OLDER BUT STRONGER

To be healthy at seventy, prepare at forty, is sound advice, because in the strength of middle life we too often forget that neglected colds, or careless treatment of slight aches and pains, simply undermine strength and bring chronic weakness for later years.

To be stronger when older, keep your blood pure and rich and active with the strength-building and blood-nourishing properties of Scott's Emulsion which is a food, a tonic and a medicine to keep your blood rich, alleviate rheumatism and avoid sickness. No alcohol in Scott's.

Can't Be forced To Accept Water Shipments.

William Cabell Bruce, general counsel to the Public Service Commission, has advised the commission that it had no authority to compel railroad companies to recieve in their elevators grain which had not been brought to them over the railroad' lines and would not be sent from the elevators over the companies' lines.

The effect of the opinion is that the elevators cannot be compelled to receive grain brought to the city from the counties on vessels and not intended for shipment from Baltimore over the lines of the railroads. The railroads receive such grain, it seems, but do so when and how it suits them. Under the opinion of Mr. Bruce the commission has no authority to change that practice.

The question was brought before the commission by Herbert Sheridan, traffic manager of the Chamber of Commerce, in a complaint filed against the Baltimore and Ohio, the Pennsylvania and the Western Maryland, which own elevators, alleging that they discriminate against water-borne grain from the counties, and setting forth that this alleged discrimination forces Maryland grain to other ports and causes considerable loss to Baltimore.

Mr. Bruce holds that the railroad grain elevators are under the commission's Jurisdiction only when they are used incidentally or secondarily to transportation; in other words, when used in connection with shipments over the railroads' lines.

Mother Has *Earned* This Comfort and Convenience

You would not knowingly deny the mother in your home any comfort or convenience that you are able to provide.

Then why have you overlooked the biggest improvement of all—good light? The one modern farm convenience that will lighten her labors—and add to her happiness and pleasure each day of her life.

Pilot-Carbide-Outdoor Lighting and Cooking Plants

have totally changed the old-fashioned methods of house and barn lighting and cooking in the country home.

300,000 "mothers" in farm homes all over the country today are enjoying these benefits:

Fine bright lights in every room. Safe lights, no matches needed. Convenient lights which eliminate all the disagreeable labor of caring for old-fashioned lamps and lanterns—

A gas cook stove in the kitchen—as convenient as gas stoves used for cooking in practically every city home in the world. Like city gas it does away with the bother and work of handling coal, wood and ashes. You have a fire that is always ready—lighted instantly and which can be controlled to a degree by turning the valve up or down—

A self-heating flat iron—always hot. A convenience that cuts the work of ironing day in half—enabling you to do better work in quicker time and in greater comfort. No hot stove—no roasting kitchen—the heat is all in the iron.

The PILOT is bringing all these comforts and conveniences to "mothers" in other country homes.

Consider your women folks. They are the ones that have to spend half their days in the grime of filling, cleaning and carrying lamps about the house—in slaving away their life and health over hot, cranky stoves.

Ask the "mother in your home" how much this beautiful, clean, always-ready light—a real gas stove and gas iron—will mean to her.

Ask yourself if she has not earned this comfort and convenience—when you consider its low cost—a thousand times over.

Then send for our illustrated catalogs and descriptive booklets giving all the facts. **Do this today.**
