PROMPT VACCINATION CHECKS HOG CHOLERA

That vaccination, when performed in time, is a reliable means for checking the inroads of hog cholera is shown in the annual report of Dr. I. K. Atherton, inspector in charge of hog cholera work in the State of Maryland.

According to Dr. Atherton, ninety per cent. of all hogs treated when in an apparently healthy condition, were saved from the disease while in many cases an equivalent percentage of losses occurred among hogs treated after they had contracted the disease. If all the hogs had been properly and promptly treated upon first signs of the disease the mortality for the year would have been cut from 7,879 hogs, an exceptionally high number for Maryland, to approximately 1,500. This would have meant a saving of 6.380 hogs to the farmers of the State, it is declared.

Vaccinating after the hog has contracted the disease, Dr. Atherton points out, is like locking the proverbial barn after the horse has been stolen. In spite of this, surveys made of outbreaks during the recent show that in only 60 per cent. of the cases were the hogs vaccinated and of these, 35 per cent. of the hogs were sick or dead when the serum was administered. In 310 herds to which the serum was given 1,896 of the hogs were infected and of this number 1854 were lost.

A perusal of these figures, it is declared, shows that a much larger number of hogs were unnecessarily lost after the animals were permitted, through carelessness, to contract the disease.

Peach Leaf Curl Summons Orchardists

Peach leaf curl, a serious disease among the peach orchards of Maryland, is sounding the first call for seasonal activity among the orchardists of the State, according to Dr. R. A. Jehle, plan pathologist for the University of Maryland Extension Service.

The disease, it is said by Dr. Jehle, causes severe losses to peach growers who neglect the proper application of spray at the right time. The dormant period, before the buds begin to swell, is the proper time for the application of the spray and spraying can be done any day when the temperature is above forty degrees Fahrenheit.

Only one application of spray is necessary and if the work is thoroughly done during the dormant period growers need have no further fear from the disease. This is due to the fact that the disease propagates by spores and but one crop of spores is produced each year. The spores germinate about the time the peach buds begin to swell. Once the fungus has entered the buds it cannot be reached by spray material. The importance of early spraying is therefore evident.

For control of the disease, a spray of concentrated limesulphur (32 degrees Baume) twelve gallons to 100 gallons of water is recommended. If no San Jose scale is present on the trees, seven gallons of the concentrated lime sulphur will be sufficient or four pounds of copper sulphate may be substituted. If terrapin scale or red mite eggs are present in the orchard, an oil spray used according to recommendations of the manufacturer should be applied following the lime sulphur spray. This spary also should be applied before the buds begin to swell and when the temperature is above forty degrees Fahrenheit. The combination of a lubricating oil emulsion and Bordeaux mixture (3-3-50), if applied before the buds begin to swell, will control peach leaf curl, terapin scale, and San Jose scale as well as kill red mite eggs.

Peach leaf curl, a disease with which Maryland orchardists must cope each year, is sounding the call.

KENNEDYVILLE

Mr. and Mrs. Nat Johnston and son, Walton, and fried, of near Middletown, were Sunday visitors at Mrs. James Weers.

Mr. and Mrs. Joseph Trew and family, Mr. and Mrs. Thomas Hadaway and son, Mr. and Mrs. Wheat and children, Mrs. Meeks, Miss Hope Meeks and friend, Mrs. Kendall and Miss Mary Trew were entertained to dinner o Sunday by Mr. and Mrs. John Rollison.

Mr. and Mrs. Charlie Holden moved to their new home in New Port on Wednesday.

Mr. and Mrs. Harry Redmile entertained the Card Club on Friday evening.

Mr. and Mrs. James Caldwell returned home Friday after spending sometime in Wilmington and Philadelphia.

Mr. and Mrs. George Rasin and family spent Sunday with Prof. Harry Rasin and family in Millington.

Mrs. Acca Crew, of Massey, spent the week end with her sister, Miss Lula Van Dyke.

Mr. and Mrs. Howard Clendaniel attended the funeral of Mr. George Lane at Warwick on Monday.

Mr. and Mrs. George Williams, of near Worton, visited Mr. and Mrs. Thomas Van Dyke on Sunday.

Mrs. Kate Ford, of Still Pond, spent a part of this week with Mrs. John Rollison.

In office at Chestertown every Monday, Wednesday and Saturday; office hours 9 a. m. to 5 p. m.

CHEVROLET

National Demonstration Week!

Drive the New Chevrolet Six

No matter how closely you inspect The Outstanding Chevrolet of Chevrolet History—you will never appreciate what a wonderful achievement it is until you sit at the wheel and drive. So this week has been set aside as National Demonstration Week, and you are cordially invited to come in and drive this sensational automobile.

Not only is the new six-cylinder valve-in-head motor 32% more powerful, with correspondingly higher speed and faster acceleration . . . not only does it provide a fuel-economy of better than twenty miles to the gallon—but it operates with such *marvelous smoothness* that you almost forget there is a motor under the hood!

Regardless of the car you may now be driving—come drive this new Chevrolet Six. Come in today—and enjoy the greatest motoring thrill you have ever experienced!

-a Six in the price range of the four!

QUALITY AT LOW COST

The MAYTAG Water Remover alone cost $275,000

'Phone for a free trial washing. *If it doesn't sell itself, don't keep it.*

Deferred Payments You'll Never Miss.

For homes without electricity, the Maytag is available with built gasoline motor.

THE Maytag Company owns and controls the new Roller Water Remover—which was developed at a cost of over a quarter of a million dollars.

It has oversize rolls. The top roll is soft, the lower roll hard. The deep, flexible top roll hugs the lumps, folds and seams in the clothes, gushing the soap and dirty water out, leaving them evenly dry without injury to buttons, snaps or ornaments.
