THE CHESTERTOWN HIGH SCHOOL FOOT-BALL TEAM

The coach of the High school foot ball team wishes to make an appeal to the people of Chestertown to take an interest in the boys, and come out and see them play. Their first opponent was with the High school from St. Michaels, Talbot county, on Friday afternoon, October 22, at 3.45 p. m. on the Washington College Athletic field. Admission to all games will be 25 cents. Other contests scheduled are with the Centreville, Cambridge, and Easton High schools, of which the Centreville game will be played here, on November 12. If other games are arranged later due notice will be given.

The team this year will have many handicaps. With but three exceptions, all the players are not only very light but new to the game. They have had as yet very little practice, and they have very little suitable equipment, such as padded suits, shoes, helmets, &c. The boys are working hard to over-come the handicaps of size, experience, and practice. They want to make the best showing possible for the honor of their school and their town. If the good people of Chestertown will come out and cheer them, buy tickets at the games, and give the support and encouragement that, for instance, the people of Centreville give their High school, the boys will not only be inspired to do credit to the name of Chestertown, but will be able to have better equipment for their protection while playing. At present the team depends for suits when they play on the generosity of the coach and authorities of Washington College This should not be. It is an imposition on the college and unworthy of the importance of the High school, which should be able to properly equip its own players. But suits are expensive, and the school has little money. The only way these things can be obtained is for sufficient people to buy tickets to the games to insure a considerable margin over expenses.

For the benefit of parents and some older people who do not understand, or perhaps, altogether approve foot ball, it might be well here to state some of the advantages that are the portion of the player. To the timid or uniniated it frequently appears as they were merely having a rough and tumble fight. Such is far from being the case. One of the chief qualities that foot ball instille is self control. The player must not only respect himself, and properly take care of himself but he must learn, under strong provocation, to keep his temper well in hand. No matter how proficient he may be in other respects, if he loses control of himself and starts fighting with any of the opposite side, he is, quickly disqualified and put off the field. The rules of foot ball are very strict. Any rough, unfair, or unsportmanlike conduct immediately disqualifies the guilty party and penalizes the side. Thus not only is brutality not tolerated but the spirit of justice, fairplay, and honor strongly emphassized. In addition, the player must work for the good of his team and not for his own glory. He is taught to let others get the credit, if only the interests of his team are advanced. He must at all times be alert, energetic, aggressive, and courageous. A weak, irresolute, cowardly boy or man can never, unless he overcomes these defects, become even a second rate foot ball player. In short, most of the finest qualities of manhood are directly fostered by this game. Rough of course it is rough. Boys not only like rough play, but they must have rough play, and if their energies and animal spirits are not given proper outlet under adequate supervision they are likely to find an outlet for themselves in ways that will do them far more harm, physically, mentally and morally, than foot ball ever could. Dangerous? Yes, the element of danger cannot be entirely elminated. But the danger has been greatly exaggerat- by those who read the accounts of very exceptional injuries, or take too seriously the rough appearance of the game. It is not nearly so dangerous as hunting, for instance, of driving an automobile, or evenriding in one. With proper attention to rules, coaching, equipment, and training some minor bruises, bumps, or even sprains may and do occur; but taking all things into consideration serious injury is comparitively rare. And against the element of risk should be placed the ideals, training and manly attributes developed. It is significant that during the late war army heads encouraged the men in training to play foot ball for they found that those who were proficient in that made the very best soldiers and officers.

In conclusion, the responsibility should be assumed by the parent, whether his boy plays or is forbidden He would do well to try to understand the game and weigh its claims of advantages with what he considers its dangers. But if the boy is in good health sound of heart and lung, properly equipped, and under proper coaching most men who have carefully studied the question agree that the parent may permit him to play without undue worry over the usual bruises and minor hurts, which after all are good training for the rough game of life, in which man must learn to take many hard knocks bravely and cheerfully, keep his temper, observe the rules, work for the benefit of the many instead of for himself only, and keep on struggling with every faculty he possesses, until the Great Refree sounds the final whistle and gives the reward to those who, whether winning or losing, have "played the game."

BETTERTON ITEMS

Communion services will be held tomorrow afternoon at the M. E. Church. The probationers will also be received in full membership at this service.

Bicycling has become quit a sport among the boys and girls. This is a splendid sport but the children should be very careful especially when riding on the sidewalks. Last week Mr. Wm. H. Kelley was knocked down by being run into by a young girl on a wheel and little Floyd Crownhart was also run over and hurt quite badly by two boys riding bicycles.

Mrs. L. M. Owens and Mrs. L. A. Hickman have both been quite sick the past week.

Mr. Howard Owens, Henry Price, Arthur Brice and Harvey Moore took the first degree in Masonry at Chestertown this week.

Miss Sarah Taylor, of Baltimore, and Miss Elsie Owens, of Philadelphia, spent the week end at their homes here.

Mr. and Mrs. Walter Brice and daughter, of Philadelphia, spent the past few days of this week with Mrs. G. W. Moore.

Mr. and Mrs. Beauregard Lewis have started their new house on Bayside, adjoining the Methodist church.

Mrs. Florence Jester is visiting Mr. and Mrs. Harry Owens.

Mrs. M. V. Turner and sons spent the past week with friends in Baltimore.

Mr. and Mrs. Charles Gooding and daughter are visiting Capt. and Mrs. Horace Brice.

USE SLOAN'S TO WARD OFF PAIN

You can just tell by its healthy, stimulating odor, that it is going to do you good

"IF I only had some Sloan's Liniment!" How often you've said that! And then when the rheumatic twinge subsided—after hours of suffering—you forgot it!

Don't do it again—get a bottle *today* and *keep it handy* for possible use tonight! A sudden attack may come on—sciatica, lumbago, sore muscles, backache, stiff joints, neuralgia, the pains and aches resulting from exposure. You'll soon find warmth and relief in Sloan's, the liniment that *penetrates without rubbing*. Clean, economical. Three sizes—35c, 70c, $1.40

The MOLINE
Tractor is Universal

Free From Side Draft—Perfect Control

One man with one tractor does all field work from plowing to harvest

You have brought your corn from plowing through cultivating, and now it is ready for binding.

Maybe it's down and tangled. But, even if not, it is a real job to bind it with a horse drawn binder.

Side draft, guiding the team and operating the binder often make you wish you had four hands, as well as eyes in the back of your head.

The Moline-Universal Tractor and Corn Binder Hitch eliminates side draft. Control is perfect. You set it straight and the tractor front wheels that carry 98% of the weight stay straight, with just the slightest motion of the steering wheel right in your lap.

Here's what one man and a Moline-Universal Tractor can do in a ten-hour day:—

Plow 7 to 9 acres
Disc 27 acres with a 7' Tandem Disc Harrow
Disc 38 acres with a 10' Disc Harrow
Harrow 76 acres with a 20' Peg Tooth Harrow
Cultivate from 13 to 20 acres with a two-row Cultivator
Drill 35 acres with a 10' Grain Drill
Harvest 40 acres with a 10' Grain Binder
Harvest 10 acres with a Corn Binder
Mow 25 acres with a 8' Mower
Rake 40 acres with a 12' Rake

Immediate deliveries—a satisfactory stock of repair parts always on hand—prompt service when you need it.

You will thank us when your binder work is over.

If desired you can use the "drag behind" or horse drawn implements you now have with the Moline-Universal the same as with other types of tractors.
