Mr. Kennard Pinder of near Baltimore was a week-end guest of relatives.

Mr. Roger Ringgold and mother visited relatives at Fairlee on Sunday.

Mr. and Mrs. Simpson of near Wilmington were Sunday dinner guests of Mr. and Mrs. Howell Crew.

Telephone Teamwork

Answering the call, the above telephone girls from Chicago, Illinois, are some of many from all parts of the country helping out in Washington during the war.

Washington, D. C., is the center of a country at war. Nerves reach out from it to every section of the tremendous war effort. In January, 1941, Washington long distance telephone calls averaged 17,000 a day. Now there are 34,000 and it is expected there will be 45,000 a day by the end of 1942. The long distance switchboards and telephone circuits have been doubled. Hundreds of operators have been added.

Telephone people from all parts of the country have joined the telephone forces in the nation's capital to help handle the enormous demand for service—from Des Moines, Minneapolis, Omaha, Bridgeport, Cumberland, Topeka . . . from dozens of other towns and cities throughout the nation. Many of these men and women—most of them, in fact—came on very short notice. And when they arrived in Washington they went directly to work, with no delay and no lost time. They could do this because the job of operator, installer, cable splicer, repairman, switchboard man—whatever the job might be—is the same in Washington as it is in Fargo, North Dakota, or anywhere else in the land. They could do it because the whole basis of Bell System organization is such that when an emergency turns up in one part of the country, men and women, already trained, can be called from the far corners of the nation, if necessary.

These men and women know their jobs and are skilled in teamwork. And their successful handling of the extraordinary demands for service in Washington is one more example of the determination of the men and women of the Bell System to get the message through.

Six ways to save fuel in wartime are: Check heating equipment and make sure it is in proper condition; make the house heat-tight to prevent cold air from coming in and heat from getting out; use fuel efficiently; lower the home temperature; close off rooms not absolutely needed; dress warmly..

"Farm with safety and produce for freedom" might be a slogan for farm families during the war. A farmer injured on the farm, like a casualty on the battlefront is a loss to America's war effort.

After breaking all records this year, farm hens are expected to lay still more eggs next year. But poultrymen don't have to worry about getting too many eggs. We need all the eggs we can get—and then some.

A government program for the purchase and importation of rotenone from Brazil and Peru has been announced by the U. S. Department of Agriculture and the Board of Economic Warfare. Officials hope to import 4½ million pounds of the insecticide during the next 12 months to help make up for the reduction in imports resulting from invasion of Singapore and to facilitate increased production of truck crops and live stock Rotenone is an insecticide needed in combatting ticks, weevils, aphids, and other truck and livestock pests.

The demand for firewood has increased because of rationing of fuel oil. If you want to sell any cordwood that is beyond your own needs, better ask your extension forester or county agent about markets.

Superior Ore Supply

The Lake Superior district, which now furnishes four-fifths of America's iron ore, has reserves of present commercial grade sufficient to supply the anticipated demand upon the district for about 40 years.

Skyscraper Warden

The world's only air raid warden who inspects his territory by elevator is John J. Hennessy, ex-chief of staff for the New York police department and now an official of the Schenley company, who was placed in charge of civilian precautions by tenants of the 102-story Empire State building in New York.

Hair Producer

Argentina is one of the world's leading producers of animal hair, turning out about 9,000,000 pounds annually.

Office closed Every Wed. and Saturday at 5 p. m.

Versatile Radio Waves

Aside from commercial broadcasting and communications, radio waves are used for such unusual purposes as guiding ships to port, danger signals for navigators, airplane control and—in medicine—for exterminating parasites.

Play Safe

According to the best authorities, the minimum daily A, D and B Complex Vitamin requirements of the average person are: A 4,000 USP Units, D 400 USP Units, B1 333 USP Units, B2 2,000 Micrograms, and approximately 10,000 Micrograms Nicotinamide. The required amounts for other B Complex Vitamins have not yet been established.

Many people do not get enough of these essential Vitamins. DO YOU? Why not play safe by taking ONE-A-DAY BRAND VITAMIN TABLETS

Each ONE-A-DAY Vitamin A and D Tablet contains 25% more of the cod liver oil vitamins than the minimum daily recommended quantity.

Each ONE-A-DAY Vitamin B Complex Tablet contains full minimum daily requirements of Vitamins B1 and B2 and 10,000 Micrograms of Nicotinamide together with a substantial amount of other B Vitamins.

When you buy Vitamins, compare potencies and prices. Note how ONE-A-DAY Tablets conform to the average human requirements. See how reasonable the cost.

Get them at your drug store.

Kidneys Must Work Well-

For You To Feel Well

24 hours every day, 7 days every week, never stopping, the kidneys filter waste matter from the blood.

If more people were aware of how the kidneys must constantly remove surplus fluid, excess acids and other waste matter that cannot stay in the blood without injury to health, there would be better understanding of *why* the whole system is upset when kidneys fail to function properly.

Burning, scanty or too frequent urination sometimes warns that something is wrong. You may suffer nagging backache, headaches, dizziness, rheumatic pains, getting up at nights, swelling.

Why not try *Doan's Pills*? You will be using a medicine recommended the country over. *Doan's* stimulate the function of the kidneys and help them to flush out poisonous waste from the blood. They contain nothing harmful. Get *Doan's* today. Use with confidence. At all drug stores.
