Suffrage Meeting—An enthusiastic Suffrage meeting was held at Chestertown Friday evening on the Pearce Square in front of the Court House. Considering the fact that the meeting was gotten up within a few hours, there was a good crowd in attendance, most of whom remained throughout the evening. Miss Gladys Greiner, the able young Suffrage Organizer for the State of Maryland was most active in organizing the meet Prior to opening the meeting, Mrs. P. A. M. Brooks in her car decorated with the purple, yellow and white banners of the National Woman's Party, drove the speakers over the streets, ringing a big dinner bell. Upon their return to the square, the principal speaker of the evening, Mrs. Waters, of Washington, D. C., was introduced by the Rev. T. F. Beauchamp. Mrs. Waters possesses a wonderful voice for an outdoor meeting, and in a most convincing and charming manner, held her audience spell-bound. Mrs. Lewis H. Wood, President of the Kent County Just Government League, followed Mrs. Waters with a few well-chosen words, urging the people to flood the post-office with letters to President Wilson and Maryland Senators, asking them to use their influence for the immediate passage of the Susan B. Anthony Amendment, now before the Senate. Following her, Miss Greiner gave a short talk, after which Mrs. Waters offered to answer questions. Quite a bit of suffrage literature was distributed and a number of new members acquired. Among the crowd were several prominent politicians, who ventured near enough to hear, though some of them seemed quite timid.

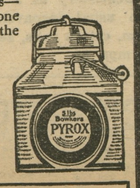
"For Potato Blight, I don't think PYROX can be Beaten."

"I have used Pyrox this season against bugs and blight. It certainly does the trick with the bugs, and *for blight, I don't think Pyrox can be beaten.*"

Such is the experience of Mr. E. R. Dissinger, Campbelltown, Pa., who ends his letter by saying—"I certainly would not do without Pyrox when growing potatoes."

No Fruit or potato grower can afford to overlook Pyrox. The fact that it serves two purposes is not a mere chance—but the result of scientifically uniting powerful insecticides and fungicides—thus making the one application do the work of two.



We shall be glad to send you the Pyrox booklet, and can supply any quantity you want, in small crocks, kegs, or barrels.

Patriotism That Pays

Every farmer wants to produce all he can this year. Many farmers cannot plant more acres, but every farmer can **increase the yield from every acre he plants,** by the proper use of a Low Cloverleaf manure spreader. Gains of 25 to 35 per cent are not unusual from soil topdressed with fresh stable manure spread with a

Low Cloverleaf Manure Spreader

The Low Cloverleaf is a wide spreading, easy running, light draft, narrow box spreader, made in three handy sizes—small, medium and large. The wide spreading device catches the manure as it comes from the beater, breaks it up into still finer particles, and throws it out beyond the wheel tracks in a wide, even spread. This is the kind of fertilizing recommended by all the authorities.

The entire load is spread in 3 to 5 minutes. The machine runs easily and lasts a long time because the working parts are all securely fastened to a sturdy steel frame which keeps them in place and in line.

The Low Cloverleaf spreader is backed by International Harvester reputation for quality machines. It does the work as it should be done. This year of all years, you should have a good manure spreader and you will profit most by using a Low Cloverleaf. Immediate delivery. Place your order now.

All persons are hereby warned not to trespass on my property especially in teams and autos.
