CHESTERTOWN WORTON KENNEDYVILLE

OUR POULTRY DEPARTMENT

A FEW HINTS FOR THE MONTH OF JUNE—OTHER NOTES THAT WILL HELP OUR READERS WITH THEIR POULTRY PROBLEMS

BY POLK T. BRAMBLE

It is not the early hatched, slow maturing bird that brings you the coveted "Blue Ribbon," plus its attending profit and pleasure at the big mid-winter shows; but the late hatched bird that starts off under all favorable conditions, that grows rapidly without interruption, and that finishes with a grand rush into the home stretch, nosing out his less fortunate competitors. Just when should show birds be hatched, and how should they be raised? These questions have always bothered fanciers.

To be at their best, Plymouth Rocks, both cockerels and pullets, should be about seven months old. Leghorn males require about the same length of time. At first thought, this may seem a bit peculiar, as a Leghorn male will attain maximum weight quicker than a Plymouth Nock will: but the Leghorn male has to grow more tail furnishings, which add greatly to the beauty of the bird, and for this reason it requires about seven months to bring these feathers to their best form. Leghorn females ought to be about six months old. Jersey Black Giants, Brahmas and other Asiatics, should be about eight months old, because in these breeds extra weight is an important factor. The time allowed may vary slightly, however, according to local conditions.

Many people think that June is entirely too late to start chicks for the big events; while as a matter of fact, that is just the month that the Master Breeders get in their best work. If the chicks are already hatched, or can be secured soon from some of the leading fanciers, there is plenty of time yet. If you are depending on hatching eggs, it is getting a bit late, for anything except the January shows.

In culling it's just as important to know the history of the flock as it is to know culling characteristics. The best flock of laying hens can be thrown into an early molt by improper management.

If you are culling your own flock and are familiar with its history, then the job is relatively easy. If your birds have been will fed and properly cared for, the hens that quit laying now will be the naturally inferior hens. You can tell them by the shriveled comb, the yellow pigment in the skin—if they are yellow skin breeds such as Leghorns, Anconas, Rocks, etc.&the dry vent and the closed up condition of the pelvic bones. Such hens will usually have a few pin feathers on the neck and an examination of the wings will show that they are molting wing feathers.

Sometimes lice and mites are the culprits that cause flocks to molt early If you haven't gone over the flock for lice, make the first culling a combination job. Cull the hens first and then apply a commercial louse powder or dip them in sodium fluoride.

A sodium fluoride dip is made by disolving one ounce of sodium fluoride in a gallon of luke warm water. Use a nine or ten gallon earthen jar, because this chemical reacts with metal. Dip the hens in the solution and work up well in the feathers.

Lice live on the hens and mites live in the filth, among the roosts, nests and crevices. Don't forget that.

Mites gnaw and lice suck. Lice must be fed a stomach poison to kill them, but mites offer another problem. They get their food from the blood consequently they ust be attacked through the body pores. Strong chemicals dissolve the body and suffocate them.

A good coal tar disinfectant is the best remedy for mites. Paint the roosts and nests and your troubles will be over for six months to a year.

Where liquid milk is not available on the farm, a number of poultrymen have adopted the practice of using dried milk products in the poultry mash.

When dried buttermilk is used, 10 per cent by weight is added to the home mixed mash mixture. In other words, ten pounds of dried buttermilk are added to every 100 pounds of the mash mixture.

The manufacturers of this product recommend that five per cent. be added also to commercial mashes.

Dried skim milk is another product which has come into use in poultry feeding. Manufacturers of dried skim milk point out that one pound of dried skim milk when mixed with five quarts of water equals liquid skim milk. This is an important fact to bear in mind, when this product is used.

In the ration or laying hens dried milk products may be used to replace 50 per cent of the meat scraps or tankage. Experiments show that a ration containing two sources of animal protein is containing but one source.

There are several more cents in every dozen eggs, if you market them properly. Marketing is one of the biggest problems that the poultryman

(Continued on page seven)

RAILROAD CROSSING FACTS

In the United States 22,046,957 automobiles are registered. There are 232,755 railroad-highway crossings.

In 1926 there were 2,492 persons killed and 6,991 injured at railroad-highway crossings. In the same period 20,819 were killed and 600,000 injured in automobile accidents upon our highways.

The elimination of railroad-highway crossings at grade would end crossing accidents. Generations of time and $19,000,000.00O are involved in this project.

In the meantime if motorists should use every possible precaution when approaching railway crossings. Only a few seconds delay is necessary and it may save hundreds of lives each year.

The Pennsylvania Railroad has recently issued an illustrated pamphlet, urging motorists to be careul. This pamphlet contains illustrations showing the various signal devices at crossings and how one can tell by these signals whether it is safe to cross or not. Motorists should secure a copy of this pamphlet and keep it in this automobile.

POPOSALS

$10,000 Bonds of the Town of Rock Hall Maryland.

Exempt from all State, County and Municipal Taxation.

FIVE PER CENT INTEREST.

Sealed proposals will be received by the Mayor and councilmen of Rock Hall at their office in the Town of Rock Hall on Saturday, June 25th. 1927, at 4.00 p. m., for an issue of Bonds to be known as "The Rock Hall Water Bonds."

The issue to be offered will be for $10,000 for the purpose of building, constructing, equipping, maintaining and operating water supply system in the Town of Rock Hall as authorized by an Act of the General Assembly of Maryland, passed at the January session of 1927 and approved by the qualified voters of the Town of Rock Hall at an election held for that purpose on the 30th day of April 1927.

The Bonds will be coupon in form, exempt from all State, County and Municipal taxation and numbered consecutively from one to twenty, both inclusion, and will be of the denominations of $500.00 each and shall bear interest at the rate of 5% per annum, payable semi-annually, on the first day of January and the first day of July of each year.

The bonds will bear date as of July 1, 1927. and will be payable in sums of $500.00 in each of the years beginning with July 1, 1928, and each year thereafter until fully paid with the right to the Mayor and Councilmen of Rock Hall, at their option, to redeem and pay all of said bonds at any time after the expiration of 5 years from the date of their issue.

Bids for the bonds must be accompanied by a certified check of 10 per cent. of the amount of the Bonds bid for, the same to be applied to the purchase price if the bidder be successful, all other checks will be returned to the unsuccessful bidders.

The right to reject any and all bids is expressly reserved. The bids will be publically opened and read at a meeting of the Mayor and Councilmen of Rock Hall at their office in said Town on the day and at the hour above stated.

EVEN in small homes it is possible to have the feeling of spacious rooms. Use French doors.

When open, a single pair allows doorways four or five feet wide, thus throwing two rooms together.

When closed, French doors allow the passage of light from one room to another, but still shut out sounds and odors.

1866 CURTIS
See that the woodwork you buy bears this trademark—the Curtis guarantee of quality

In the line of Curtis Woodwork there is a complete assortment of French doors for both exterior and interior walls.

Come in and see our stock. Examine these doors yourself and note their careful workmanship as well as their beauty. Also get a copy of "Curtis Woodwork" containing dozens of other items of built-in beauty. It is free.
