Failed to Materialize.—The meeting of the republicans of No's 11 and 12 called for Wednesday night to further some new plan of district representation failed to materialize. The hall was opened at 8 o'clock, but up to 8:30, when the JOURNAL representative took his departure, there were not present at any time more than ten or fifteen persons. It was subsequently ascertained that those present entered a *non pros.* and went home.

Baltimore Female College.—This institution was incorporated in 1849, with power to confer degrees, and was endowed by the State of Maryland in 1860. The endowment establishes a free scholarship in the College for each county in the State, upon which one pupil is entitled to instruction, without charge, in all the branches taught in the College, with the use of text books. Students can board with friends, or, at reduced rates, in the College with the President and his family. The scholarships are filled by the Orphans' Court of the respective counties. Application for a scholarship may be made to the Court directly or to Dr. N. iC. Brooks, President of the institution. The College has graduated 304 pupils, and trained and sent forth 200 teachers who are filling responsible positions. There will be a number of scholarships vacant, June 1st, for which early application should be made.

Publications.—The May number of *Babyhood* overflows with good things for young mothers. TLe opening article on "The Diet of Nursing Mothers," by Edward L. Partridge, M. D., Obstetric Surgeon to the New York Maternity Hospital, is peculiarly interesting, describing how milk is produced and how the flow of milk is stimulated, showing the advantages of lactation to the mother, dispelling some groundless objections to certain articles of food, and emphasizing the value of others to both mother and child. Dr. W. B. Canfield discusses "The Development of Speech in Infants," from the first utterances till the formation of the child's vocabulary, with its defects and peculiarities. There are many interesting hints to be found in "What Not to Name the Baby." Dr. Yale treats a much debated question in "Eight Months and Other Premature Children," showing how prematurely-born children may often be saved by care and attention, In the "Nursery Observations" are rehearsed the peculiarities of some babies, and in "Nursery Problems" much valuable advice is given to mothers upon such subjects as "Sore Nipples," "Cleft Palate," "Suppurating Ear," "Decaying Teeth, "Weak Limbs," etc. In the "Mothers' Parliament" are discussed "A Baby's Sea Voyage;" "An Original Way of Learning to Spell;" "Teaching the Use of the Nursery Chair;" "Granum Porridge;" "Finance for Babies;" and "Thumb-Sucking." 15 cents a number; $1.50 a year. *Babyhood* Publishing Co., 5 Beekman St., New York.

Every lady will be interested in the June number of Demorest's *Monthly*, as it is an exceedingly interesting one. The steel plate, "The Fate of Nydia," is novel and very beautiful, both in execution and design, and the other illustrations are also very fine. The fashion department of this excellent publication is so well edited as to lead many to suppose that it is a fashion magazine, but this is a great mistake; for in reality it is a literary magazine of the highest order, with all its departments so ably conducted that every member of the family watches with interest for its arrival. We know of no magazine better deserving to be called a family magazine, and it ought to be found in every refined household. That the publisher is a prohibitionist, tells where it stands on the temperance question. Published by W. Jennings Demorest, 15 East 14th St., New York.
