USED FAT LICKS TWO SHORTAGES!

Miss Anna Mae Loftus, Laboratory Assistant at National Oil Products Company, Harrison, N. J., shows how kitchen grease, scraped from skillets, skimmed from soups, melted down from table scraps, helps to make thousands of civilian and war needs—in this case—critically-short paper. Left to right, Miss Loftus pours wax emulsion into a beater containing wood pulp. Stearic acid, one of the by-products of used fat, is necessary in the manufacture of this wax emulsifier. The processed pulp is then pressed into sheet size and when dried, is paper. Here's another reason for saving every drop of used cooking fat, and rushing it to the meat dealer for cash and extra ration points. It's needed now more than ever.

A Ninth Air Force Bomber Base, France—The promotion of Joseph D. Moore, 21, of Millington, Md., to First Lieutenant was recently announced by the 397th Bombardment Group, famed as the "Bridge Busters."

A B-26 Marauder pilot, Lt. Moore flew over 25 combat missions in the European Theater of Operations after arriving overseas on November 20, 1944. He has been awarded the Air Medal and 4 oak leaf clusters.

Becoming operational on April 20, 1944, his group—commanded by Colonel Richadd T. Coiner, Jr.—proceeded to set a new medium bombardment record for the ETO by flying 100 missions in 119 days. Knocking out 9 of the 14 bridges destroyed over the Seine river, France, earned them the nickname of "Bridge Busters." On D Day, the 397th twice bombed Normandy coastal defenses in aiding the invasion. From then on, they bombed communication lines, defended strongpoints and railroad yards, coordinating their attacks with the swift-moving ground troups of the 12th and 21st Army Groups as they swept across western Europe.

Lt. Moore entered the service on January 21, 1943. His parents, Mr. and Mrs. Dudley Moore, live in Millington.

The League of Maryland Sportsmen has pledged its whole-hearted support to the University of Maryland Extension Service and expressed its desire to aid, assist and promote the 4-H club conservation educational program to the fullest extent possible.

TOWN AND FARM WOMEN BEATING CITY FOLKS AT FAT SAVING

Our government knows that city women have done an outstanding job saving used fats—but, now that you town and farm women have rolled up your sleeves, you are providing more used fats per kitchen than any other group in the U. S. Keep it up! 100,000,000 *more* pounds of used fats are needed this year to help make vital war supplies. Without *your* record savings, we'll never make that quota.

Save every drop! Remember, it's the small amounts that fill the salvage can faster. Drippings, skimmings, scrapings, and fat scraps melted down. Your butcher will give you 2 red points and up to 4¢ a pound. If you have any difficulty, call your Home Demonstration or County Agent.

More Maple Sugar Plan

More sugar from maple trees at lower cost is predicted for the not too distant future by agricultural scientists, who have been working to propagate trees with sap two or three times as sweet as is usual today. Cuttings from trees with high sugar percentages have been raised in greenhouses, and will soon be transferred to forest areas.

Refresh Self

At some time during the day or evening, anyone who has the responsibility of caring for a sick person should get out for exercise and recreation. Take time for personal grooming, always keep clean and neat, in person and in habit. The use of a coverall apron in the sickroom will be convenient for quick change in between the roles.
