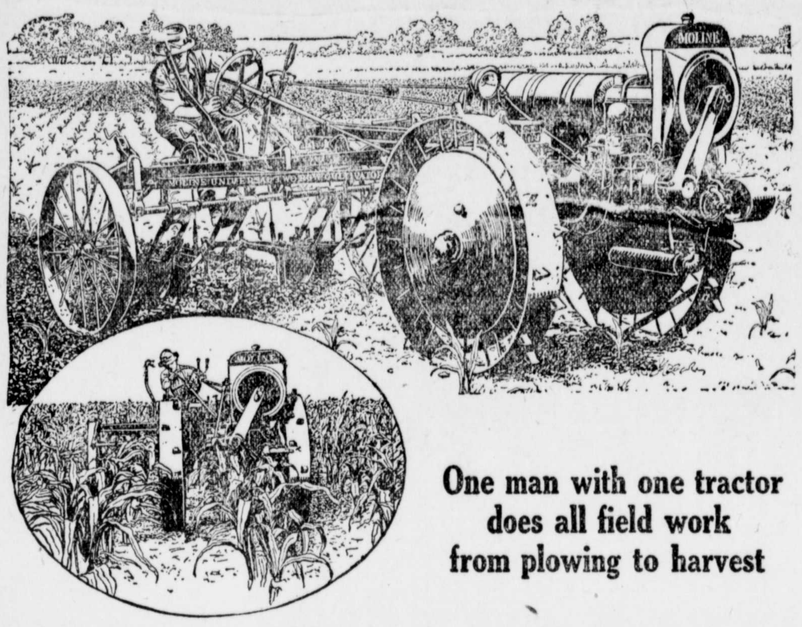
—Queen Anne's county will have only five vacancies to fill in the public schools next year, as only that number have sent in their resignations.

—The Matilda Brinsfield heirs have sold to George H. Brinsfield, the home farm, near Crumpton, at private sale.

—The United Life and Accident Insurance Company's bulletin for June shows their local representative, Mr. R. Goldey Warren, to be No. 2 for the amount of business written for the first five months of 1920 in the entire country. This is indeed a fine showing for our friend, Mr. Warren.

—William Pepper Constable, Esq., for several years president of the Board of Liquor License Commissioners of Baltilore, has resigned from the board on the ground that there is nothing for him to do. Other members have also forwarded their resignations.

The MOLINE
Tractor is Universal



One man with one tractor does all field work from plowing to harvest

Thirty-four per cent of farming efficiency is due to the skill with which the implements are used. This means watching the work carefully—having it under your control—sitting where you can see it all.

"Beats anything for cultivation I ever saw" is the answer of hundreds of Moline-Universal Tractor owners who are successfully cultivating an increased acreage of corn with the Moline-Universal Tractor and two-row Cultivator.

Its high clearance of 29½ inches is sufficient to cultivate the last time through. Its electric governor permits a steady, slow or fast speed as desired for the first time through.

You look at one row only, and steer by that row. The cultivator and tractor do the rest, without injury to the corn plants or without tearing them up.

Here is what one man and a Moline-Universal Tractor can do in a ten hour day:—

Plow 7 to 9 acres
Disc 27 acres with a 7' Tandem Disc Harrow
Disc 38 acres with a 10' Disc Harrow
Harrow 76 acres with a 20' Peg Tooth Harrow
Cultivate from 13 to 20 acres with a two-row Cultivator
Drill 35 acres with a 10' Grain Drill
Harvest 40 acres with a 10' Grain Binder
Harvest 10 acres with a Corn Binder
Mow 25 acres with a 8' Mower
Rake 40 acres with a 12' Rake

We can prove to you by cold, hard facts or figures that the Moline-Universal Tractor is the most profitable for you of any on the market.

A demonstration on your own soil cheerfully arranged on request. Immediate deliveries and guaranteed service of a practical kind.

If desired you can use the "drag behind" or horse drawn implements you now have with the Moline Universal Tractor the same as with other types of tractors.

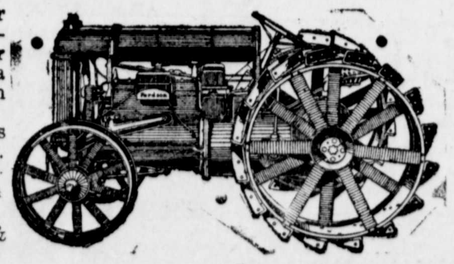
Fordson
TRADE MARK

Farm Tractor

More than 100,000 Fordson Tractors have been sold to farmers in the United States. They are helping those farmers do more and better work in less time and at less cost. North, East, South, West—everywhere the Fordson has proven itself a money-maker and a real necessity to the farmer. Besides it solves the labor problem.

These practical farmers have affirmed the economy—the exceptionally low fuel and operating cost—of the Fordson; its time and labor-saving qualities and its ability to increase production. The Fordson was built to be the most economical tractor. It is compact and devoid of excessive weight. And it is built of same staong Vanadium steel as the Ford car.

Winter or bad weather does not hinder the Fordson's usefulness. Day or night—twenty-four hours a day if you choose—you can utilize the Fordson.



Only so many Fordson's are allotted this territory. Orders are being filled in rotation. Let us have your now.

Loud, a Missionary from India, who is home for a visit and rest. After Miss Loud had finished her address, Mr. Stockton Startt (the presient of our society) said that in 1917 we supported a preacher in India and as our society was larger now than it was then he did not see why we could not at least support a Bible Woman. His suggestion was acted upon immediately and enough money was donated to support one for three years. The money does not go to Miss Loud, but to our own missionary in India.
