city, we were satisfied that an additional appropriation of from $2500 to $3000 will be wanted to repair said wharf as directed by Resolution No. 75, approved the 4th of April, 1842, but as the present appropriation will be sufficient to repair it on a plan which we believe to be much better, we would respectfully recommend that the repairs be commenced at the northwest corner of the wharf, and continued eastwardly in a straight line to the gut in the wharf, and from thence continued to Caroline street, making the wharf at that point about fifteen feet wider than it is at present.

The inquiries directed by Resolutions No. 67, 77 and 84, have been partially attended to, and the reports and plats will be submitted to the councils, as early in the session as practicable.

Having furnished the Register with a tabular statement of the estimated amounts that will be required in 1844, by the annual appropriation bill, exclusive of the balances now due; which statement will be transmitted by him to you, it is deemed unnecessary to reiterate the same in this report. We would however state, that the amounts furnished him are as correct as could be arrived at, in view of the casualties that may occur.

Respectfully submitted,

HENRY WIGART,
JNO. F. HOSS,
JOSIAH RHEIM,
City Commissioners.
