Open Kettle Canning

Open-kettle canning is generally satisfactory for such products as pickle relishes, preserves and jams. It should never be used for nonacid vegetables or for meat, poultry and fish because the heat is insufficient to guard against spoilage and possible poisoning. It is not even approved for fruits and tomatoes because of the danger of recontamination before the jars are sealed.

Chinese Metal Exports

There are three nonferrous metals which China has produced for export, namely: tin, mercury and antimony.

THOMAS HINES PROMOTED IN DU PONT CO.

Wilmington, Del., April 18 — Thomas L. Hines, general assistant manager of the Cellophane Division, was today appointed manager, it was announced by E. I. du Pont de Nemours & Company. He succeeds John E. Hatt who died of a heart attack last week.

A native of Chestertown, Md., he studied engineering at Maryland State College, now the University of Maryland. Mr. Hines has been with the Du Pont Company since November 1, 1915.

He began as an assistant supervisor at the Carney's Point, N. J., smokeless powder plant and after two years, was transferred to the Engineering Department, working at Wilmington and Old Hickory, Tenn.

In December, 1919, he became a supervisor at the Arlington, N. J., plant of the Cellulose Products Manufacturing Department and later production superintendent. He remained there until after his transfer to the Du Pont Viscoloid Company in May, 1925.

Four months later Mr. Hines became manufacturing superintendent at Old Hickory rayon plant. In Dec., 1925, he was named assistant plant manager and in August, 1927, became plant manager at Old Hickory.

Mr. Hines was named assistant general manager of the Du Pont Cellophane Company three years later. When this company became the Cellophane Division of the Rayon Department, he was made assistant manager and recently was made general assistant manager.

Robert L. Richards will continue as assistant manager of the division under Mr. Hines.

Cotton and linen clothes are starched to make them more attractive and to restore their original finish. If starching is done properly, fabrics are smooth, glossy, and pliable, with just enough body and weight to make them feel like new. A starched finish makes clothes stay clean longer because smooth surfaces resist soil and shed the dirt more quickly than rough surfaces.

O'CONOR SENDS MESSAGE TO NEW PRESIDENT

Annapolis—Induction into office of President Harry S. Truman recalls the leading part played by Governor Herbert R. O'Conor in his nomination for the Vice-Presidency at Chicago last summer. It was only after Governor O'Conor switched Maryland's vote to Truman that the movement for the Missourian became a landslide.

In a letter to Governor O'Conor immediately following the Democratic Convention, President Truman wrote:

"I cannot adequately express to you my appreciation for what you did at the convention in Chicago. Maryland certainly "came thru" this time.

"I hope I will have an opportunity to personally thank you."

Immediately following President Truman's assumption of office, Governor O'Conor wired the Nation's New Chief Executive, offering his felicitations and guaranteeing fullest support of himself and the people of Maryland towards the prosecution of the war and the solution of the many other problems facing the new president.

Control Pests

Beans require rotenone or poison spray or dust to control the Mexican bean beetle. Cucumbers, melons and squash need a combination "melon dust" for control of cucumber beetle and plant disease; squash may require treatment for squash borer and squash bug, which is usually a rotenone dusting each week. Potatoes are covered with a poison for control of potato beetle and flea beetle, and are sprayed with Bordeaux or dusted with copper-lime for control of blight.

PRESTON P. HECK, Attorney

Ratification Nisi

S. Thomas Pippin, et al
versus
Loella Hurtt, et al
IN THE
CIRCUIT COURT FOR KENT CO.
In Equity, No. 3228

ORDERED, this 18th day of April, 1945 by the Circuit Court for Kent County, in Equity, that the Auditor's Account and Report, stated and reported by Herbert E. Perkins, Auditor, in the above entitled cause, be Ratified and Confirmed, unless cause to the contrary thereof be shown within three weeks from the date of the first publication of said notice, viz: May 11th, 1945;

PROVIDED, a copy of this Order be inserted in some newspaper printed and published in Kent County, once in each of two successive weeks before the 28th day of April next.

True Copy.

VETERAN FEDERALSBURG MAYOR RE-ELECTED

Federalsburg—Mayor Thomas Haven Chambers, who has served as Federalsbur'g chief executive since the town received its charter in 1929, was unopposed and re-elected in Monday's election. He had also served as a board member or president, continuously, with the exception of a single term, since 1908.

Mayor Chambers, now in his eighty-seventh year, takes a keen interest in the welfare of Federalsburg and serves faithfully without pay. His entire salary is donated to the Park Commission to help maintain the two beautiful parks, which he donated to the town.

CAMBRIDGE OFFICER GUARDS REICH GOLD

Cambridge — Bags and bags and more bags of genuine bold bricks, believed to be the entire gold reserve of Hitler's German Reich, recently located in a salt mine, is guarded by an American infantry force, commanded by Capt. Clarence Dean, of Cambridge, Md.

The treasurer, with millions of dollars in paper currency of the United States, England, France, Germany and other countires, was captured by Gen. Patoon's 3rd Army.

Boxed and crated in the same mine with the money are priceless art treasures from fifteen German museums.

