Uncle Sam Pins Orchids On Local Women For Saving Used Fats!

Things have really been happening to fat-salvage-collection figures since town and farm women got busy on the job! Latest official government records show that their fat savings have left the excellent record of city women 'way behind.

But it isn't a drop too much. This year, we face a shortage of 1 billion, 500 million pounds of fats in domestic supplies. Tons more of war and home-front supplies made from fats are needed!

Farm folks get more meat these days than most city people—so it's up to them to save the fats. Skim stews, soups, gravies. Scrape pans. Melt down meat trimmings. It all helps you fill the fat-salvage can, and you get up to 4¢ and 2 red points a pound. If you have any difficulty, call your Home Demonstration or County Agent. Approved by WFA and OPA. Paid for by Industry.

PRODUCE MORE FOOD FOR FREEDOM

the CONSERVATION WAY

Although the war has hampered drainage work because of shortage of manpower and big machinery, the seven Eastern Shore soil conservation districts have made great progress, according to C. P. Merrick, state drainage engineer stationed at Denton.

The soil conservation districts were set up by local farmers to assist individual farmers as well as Tax Ditch groups with the drainage of agricultural lands. County, State and Federal governments are pooling their resources under direction of the seven district in carrying on the work.

Mr. Merrick states that to date 722,230 linear feet of open farm drains have been dug in six of the seven districts, namely, Worcester, Wicomico, Dorchester, Queen Anne's, Caroline and Kent; 22,654 acres have benefited, and there have been increases of from 10 to 100 percent in yields of crops as a result. These figures do not include the work done by the CCC Camps when they were in operation several years ago.

A payment of 6 cents for every cubic yard of earth removed from **a drainage ditch is offered farmers** this year by the Agricultural Adjustment Agency, Mr. Merrick points out. The amount paid, however, cannot exceed $5 per 100 linear feet. This payment is made in addition to the normal farm allotment and should make it easier for farmers to hire help to drain their lands. Payments will not be made unless the AAA county committeemen have approved the project prior to digging.

Farmers desiring assistance with drainage problems may consult their county agent or AAA committeemen, or call the local Soil Conservation District, all of which are located at the county seat.

From where I sit ... by Joe Marsh

Best Way to Celebrate The Peace

We were sitting on Bill Webster's porch the other night, talking about how we'd celebrate when the Japs surrendered.

Lem Toller allowed as how he was going to start his vacation then and there—and spend it fishing. Ed Mapes was going to take his family to Mountain City for a big feed and a picture show.

Bill Webster had the last suggestion. "I'm going to pour a glass of beer and drink a toast to our fighting men," he says, "and that is just as far as my celebrating's going to go. I'm going to make sure of being on the job next morning."

From where I sit, Bill Webster has the right idea. When Peace comes, there's going to be a whole new world to build. There's a really big job to be done. A glass of beer, the beverage of moderation, and a good night's sleep to be ready for the task ahead—that's the *right* way to welcome Victory!
