Local Notes

Good old summer time is here. The mercury reached 100 Tuesday and Wednesday it went "over the top" to 102. A shower Wednesday night brought relief.

**The Wm. H. Bowers farm located near Still Pond has been sold at private sale to Samuel Roseberry for $10,000.

**The W. C. T. U. booth at the Fair was in charge of Mrs. Tilghman Shafer assisted by Misses Ida Crew, Alday Clements and Mrs. Leonard Needles.

**The Clark farm situate in Quaker Neck and containing 32 acres, was sold on Saturday at public sale by W. W. Beck, Esq., trustee. Bedford H. Titter who tenants the farm, was the purchaser, and the price paid was $2,175.

**John D. Urie, Esq., trustee, sold at public sale Tuesday, the Wright farm of 172 acres situated near Millington. Thomas E. White was the purchaser at $3,375.

**Grover C. Hadaway has sold his garage business on Cross street, known as the Central Garage, to Webster Hadaway.

**The Marvil Package Company is now paying its basket-makers $2.00 per hundred for making baskets.

**Sheriff Carter and deputies "pulled" a number of crapshooters last Sunday morning. The men were all employees of the carnival company delayed in transportation. Heavy fines were imposed.

**Sheep raising is hard to excel as a money-making proposition. A lady had 10 ewes for which she paid $90. She sold these ewes and their lambs for $190.

**Several sheep were killed by dogs on the Baldwin farm tenanted by Mr. Geiser. The dogs belonged to nearby residents and were killed as they were devouring a sheep.

**W. E. Keyser was in the News office this week after being confined to his home for a week by sickness. Our 6-year-old boy hearing Mr. Keyser's name mentioned asked why we did not kill him. Said he, "then the war would be over." We explained that there was a vast difference between Mr. Keyser and the German Kaiser.

**The first theft of an automobile in Kent is here noted. Someone stole Charles D. Wood's car from his yard on Friday night, on the Lusby-Tolchester farm. He heard it being cranked and went to investigate but was too late to intercept the thief altho he shot after the car. A horse and buggy belonging to Geo. Hatcherson was stolen the same night. A reward of $50 is offered for recovery of car or conviction of thief.

Later—Mr. Wood located his automobile at the Western Police Station, Baltimore.

**Tomatoes have been bringing 65 cents. At Crumpton the cannery is buying fruit from New Jersey at 60 cents.

**The sale of the undertaking business of Thomas H. Casey & Company of Rock Hall, on Saturday evening brought one prospective purchaser, Thomas Casey, who will in future conduct the business alone.

**The purchaser of land on Chester river by W. J. Stewart is not the same company which bought the Walker land. Mr. Stewart is now representing another concern.

**Wesley Moffett has sold his 43 acre place near Millington for $4,000. Mr. Moffett got $1,700 off his tomatoes on this place last year.

**Harry Carter has bought a home at Rock Hall of Joseph Hogans and is making some improvements to same.

**Monday a shark was caught by Capt. Newton Downey, 10 feet long and weighed 500 pounds off Swan Point. It was put on exhibition for benefit of Red Cross. The sum of $13 was cleared. Masters Frank Blanchard, of Baltimore, and Bill Cahall, of New York, were chiefly responsible for this venture.

**The Russell Realty Company has sold the Ruth farm in Broad Neck, to Thomas H. Johnson, of Media, Pa.

"OVER THE TOP"

"Over the Top" is the one story of life in the trenches that has touched every responsive soul in America.

Since the book was published, 250 copies have been sold during every business hour, every day—or better than 4 copies every minute. In all, more than 3,000,000 people have read it. More than 25,000,000 people have read Empey's articles in the great newspapers of the country. Many thousands have been fortunate enough to crowd their way into the limited capacity of the great halls where Empey has lectured.

Now the whole loyal citizenship of the nation can see the "Fighting Sergeant" in action, can "go over the top" with him on the Hun Hunts. The marvel of motion picture photography brings to life before your very eyes the pulsing, breathing pages of "the most widely read book" of the twentieth century.

Go "Over the Top" With Empey!

See this great picture at the Lyceum Theatre next Friday and Saturday, Aug. 16, and 17.

The Kent County Pomona Grange will be entertained by Kennedyville Grange Saturday, August 17. Sandwiches will be served. The visiting Granges are requested not to bring cake. There will be no evening session.

WAR COSTING $50,000,000 A DAY

America's war bill has reached $13,335,877,000. With the expenditures during the first 27 days of July of $1,339,699,000 and estimated expenditures for the whole month of $1,488,500,000, this nation is now paying out approximately $50,000,000 a day, or over $2,000,000 an hour.

While the July bill will run about $24,000,000 under the June total, Treasury officials indicate that the developments have reached a stage where the cost to the United States will likely remain for some time around $1,500,000,000 a month. June thus far, has been the high-water month of the war, $1,512,000,000 having been expended during that month.

