiting friends in Baltimore, while Robert, Jr., is at his grandmother's in Delaware.

Mr. and Mrs. Wm. L. Marbury and daughter, Miss Silome, of Baltimore, have been visiting Mr. and Mrs. Hope H. Barroll during the week.

Mrs. William F. Malin was a guest of her sister in Ridgley on Saturday and Sunday.

Mr. and Mrs. Thomas W. Perkins and daughter moved into their new home on Water street last Saturday.

Mr. Jack Cannan, of Wilmington, was a guest Sunday of his mother and brothers and sister.

Miss Grace Newnam burned one of her hands at the High School Wednesday which caused her much unconvenience.

Misses Annie Duyer and Edna Kirby left this week for Johns Hopkins University to take a summer course.

Mr. Argus Robinson is attending Beacon's Business College, Wilmington.

Mr. and Mrs. Monzani, of Waterbury, Conn., witnessed the graduation exercises at Washington College on Wednesday.

Mr. Jas. L. Madden, of New York, Dr. Voss, of the University of Maryland, Newell Corddry, principal of Pocomoke High School, Harland Houston, of Seaford, Del., all alumni of the college attended the commencement exercises. They are all holding responsiable positions.

Mr. Stanley Porter, of Baltimore, was a guest of friends here for commencement.

Mr. Hooton Blackiston, of Cumberland, has been visiting his aunt, Miss Jane Blackiston, during the week.

Mr. J. Garfield Moore and family, of Laurel, Del., were Chestertown visitors on Wednesday. Mr. Moore called to see the editors of the TRANSCRIPT and a number of other friends while here.

Misses Louise and Ruth Anne Gray, of Greensboro, visited Mr. and Mrs. W. Frank Jarrell, during commencement.

Miss Martha Caldwell, of Galena, was a commencement guest of the Misses Clements on the avenue.

Mr. Frank Baxter, who has been quite ill for some time, is very little improved we regret to state.

Mr. Oscar Purnell and family, of Snow Hill, attended the Commencement exercises at Washington College on Wednesday. Mr. Purnell is a graduate of the college and his many friends and fellow alumni were glad to see him.

Miss Stevens, of Pocomoke City, is visiting Miss Cynthia Clendeniel near Kennedyville.

Mrs. Harry P. Wilson, of Baltimore, spent the week-end with her parents, Mr. and Mrs. Wm. B. Coleman. She returned on Monday accompanied by her little niece, Miss Anna Cook Coleman.

Miss Julia Cacy, of Millington, is visiting Mrs. Wm. M. Slay.

Miss Dykes, sister of Mr. Dykes, one of the graduates at the College, has been a commencement guest of Miss Carmeta Russell.

Miss Hallie Cooper is the guest of friends in Broad Neck.

PROTECT CATTLE FROM FLIES

EXPERIMENTS PROVE THE PRACTICAL VALUE OF SPRAYING.

INCREASE MILK FLOW

The Dairy Herd Can Be Rid of Flies At Little Cost.

College Park, June 14.—In connection with the campaign for increased production, farmers are finding the more efficient care and feeding of livestock already in their possession fully as important as increasing the number. One of the most mischievous pests afflicting livestock and reducing production is the fly. This is particularly true of milk production in warm weather when as is well known the flow of milk is seriously affected by the presence of biting flies. In connection with experiments conducted at the Maryland Agricultural Experiment Station in 1916, by E. N. Cory and R. H. Ruffner, the possibility of keeping dairy cattle free from flies by spraying with an emulsion of pine tar, creosote and water was demonstrated. In regard to spraying for flies, Mr. Cory says, "this material does not injure the hide or hair or the exposed mucous membranes of the cattle even with daily applications. It moreover, does not mat or gum the hair as it is readily washed off by rains.

The material did not affect the quality of butter nor impart any appreciable taint flavor or odor to the milk as coal tar preparations are reported to do.

Attendants must be careful not to directly affect the milk through milking when their hands are soiled with the emulsion. Its cost is approximately one-half cent per cow, per day, including all labor. The time of one man using a compressed air, automatic knapsack pump should not exceed 15 minutes per day for a herd of 20 cows. The sprayer should be fitted with a three-foot extension rod and an angle nozzle to facilitate the work.

The increase in milk fully warrants the use of the material. The average production of nine cows during the period from August 11-21 inclusive, when they were not sprayed was 16.59 lbs. During the subsequent period from August 22 to August 31st inclusive when the same cows were sprayed daily they produced 19.29 pounds. This was an average increase of 2.70 pounds per cow at a cost of a half a cent per cow.

