Publishers—Richard H. Collins, Jr., & William S. Collins.

Published every Friday at The Transcript Building, Court Street, Chestertown, Maryland.

FRIDAY, JANUARY 28, 1944

One of the standing jobs on the farm today is hauling out manure Most farmers are putting it on the hay land that will be plowed for corn in a few months, some are spreading it on the new hay land and some are spreading it on their wheat or barley.

As far as milk regulations are concerned, the big thing is to get it away from the barn. This is also the main aim of most farmers.

If the manure is put on land to be crop to receive any benefit from the ments that it contains. If the hay crop was all clover, there will only be a relatively few growing plants that will be able to make use of the available plant food that will leach out of the manure.

If the manure is spread on new hay land the benefit will be seen in two crops, next summer's hay and the corn to follow. The manure will not give more hay plants, but will make the plants already present more prolific, stronger growing and somewhat larger.

If the manure is spread on the winter grain (wheat, rye, barley or winter oats) the effect will be seen in three crops.

The winter grain which is an active growing crops, will be able to convert this material into a usable organic form; the soil will be protected from dashing rain and soil erosion will be reduced considerably; grasses and lequmes will catch better giving a greater stand and this will not only give a higher hay yield but will also give more material to plow down for corn. Not only will there be more material to plow down for corn but there will be more nedules in the soil loaded with atmospheric nitrogen that will be used by the corn.

This is important since nitrogen fertilizers are available in limited quantities during war times, more grass plants will be secured per pound of seed sown, and the small grain crop will be materially increased on a yield basis.

This is a good farm managemnt.

The Kent Soil Conservation District Supervisors wish to announce that the District has just completed its fifth year in operation. The Supervisors are very well satisfied with the work accomplished in the District during 1943 and hope that they can be or more benefit to Kent County farmers during 1944.

During 1943, the District received 40 requests from Kent County farmers, for help with their erosion control and drainage problems. The acreage involved in these requests for assistance was 8,000 acres. Last year, 87 farm plans were prepared for farmers in the county covering 19,935 acres of farmland.

During the five years of operation the District has signed a total of 308 farm plans in the County covering 69,112 acres.

The highlight of the past year's accomplishments was the drainage work. 38,365 linear feet of open drainage ditch was dug which benefited 1,078 acres. In constructing the drainage ditches, 25,456 cubic yards of earth were excavated and spread

In addition to the drainage work done, the following practices were also established: 24 acres were planted to trees during the past y ;; 2,278 acres were cultivated on the contour; 32 acres of orchard were planted on the contour. 558 acres were planted to alfalfa. 218 acres were strip cropped.

The Supervisors of the District wish to express their appreciation and thanks to the County, Extension State Soil Conservation Committee Farm Security Administration, 4-H Clubs, local newspapers, local clubs and Soil Conservation Service for their splendid cooperation and help during 1943 and sincerely hope that this splendid cooperation will continue throughout the coming year and for many years to come.

—V—

By this time everyone should know about the "Food Fights for Freedom" program, since November was the month during which all forces were mobilized. However, the program will continue for the duration Everyone is asked to produce, to conserve, to share, and to play fair, so that all will have enough.

Grass drainage ways provide a means for run-off water to leave the land without cutting severe gullies and also produce a good crop of hay each year. They also provide nesting areas and travel lanes for wildlife.

It requires about 250 hours in the air, during which 12,500 gallons of gasoline are consumed, to train an average American pilot for the front lines.

Supplies of materials are expected to be ample for mixed fertilizer although potash will be about 10 percent short of last year. Labor supply in fertilizer plants is critical, and not more than half of the normal tonnage can move in the spring. Unless shipments of mixed fertilizer move regularly through the winter, farmers may not have it when they need it.

On Sunday, February 27, 1944, a new and simplified plan for two major food rationing programs will be put into operation, it is announced by the OPA. The two programs are those rationing processed foods; and meats, fats and oils.

BETTERTON

A Stewards meeting of the Methodist Church was held at the home of Miss Elizabeth Brice last Tuesday evening.

Mrs. Violet Curry has returned to her home after spending several days with Mrs. Gertrude Moore at the home of Mr. and Mrs. Emerson Moore in New Castle Del.

Mr. and Mrs. Billy Crew of Phila. the new bride and groom spent the week-end with his mother, Mrs. Hattye Crew.

Mr. William Owens was operated on at the Kent-Queen Anne's Hospital one day last week. Last report was that he was doing as well as could be expected.

A good crowd attended the card party at the Fire House last Friday night considering the bad weather A twelve pound ham and a cake were chanced off. Mrs. Walker Myers won the ham and Senator Brice the cake

Mr. Newton Ellis is in a Baltimore Hospital.

Mrs. Caldwell Crew has returned home after spending about three weeks with her daughters in Washington.

Mr. and Mrs. Chas. Geber and daughter of Phila., spent Sunday at their home here.

Mrs. Sarah Fallowfield had a minor operation performed at the Kent and Queen Anne's Hospital last Monday morning. She is doing nicely.

Mrs. Ernest Willis and family near Kennedyville visited her mother on Sunday.

Mrs. Ernest Horsey and Mr. Bayard Crew are some better we are glad to report.

Freddie, youngest son of Lieut. and Mrs. Campbell was operated on for appendicitis last week at Kent and Queen Anne's Hospital. He came home last Sunday and is doing nicely

Mr. and Mrs. Foster Smith have purchased a Trailer in which they will live instead of rebuilding their home which was recently burned.

John Nickerson of U. S. Army visited in our town last Sunday. He was once a resident of this town. He is looking well.

DEATHS

Mr. Edwin M. Boardman

Mr. Edwin M. Boardman, aged 86, of Baltimore, was killed on Wednesday, January 26, in Norfolk, Va., by a motorcycle, when crossing a street He never regained consciousness and died about an hour later. Funeral services will be held to-day in Baltimore.

Mr. Boardman was the father of Mrs. J. Holliday Riepe, formerly Miss Anne Boardman, and the grandfather of Lt. Richard F. Welton, III, whose wife was prior to her marriage, Miss Betty Beck.
