The colored group of Kent County held their meeting, Thursday, March 22, at Bethel A. M. E. Church, at which time they reported $1,155.21. This amount was far short of what they had anticipated by nearly $600. When the group heard the report, they were sorely disappointetd, because they felt that their jobs had not been completed.

Mr. Whitworth, Chairman of the Red Cross, and Mrs. Drummond, committee member, reminded the audience of their fine showing, last year. They didn't want to feel that the people loved their boys any less, this year than last year.

After these two brief talks, many of those present resolved to return to their communities and contact those whom they had failed to see and to work on those communities which failed to respond.

Pictures of the workers were taken by the Transcript newspaper photographer. Music was provided through out the program by the Garnett High School Chorus.

Claims made on the basis of casual observations of different strains of hybrid corn that happen to be grown on the same farm are not likely to be dependable, say government corn breeders. The merits of numberous hybrid strains are being checked, however, by the state Agricultural Experiment Station. Farmers can rely on these camparitive tests. The research test plots are grown close together and such important factors as planting date, soil productivity, and stand are made as comparable as possible and yields are reduced to a standard moisture basis.
