BACK OF THE FIRING LINE

The Nation's Capital is linked with the country's various war activities by the toll and long distance lines of the Bell System. Thousands of miles of special wire systems have been turned over to the Government for its exclusive use. Switchboards in the Government departments at Washington have been enlarged and new ones installed. Right of way is given to Government business over all commercial lines, so that the Government chiefs may keep in constant touch with every phase of the Nation's great task and direct its progress intelligently and effectively.

FROCK FOR LITTLE MISS

This pretty frock would delight any little girl so fortunate as to possess it. It is fashioned of pale blue crepe de chine with hand-crocheted buttons, and adorned with a hand-made lace collar.

WOOL TRIMMINGS IN VOGUE

Tailored Suits of Velours Often Supplied With Knit Scarf Collar and Double Cuffs.

Don't worry that your knitting needles may have to lie idle for a few weeks. There will be plenty of chance to ply them in the new wool trimmings, which are coming to the fore with gusto on new blouses and sports clothes, says a fashion authority. For instance, you will find a tailored suit of wool velours supplied with a knit scarf collar of bright contrasting wool and double cuffs of the same, which can be pulled down over the hands in lieu of a muff.

Lots of wool girdles are seen on plain jersey gowns. Even crepe de chine shirtwaists are being supplied with collar, girdle or cravat of wool. A stunning black duvetyn sweater in a sleeveless style is embroidered with bright wools to wear under the coat suit for skating.

The beauty of this work is that scraps of wool can be put to good use. In making a sweater or tam, one always has a part of a hank left. One of these will make a delightful splash of color on a dark blouse if knit into a cravat with dangling ball ends.

EASY WAY TO SAVE THE MUFF

Attractive Hanger Can Be Made With Very Little Trouble and Very Little Material.

Instead of hanging your muff on a closet hook from the cord or bracelet provided at one end you can lengthen the life of the lining considerably by hanging your muff over a regular muff hanger. One of these hangers is easily made from an old wooden coat hanger with one arm sawed off, the other reversed so that the curve comes upward. It should be enameled some pretty light color, or else wound with ribbon. The wire hook can be placed at one end so that it can be hung in a convenient manner from the closet hook.

Another way to make an attractive muff hanger is to wind a thin wooden rod with ribbon, and attach ribbon hangers at each end with a bow or bone ring at the top. At one end the ribbon should be provided with a hook so that it can be unclasped while the rod is slipped through the muff.

NOVEL VEST AND CUFF SET.

This is one of the new vest and cuff sets in white cotton corduroy, bound with black satin. The style of Ascot worn with it is especially smart and promises to be fashionable for street wear.

Velvet Lounging Robes.

Negligees or lounging robes of velvet, fur-trimmed, are cut on simple kimono or bathrobe lines and are ideal garments to select for gifts.

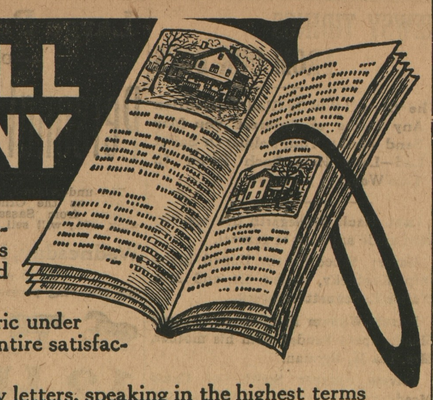
A BOOK FULL OF TESTIMONY

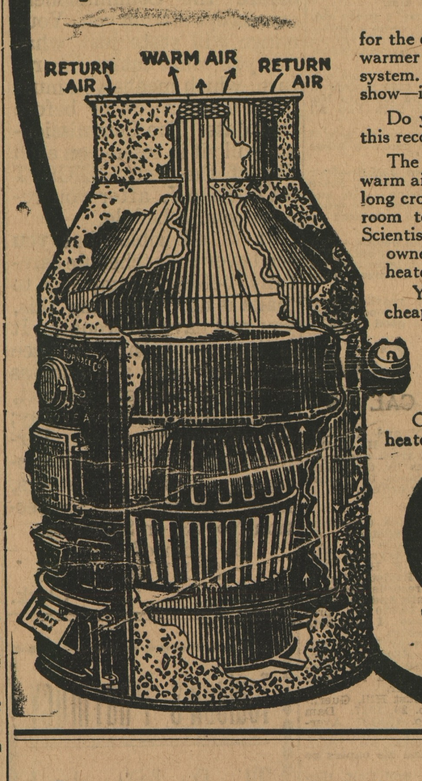


Thousands of Caloric Pipeless Furnaces are owned by as many people—in city, town and country, all over the land.

These owners installed the Caloric under a distinct and definite guarantee of entire satisfaction, or the removal of the furnace.

Hundreds have written voluntary letters, speaking in the highest terms of the Caloric. These letters have been gathered into a quite sizeable book that you may read for yourself if you will call and ask for a copy. This book is

Proof Positive That the Caloric Operates Perfectly and Saves Money



for the operator. In fact, the Caloric **is guaranteed** to make a warmer house on less fuel than any other furnace or heating system. The average amount of fuel saved—as these letters show—is 35%, and the average comfort obtained is 100%.

Do you know of any house-heating system that will beat this record?

The Caloric is a **one register** furnace. It heats by a natural warm air circulation. Its heat isn't cooled down passing through long crooked pipes, but rises freely and without hindrance from room to room till the whole house is delightfully comfortable. Scientists say that circulated heat is most healthful, and Caloric owners find it true—The Caloric is a perfectly healthful home heater.

You can install the Caloric in any home, new or old, and cheaply. In fact, a cellar isn't absolutely necessary—a pit under the house will do.

We have a Caloric set up and will be delighted to point out its many advantages and money-saving qualities.

Come in and read our surprising guarantee—no other heater can or does make one like it.