Aside from any increased production with this practice, the elimination of possible disease carrying flies, justifies the work. The emulsion may be made in any quantity and will keep indefinitely. Dissolve 2 pounds of Caustic soda in 1 gallon of water; stir into it 2 gallons of cresote and add cold water to make up 100 gallons.

During the mixing, stir vigorously and stir the emulsion each time before using.

For further information write to the Maryland Agricultural Extension Service, College Park, or consult your County Demonstration Agent.

FEEDING THE PIG.

College Park, June 14.—No one is doing a more important work in helping the nation to "arm and farm" than the member of the boys' agricultural clubs of Maryland who is growing a pig. He is growing the most pork at the least cost and training himself to be an efficient producer of livestock. He is following out to the last little detail the instructions given him by his County Demonstration Agent regarding the production of high grade pork. He is putting into practice the method of feeding, recommended by S. S. Buckley, animal industry specialist of the Maryland Agricultural Extension Service. Dr. Buckley says:

"The pigs which are selected for meat purposes, and the pig which is selected for the profitable pig contest, should be fed to secure the greatest weight at the least cost. To do this it will be necessary to feed both for growth and fat. The object of getting vitality and strength of body and constitution does not enter into the work as it does with breeding animals.

"The more you act as servant to the pig, in bringing the feed to the pen, instead of requiring the pig to hustle for himself, the more gain in weight can be secured from the same amount of feed. Corn is the chief grain to depend on, but the same green feeds pastured or fed in the pens—peas, beans, clover, alfalfa, etc.—are desirable.

"The pigs must have exercise and be kept with enough energy to keep them with keen appetites.

"From weaning time until the pigs weight 75 lbs., feed 1 lb. each of tankage and middlings for each 8 lbs. of cornmeal. In addition give green feed and skim milk. Feed the grain three times a day, mixed with skim milk; if possible, all they will eat. Between feeding times let them have any of the green feeds which may be ready for feeding.

"When they weigh about 75 lbs. gradually change their grain feed to soaked whole corn or corn and middlings each 5 parts and tankage 1 part.

"Cowpeas and soy beans can be used to good advantage in the fattening process, but finish off with corn."

Select, test and treat your seed for increased production.

CASTORIA
For Infants and Children
In Use For Over 30 Years
Always bears the Signature of Chas. H. Fletcher

PARKER'S HAIR BALSAM
A toilet preparation of merit. Helps to eradicate dandruff.
For Restoring Color and Beauty to Gray or Faded Hair.
50c. and $1.00 at Druggists.

Royal Wheelbarrow Grass Seeders.

Single or double hopper. Positive chain feed that is very accurate. Will sow orchard grass and other light-weight seeds.

Prices from $7.50 to $9.00.

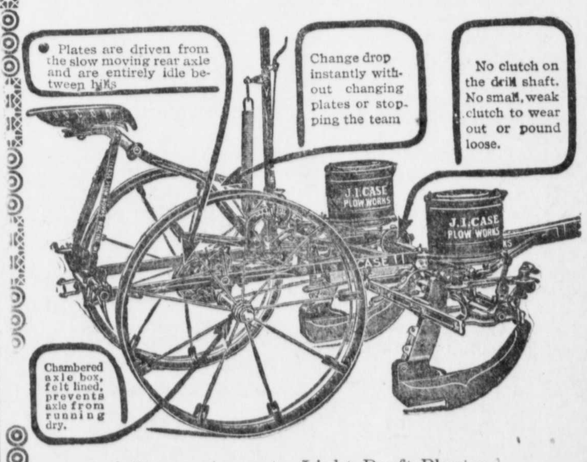
BLUEBELL CREAM SEPARATOR

The closest skimming separator on the market. So easy to turn that a child can operate it. All wearing parts are equipped with phosphor bronz bearings. The Bluebell is durable because it is built right.

Farmer Boy Sulky Plows!

Turns a square corner to either right or left.
Enters ground like a walking plow—point first.
Self leveling.
Large lever only, used to raise and lower the plow body.
Long beam with high throat.
The lightest draft sulky plow built.

J. I. CASE CORN PLANTER



Strong, Accurate, Light Draft Planter.

No clutch on drill shaft fast moving part. Direct power drive from rear axle the slowest moving part. Drive composed of five large pieces, as against 11 to 18 in the clutch of other planters. Will plant accurately butts, tips and middles. Has tilt over hoppers. Automatic reel, and many other distinctive features.

Come in to see this planter before you buy.
