SUFFERING FROM COLD

If you shiver in frosty weather, if you have cold hands and feet, if colds are stubborn and frequent, then your blood may be thin and impoverished.

SCOTT'S EMULSION

has been correcting this condition for nearly fifty years. It possesses rare powers for creating natural body warmth, for charging summer blood with winter richness and strengthening both throat and lungs.

The Norwegian cod liver oil in **Scott's Emulsion** is now refined in our own American laboratories which makes it pure and palatable.

JUST LIKE MOTHER

Small Girl Has Her Separate Skirt and Blouses.

Very Serviceable Outfit for School or Kindergarten—Use of Bloomers Makes Petticoats Unnecessary.

Even the very small girl has her separate skirt and her collection of dainty little lingerie blouses. The wee lass hasn't attained to embroidered georgette and chiffon affairs as yet.

Either cotton or wool fabric may be used for the separate skirt and matching bloomers for a six-year-old, and both of these garments are held snugly in place by means of buttons and buttonholes. The blouse should be finished at its lower edge with a firm, strong band with two rows of buttons set on it. The underneath row is for the bloomers, and these may be of white bone or pearl. The outer row, especially if the skirt is of wool fabric, should harmonize in color with the major shade shown in the skirt material.

Separate skirts and washable blouses for small girls make up very serviceable school or kindergarten outfits. A fresh, clean blouse every morning is a necessity, of course, but less labor is required to launder a blouse than an entire frock, and the skirt and bloomers can be worn several weeks without cleaning, other than a casual brushing and pressing.

Separate Skirt and Blouse.

Of course, the use of bloomers eliminates the necessity of petticoats, and here economy is again served.

Handkerchief linen, fine dimity or plain white lawn, are excellent blouse fabrics for the very young lady. The one shown in the sketch has clusters of tucks back and front, with narrow ruffle finishing collar and cuffs.

FEMININE FRILLS

The coat tunic is a novelty.

Many wraps are in crepe style.

Tapestry shopping bags are new.

Satin coats are heavily embroidered.

Many of the winter suits are belted.

Fluted ribbons are used for trimming.

Stock collars are made of white satin.

Crow blue satin makes a pretty dress.

Gray moire trims a black satin frock.

Some waistlines have dropped to the hips.

Astrakhan crowns are seen on French hats.

Hats may or may not match the suit in color.

Full sleeves of velvet are used on cloth dresses.

Sealskin is a good trimming for brown velour.

Suit coats are apt to fall full about the hips.

Evening gowns are straight and loosely girdled.

The tunic is not a rumor, but a fact of fashion.

Tunic effects are noticed on almost every frock.

Wool frocks are trimmed with fringe of monkey.

Furs for Mourning.

For those who prefer black furs to all others, or for those in mourning who find something incongruous in the brown or gray furs associated with crepe-trimmed garments, there are lovely pelts of black lynx, broadtail, black fox and sealskin made into conservatively modish muffs and scarfs and appropriately lined. The linings, by the way, have a good deal to do with the consistent attractiveness of these mourning sets. Generally they are of dull-finished crepe silks beautifully applied; or the lining may be of white satin veiled with black georgette crepe or chiffon. Occasionally gray chiffon or a gray brocaded satin is employed, but these are exceptions.

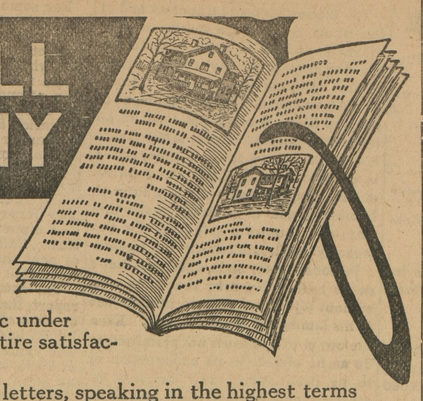
A BOOK FULL OF TESTIMONY

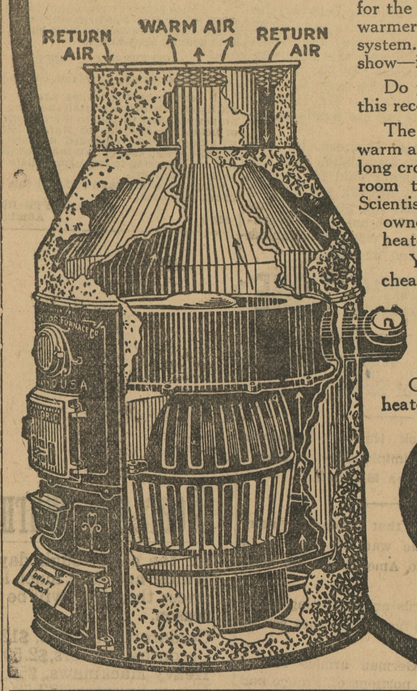


Thousands of Caloric Pipeless Furnaces are owned by as many people—in city, town and country, all over the land.

These owners installed the Caloric under a distinct and definite guarantee of entire satisfaction, or the removal of the furnace.

Hundreds have written voluntary letters, speaking in the highest terms of the Caloric. These letters have been gathered into a quite sizeable book that you may read for yourself if you will call and ask for a copy. This book is

Proof Positive That the Caloric Operates Perfectly and Saves Money



for the operator. In fact, the Caloric **is guaranteed** to make a warmer house on less fuel than any other furnace or heating system. The average amount of fuel saved—as these letters show—is 35%, and the average comfort obtained is 100%.

Do you know of any house-heating system that will beat this record?

The Caloric is a **one register** furnace. It heats by a natural warm air circulation. Its heat isn't cooled down passing through long crooked pipes, but rises freely and without hindrance from room to room till the whole house is delightfully comfortable. Scientists say that circulated heat is most healthful, and Caloric owners find it true—The Caloric is a perfectly healthful home heater.

You can install the Caloric in any home, new or old, and cheaply. In fact, a cellar isn't absolutely necessary—a pit under the house will do.

We have a Caloric set up and will be delighted to point out its many advantages and money-saving qualities.

Come in and read our surprising guarantee—no other heater can or does make one like it.
