Postmaster Bowers today issued a warning to thrifty persons hereabouts to be on their guard against buying counterfeit War Savings Stamps. Fraudulent blue stamps of the 1919 series have been made by counterfeiters, the postmaster has been advised, and are being sold to the unwary. "Ben Franklin's picture appears on the stamp, and in the counterfeit stamp, old Ben seems to have the mumps in his left jaw. Indeed, there is a pronounced swelling. Then under the portrait the lower of the two left dots is comparatively indistinct, and the vertical opening between the lines in the lower left part of the numeral '2' in the date '1924' is closed. The principal feature of the fraud, however, is the swollen cheek.

Velie Six

POWER

Velie success in the development of power is known thruout motordom. The power plant of the new Velie 34, maintains and enhances the Velie reputation.

Here you will find everything you expect of motor science for 1920—a new assurance of energy for every emergency for the steep climb—the hard going in snow, slush, mud, clay and sand—as well as for speed on the broad, hard highway.

It is a remarkable motor. Here is a new experience in quick, sure pickup. Here is a flexibility that marks a distinct advance in this quality for which engineers have striven so long. We are proud of the new Velie's power plant—and you will justify our pride after an inspection of its performance.

COMFORT

Plenty o froom even when the car has five odult passengers. Easy, restful riding—even when the roads are not the best.

These things so essential to the 1920 ideal of car comfort, are realized in the new Velie 34, to a degree that sets it apart from all ordinary light sixes.

RELIABILITY

"The Name Insures the Quality" is a slogan backed by records in the case of the Velie. The new model 34, we can confidentially assert, will add new lustre to the line. For more than ten years Velie cars have made exceptional history of performance. Some of the first Velie cars are in faithful use today.

STYLE

When you make your comparisons of the new Velie 34 for style, you will appreciate at once the smartness and distinction which mark it as one of the finest creations of 1920 art in automobile design and finish.

This is the result of special concentration by the Velie body builders, long famed for their leadership in this line. With its high cowl, its extra length defined in well-harmonized lines, its charm of perfectly-unified form, it expresses a style ideal of which any owner will be proud in any company.

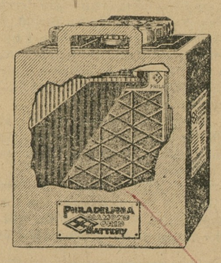
THE GIANT SHIPYARDS AT HOG ISLAND, PHILADELPHIA, ARE CONVINCING EVIDENCE OF "DIAMOND CONSTRUCTION FOR STRENGTH."

An Automobile Starting Battery Guaranteed for Two Years!

A GUARANTEE is the measure of a manufacturer's faith in his battery—based on past performance. If he guarantees his battery for only ninety days or six months or a year, he is probably sure that it will last that long. But beyond the period of the guarantee he is asking you to take a risk which he is not willing to take himself. It is unbusinesslike for you to take such a risk when you can buy a Philadelphia Diamond Grid Battery that is guaranteed for TWO YEARS.



The Diamond Grid is the framework on which each of the plates is formed. Its Diamond Construction is similar to the Diamond Construction used on the ways and cranes at Hog Island and in most other strong structures. In your battery the Diamond Grid means strong plates and is your insurance against plate trouble.

The Philco Retainer is a sheet of hard rubber closely perforated with long narrow slots. A Retainer is placed flat against the active material on each side of each positive plate. In any battery the positive active material tends to slough off as the battery grows older. The slots in the Philco Retainer are so narrow that the material cannot readily pass through them and the result is greatly prolonged battery life.
