THE TRANSCRIPT

Entered at the Postoffice at Chestertown, Md., as Second Class Matter.

THE signing of the Woman's Suffrage Proclamation by Secretary of State Bainbridge Colby Thursday gives to 27,000,000 women of the United States the right of franchise. Many of this number will exercise this right in an intelligent way, while many, like the men, will follow the lead of others. Now that the responsibility is upon them, they must assume it. It is to be hoped that they can and will improve public conditions.

THE CANNER AND THE TOMATO GROWER

Several meetings of tomato growing farmers of Kent County have been held the past week in an effort to solve the serious situation between the growers and the canners. The matter has now reached a concrete period, and unless there can be some compromise or get-together bases between the grower and the canner the loss to this county will amount to hundreds of thousands of dollars.

The situation is serious, with both the grower and the canner. A large amount of money is involved and it will require good sound business judgment to prevent serious loss to all parties interested. The farmer, or tomato grower, has been for years made the "goat" by the canner. The canner in the spring makes a contract with the farmer to grow tomatoes at a stipulated price per basket or per ton. If the market price is higher than the contract price the canner holds the grower strictly to his contract. If the market price for tomatoes is less than the contract price, then the farmer is harrassed and annoyed by the canner in many ways—either a shortage of baskets, a complaint that the tomatoes are not ripe enough or are too ripe or too small, etc., etc. The canner's contract, as a rule, is made with a clause to protect the canner, but not fair to the grower.

Litigation has begun in some cases between the growers and the canners and will have to be settled by the courts. Until the courts settle the question none of the parties know where they stand. Unless a better understanding can be had between the canner and the grower, it would be far better to abandon the industry and the farmer turn his attention to the growing of other crops. Some of the canners are, however, carrying out their contracts and are taking the tomatoes according to their agreement, and have the full confidence and respect of our citizens.

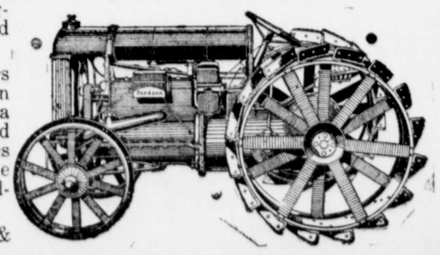
Fordson
TRADE MARK

Farm Tractor

The Fordson cuts the cost of preparing land almost to half of what it cost with horses. But even more important is the fact that the fordson saves from thirty to fifty per cent of the farmer's time. And time saved—getting fields in shape to plant in the proper season; getting things done when they should be done—means money to the farmer. Besides it solves the labor problem.

As ever, the machine-way is proving more efficent, faster, easier than the old hand way. In the factory, the machine increases production, saves labor—produces more at less cost. And that is what the Fordson does on the farm. The Fordson way is the machine way of farming. Besides it solves the labor problem.

The Fordson's first cost is the lowest in the market; and the after or operating cost is lowest. It is a compact easily handled tractor, backed by the greatest tractor service organization in the United States.



We are Fordson dealers not only do we sell Fordson Tractors, but we carry a stock of Fordson parts and employ Fordson mechanics to help the farmers get the best results from the Fordson.
