HON. OMAR D. CROTHERS was nominated for the Senate in the Democratic primaries Tuesday in Cecil county and Hon. W. T. Warburton was nominated by the Republicans.

THE Democratic State Convention will be held at the Academy of Music, Baltimore, next Thursday, Sept. 20th. The delegates from Kent county are Messrs. Robert C. Morgan, John Medders and Robert J. McWhorter.

THE taking over of Kent Island by the Government as an experiment station struck a snag in Congress this week. Senator John Walter Smith and Congressman Price got busy in the two branches of Congress and it now looks as though the Government will abandon the idea of taking the island.

THE PRIMARIES.

Tuesday last was primary day in this State. On that day contests for nominations in the counties of the State and Baltimore city were settled by ballot. Necessarily there were many disappointments and some surprises among the defeated candidates, but as the primary is the only fair way to settle nominations the defeated candidates, to the man, should accept the result and do his best to elect his successful opponent. No candidate should enter a primary who cannot accept defeat in a graceful manner and support the man who defeats him.

There was no primary contest in Kent county this year, but it is just as much the duty of every Democrat in this county to work for the Democratic ticket as though there had been a hotly contested primary. The primaries are the place to settle all differences and the absence of a primary contest is no excuse, in our opinion, for any Democrat to cut a single Democratic nominee on the ticket. The election is just seven weeks from next Tuesday. It is time to be looking around and see if your political fences need mending.

FIRST QUOTA SEPT. 26TH.

61 Names Certified By District Board —Another Call Likely in Kent—

To date seventy-eight from Kent county have been found eligible for military service by the District Board. The local Exemption Board on Monday received the following list of sixteen, whose exemptions were rejected by the District Board and who were found eligible for service:

126 Melvin Anderson, Chestertown
600 John Lee Moore, Chestertown
1099 John R Kennedy, Kennedyville R2
1114 Walter S Hickman, Massey
574 George R Hudson, Chestertown
792 Clarence C Parsons, Worton

889 Jervis Hynson, Worton
906 Clarence R Nicholson, Betterton
1010 Thomas Moore, Galena
919 William H Johnson, Fairlee

Kent will be compelled to furnish 103 men for the first draft. The new order excusing married men from service whose wives depended upon them for support, and others with dependants, necessitated, of course, the release of those who came within the rules of that order. This means that more men will be necessary to make up Kent's quota. As a consequence, the following list has been called for examination by the local board:

49 Chas Carlton Brown, Chestertown
8 Wm. F Blyman, Chestertown
1160 Adam A Schaffner, Kennedyville

TYPHOID FEVER
How to Prevent Its Spread
ISSUED BY THE
State Board of Health of Maryland.

When TYPHOID FEVER appears in a family the source of the infection must be looked for in drinking water or food taken within the preceeding twenty days. The patient may not have been infected at home, but if a second case occurs this second infection will in all probability be traceable to the first patient. In a majority of instances the drinking water has become infected. Your first business, therefore, is to find out the quality of your drinking water.

You can do this by asking your local health officer for instructions about shipping us samples of your drinking water. *The daily supply of drinking water should be boiled.*

The infectious material of typhoid fever is produced in but one way. It grows always in the bowels and sometimes in the bladder. It therefore, escapes from the sick person in the stools and urine. If we kill the germs in the stools and urine as soon as they are passed, there can be no spread of typhoid fever. These discharges should, therefore, be disinfected as soon as possible. You will need a large quantity of a good disinfecting solution.

RECEIPT FOR A GOOD DISINFECTANT.

To four gallons of water add enough salt to make a strong brine. Put this in a five gallon demijohn or jug and add a quart of crude carbolic acid. Shake it up well and you have a good disinfectant for stools and urine.

The crude carbolic acid, known as U. S. P. 90 per cent., is very good, and a quart will cost about 50 cents. There is a cheaper grade, known as a 36 per cent. acid, which is nearly as effective.

About a pint of this solution should be put in the chamber or bed pan before it is used, so that the discharges will begin to be disinfected as soon as they leave the body. There must always be at least as much of the disinfecting solution as there is of the discharge so that more of the disinfecting solution may need to be added after the discharges are passed. If the stools are thin and watery their disinfection will be accomplished in half an hour or so, but if the stools are thick or formed very much more time will be required. On that account it is best to have a covered jar or bucket into which the bed pan can be emptied, and to empty this jar only once in 24 hours. If the discharges cannot be finally thrown into a sewer they should be buried in the soil at a convenient spot where there is no chance of their fouling a water supply. The discharge should never be thrown on the surface of the ground, for you will hardly be successful in killing all the typhoid bacilli, and you must not place them where those not killed by the acid may be blown about in the dust or carried away by flies to infect other people.

In spite of every precaution, those who wait on the sick person will get their hands infected, and it is therefore, necessary to wash the hands every time one does any service about the patient's bed or body. Whoever waits on the patient must not prepare food or drink for other persons in the house, or if it is impossible to mind this rule one must most carefully and thoroughly cleanse the hands before performing any house-hold duty outside the sick room. Good scrubbing with soap, water and a brush, and then rinsing well in fresh water will suffice for cleansing the hands.

If anyone else in the house falls sick within two weeks after the first patient, the probability is that the infection was lodged before the precautions were taken in regard to drinking water and the disposal of the discharges. But if the second case occurs more than 20 days after the first case that will signify that we have made a mistake somewhere in our precautions.

Toulson's Pharmacy.
THE REAL STANDARD.

In buying Drugs the really essential feature is PURITY.

It is impossible to get cheap Drugs and have them pure. The only advantage we get is buying in quantities. We buy the best and sell them close—the result is a lower cost to you, but we never slight the worth of the Drugs we sell and we are exact on the PRESCRIPTIONS we fill.

Supplies for home, bath, nursery and sick room are found here in great profusion.
