THE PLAN OF THE Kent County Chamber of Commerce to bond Kent county for $750,000 to build fifty miles of nine foot concrete roads in Kent County immediately was met by the almost unanimous approval of those who attended the road meeting in the Court house last Saturday. Whether this plan is approved by the State Roads Commission and the Federal government and later voted favorably by the citizens of Kent county remains to be seen, but it has brought out the fact that the citizens of the county want some constructive road plan, whether it be concrete or some other hard surface material. The improvement of dirt roads for winter travel is a thing of the past and the advent of motor travel demands hard surface material. Nature gives us fertile soil and an ideal climate; our prosperity depends upon the proper directed efforts of our citizens. Roads are the work of man and as experience has taught that good roads are necessary for prosperity, it is up to us as to what we are going to do about it. Whatever our ideas are of the present plan or of any other constructive plan of road improvement let us do something while the iron is hot.