Some indication of the growth in expenditures may be seen in the fact that in April, 1917, when we entered the war, the month's expenditures amounted to only $289,000,000 so today's compilation shows a steady increase to a point where they are now over 500 per cent. of the first month.

ARMY SKIMS DISHWATER TO KEEP GUNS WORKING

So many are the army's uses for fats that almost up to the front line trenches the very grease is skimmed off the dishwater. Sammy has learned in the school of experience how the high explosive shells which splash up the scenery in front of him use up a whole lot of nitro-glycerine; and you can't have nitro-glycerine without fat. Moreover, in order to have those shells explode among the Huns instead of dropping harmlessly in No Man's Land the delicate machinery of the big guns has to be kept constantly greased. That's why the Sammies make no kick whenever the Quartermaster's Department thinks out some new way of conserving fats and greases. It's worth the while.

And here in Maryland it should thrill the patriot home to think that the tablespoonful of fat that is saved by a little extra care may be the means of blowing up a whole platoon of Huns.

If the baby-killers were hovering over Hagerstown, instead of London and Paris, everyone would be glad to contribute nitro-glycerine to clean the heavens of these agents of Kaiserism. If the German submarines were shelling the "fortifications" of Ocean City, as they have shelled equally fortified seaside resorts in England, there are mighty few Marylanders who wouldn't help shoo them off with a little High Explosive—if they had it.

But it takes time to turn little odd bits of fat into loaded shells. Nor is there any place where a loyal housewife can turn in the ounce of fat she saves in her cooking or the tablespoonful of grease she saves from her dishwater. Her task is to meet her own needs with her own savings. Thus she does not have to go into the open market to buy fat products in competition with Uncle Sam, and drive further skyward the price for both. In a hundred ways the war is teaching small communities, and even individual homes, to be more self-sustaining. This saving of fats for home use—for cooking, for washing, etc.—is one of the ways.

Warfare has changed a lot in its methods. Oliver Cromwell once said to his troops, "Trust in God and keep your powder dry." General Pershing's advice might be put like this, "Trust in God and skim the grease off your dishwater." Home folks have no gunpowder, but they have lots of dishwater. Thus they are able to carry out at home a very important order which is issued to the Sammies at the front.

JUST A BALLAD FOR SUPPER.

A newspaper woman recently escaped from Hun bondage in Siberia tells how the food problem is faced—where there really is a food problem. Her story should silence any murmurs there may be in Maryland about the terrible hardship which makes our peaceful homes substitute for a few foodstuffs some other things which are just as good.

She says: "The Siberian women are teaching their little ones the national songs as usual, and when there is nothing but a ballad for supper it is sung louder than ever. I have often assisted, and can certify that the children go to bed cheerful."

Soy beans contain 32 per cent. body-building material, 18 per cent. fat, besides 28 per cent. starch. They are the best warriors in the whole bean family.

A high medical authority states that in the Highlands of Scotland, where oatmeal porridge is in general use, malnutrition is conspicuous by its absence.

No more ice, especially the artificial kind, should be used than is absolutely necessary. The army folk need ammonia.

BAKED FISH BALLS.
(Official Recipes).

Mix one cupful of cold cooked fish with one cupful of cooked rice, add one beaten egg, one tablespoonful grated cheese, one teaspoonful lemon juice, and seasonings of salt and pepper. Shape into balls, place in a well greased baking pan, and brown in a hot oven. Garnish with parsley or cucumber slices.

CANNING WITHOUT SUGAR.

If you haven't the usual amount of sugar for canning, can without it. Such is the advice handed out by the Maryland Food Administration.

The products will keep perfectly until a time when more sugar is available, or until a complete sugar substitute program has been worked out.

Fruits put up in this way are excellent for pie filling and salads, and may be used in desserts, puddings, ices and punches.

In canning fruit without sugar can the product the day it is picked. Cull, stem, seed and clean fruit by placing in strainer and pouring cold water over it. Pack the product carefully in hot glass jars or tin cans until full. Use a tablespoon, wooden ladle or table knife for packing purposes. Pour boiling hot water over the product in the hot jar. Place rubbers and caps in position, not tight. If using the cans, seal completely. Place in the sterilizer vat, or canner, and sterilize for the length of time given below, according to the particular type of outfit used:

	Minutes.
Hot water bath, home-made or commercial	30
Water seal, 214 degrees	20
Five pounds steam pressure	12
Ten pounds steam pressure	10

After sterilizing remove the filled containers. Seal jars, invert to cool and test the joints. Wrap in paper to prevent bleaching, and store in a dry, cool place. If tin cans are used it will be found advantageous to plunge them into cold water immediately after sterilization to cool them quickly.