Malarial Mosquito

The mosquito that carries malaria is the female of the species—and in her case she certainly is more deadly than the male. Moreover, this mosquito is of a special type known as the anopheles, and not only anopheles but a special kind of anopheles: The female anopheles that carries malaria sucks human blood, and the male does not. The female anopheles that carries malaria stands with her rear elevated, whereas all other mosquitoes in the United States stand parallel to the skin when they do their biting.

NOTICE

Application has been made to the undersigned by William Maxwell Crowding for a Beer License, Class D, on sale, generally, at the premises known as Betterton Yacht Club Pier which shall authorize the holder thereof to keep for sale and to sell beer at retail, at the place therein described, for consumption on the premises or elsewhere. A hearing on said application will be had by the undersigned at their office in the Court House on May 15, 1945, at 2 P. M., at which time any exceptions to the application will be heard.

THE BOARD OF LICENSE COMMISSIONERS FOR KENT CO.
a20-2t Frisby N. Willson, Clerk.

95 FARMERS BENEFIT BY LOCAL F.S.A.

Farmers in Kent County cooperating with the Farm Security Administration made outstanding progress during 1944 in food production, debt repayment and improved farm operations, according to the annual report of J. Weldon Walbert, County FSA Supervisor, Chestertown. Since 1935, 95 farm families have received financial and management assistance of some kind through the local office.

Performance records on 1944 farm and home plans indicate a substantial increase in all important food production categories for the third consecutive year, including milk, meat, poultry, feed corps and food for home consumption.

Payment of indebtedness by FSA families was the highest in the history of the program with local collections totaling $46,473.00 during the past year. Over 8 families paid their loans in full, many ahead of schedule while many more were paid up in advance on their obligations. During the same period loans totaling $38,441.00 were made. While making repayment on their indebtedness, many FSA families also purchase war bonds.

Considerable progress was made toward goals set up last year by the County FSA Committee in improving farm operations through loans and management assistance to increase the number of high producing dairy cows, make adequate farm machinery available, and carry out improved farm and home practices, Walbert said.

Much of the credit for the fine showing made goes to the work of the County FSA Committee which reviewed loan applications, advised on the program and helped adapt it to local conditions and problems. Members of the committee include Ralph Williams, Worton; Olin Davis, Golt; Walter Walbert, Chestertown and Roy Mitchell, Kennedyville.

Blazed Trails

Oliver Loving (1813-1867), early trail blazer, was born in Hopkins county, Ky., later moved to Texas and took up his home in Jack county. Like many early settlers he engaged in cattle raising. Loving made the first drive of cattle to Chicago from Texas in 1858. After the Civil war he and a partner made several trips north and then tried a drive to the western market at Santa Fe, N. M. This proved an ill-fated venture as he and his trail companion were set upon by Comanche Indians and Loving was wounded. Believing himself to be fatally stricken, he forced his companion to leave him. He survived his wounds.

U. S. Armed Forces

(Continued from Page 1)

fighting pumps, each capable of pumping 1,100 gallons per minute.

Under 200 feet long and displacing less than 1,000 tons each, the cutters are paving a Victory Highway to Tokie as America's mighty invasion forces blast the Japs from island to island. The Cutter "W" has seen action at Eniwetok, Kwajelain, Saipan, Tinian, Guam, Iwo Jima and six other islands. She operated within fifty yards of the Tinian beach on D-Day there.

"We came to Saipan about three weeks after the original invasion there, and the first day an ammunition dump exploded about three hundred yards away," Lieut. (j.g.) Milton Dorf of Chestertown, Md., executive officer of the "W" said. The "W" rapidly cleared Jap wreckage from the harbor, provided channels for shipping, towed a Navy PBM from a reef, and ingeniously converted a Jap ship, with its keel resting on the bottom and deck above water, into a storage depot.

Lieut. Ernest L. Tillet, 1219 Elder Avenue, Norfolk, Va., commanded the "W" during those activities. A veteran of twenty years' service, he was recently replaced by Lieut. James A. Anderson of North Cove, Wash. Lieutenant (j.g.) Dorf replaced Lieut. Otto Schlemmer, 26 Suomi Street, West Quincy, Mass.

In ten months' Pacific duty the cutter "P" has operated from six bases, and served as escort for merchant ships. She is commanded by Lieut. George M. Chalker, 2615 Havens Court, Boulevard, Oakland, Calif. a veteran of twenty-five years' service, including ten in United States harbors. Lieut. (j.g.) John M. Silva of Hyanis, Mass., is executive officer.

Ten days after the landing on Guam and while the Japs were resisting fiercely, the cutter "T" arrived and stayed for months aiding in the conversion of the island into one of our most important Pacific bases.

The Coast Guard's traditional ability to save lives at sea was upheld by one cutter which rescued sixty men from a concrete refrigeration barge blown onto a reef by a typhoon. The heavy seas were pounding the barge to pieces when the Coast Guardsmen made an unsuccessful attempt to reach the distressed men in a lifeboat at night. Closely observing the men with aid of a searchlight, the cutter waited until morning, when a second and successful rescue attempt was made, shortly before the barge was destroyed.

A British ship disabled by the storm was towed safely into port by another cutter. Several times United States fliers forced down at sea have been rescued.
