WORK OF REASSESSING IN KENT CO. TO BEGIN SOON

Tax On Personal Property To Be Readjusted In Short Time

The work of reassessing the personal property of Kent County will begin in a short time.

As a preliminary to the big job of reassessing the personal property of the state (Baltimore city excepted) a meeting was called recently by the State Tax Commission at their office in Baltimore. The Commissioners from every county in the State were present except from Dorchester and Worcester, and the whole matter as to methods and means were considered, when finally the State Tax Commission took matters in their own hands and against the protest of the County Commissioners, determined the work should be done under the mailing out schedule system through the office of the County Commissioners.

Acting under these instructions the Kent County Commissioners will shortly mail to every taxpayer a blank schedule, which is to be filled out, sworn to and returned to the board of County Commissioners. If the Commissioners consider the valuations returned by the property owners too low, they must notify the owner and give an opportunity to the owner to be heard before the assessment is made. Notices in these cases are to be mailed and must give five clear days notice to the owners of the property to be assessed.

If there is no response, they are to make a valuation of his personal property established upon the best information obtainable and sufficiently adequate to embrace all of his personal property, and in this event send a notice as directed, and enter the assessment as therein directed or have a personal investigation made by the Supervisor of Assessments, or a Special Assessor, and make a valuation upon the report of the Supervisor or Special Assessor, or summon the owner of personal property to appear before them on a certain day, administer the oath to him and interrogate him in regard to his ownership of personal property. From the testimony and all other available information make a valuation. No notice is required if the County Commissioners determine upon an assessment while the owner is present.

Farming implemen of farmers are exempt from taxati $300 and that amo ed from the asses alue thereof.

The Tax Commission has adopted the following general rule for the assessment of automobiles, motor vehicles, etc.:

First year in 66 2-3 per cent of catalogue pri in use, 50 per cent third year in use gue price; fo nt of catalo year a Coun rule cep sessi sessi share tions. Ea

ing three commissioners shall receive five dollars per day for actual services rendered in connection with the assessment of personal property in their county, and the county commissioners of counties having more than three commissioners shall each receive three dollars per day for actual services rendered in the assessment of such property.

Naval Recruits Wanted

Maryland, having "made good" in its recent quotas of firemen and mess attendants for the Navy, is now engaged in a campaign for 106 apprentice seamen by February 22.

The Christmas holidays caused a decided decrease in enlistments, but the recruiting authorities for the Maryland District are determined to make up the deficiency after the New Year's holidays.

A rumor that men of the draft age cannot enlist in the Navy after Dec. 15 has also contributed to the decrease in enlistments. Men of the draft age still have a chance to enlist in the Navy, if they can furnish the Recruiting Officer with a certificate from their local board, to the effect that their class and order number is so low that they are not within the current quota of their local board. Blanks for this certification can be obtained from the Recruiting Authorities.

War Diets Given In Booklet

A series of four-page booklets, expressing the country's expert thought on food conservation, has been prepared by the Department of Agriculture and the food administration, with the aid of State representatives.

The leaflets, which are being distributed, contain war diets for children and adults, and are intended to supplement the Department's publications on food and other home problems.

With the funds at its disposal the Department will be able to supply the booklets only to leaders and active workers in the food conservation movement. Efforts will be made, however, to interest women's clubs, churches, civic organizations, merchants, owners of factories and other emplo s to purchase the leaflets in large ers at actual cost for distribution among members, employes and friends.

The Boss Railroader

Now that William Gibbs McAdoo has been made the boss railroader of the United States by President Wilson, a brief sketch of this gentleman will be interesting to our readers.

Born near Marietta, Ga., Oct. 31, 1863.

Admitted to bar 1885 and practiced at Chattanooga.

Completed first Hudson River tunnell March 8, 1904, and fourth March 1, 1909.
