Part of the faculty of the Daily Vacation Bible School at Raum Chapel.

Bottom Row—Minnie Hynson, Supt.; Mary Hill, Clara Boulter, Anna Thomas, Eva Bryden. Back Row, James Boulter, Myrtle Kelley, Dr. J. C. Byrd.

The school will meet every day from 8:30 A. M. to 10:30 A. M., Monday to Friday for two weeks. It is scheduled to start July 22nd and will end August 2nd. Children from 4 to 14 are invited to attend.

The Boy Scout Troop No. 146 has loaned the school an American flag for the session.

LOCAL CANNERY NOW WORKING ON CUCUMBERS

Plan Year Around Activity

The Chestertown Cannery is busy handling cucumbers from fifty acres contracted for in this section.

It is understood that this cannery expects to increase its acreage to 600 acres if suitable contracts can be secured.

Future plans are to run the cannery the year around to include corn and the finsihed pack of the cucumbers. The cukes are put through a temporary pack and later finished. They are harvested twice a week during the ripening season.

Sails for Wheelbarrows

In northern China sails are often used to help propel wheelbarrows.

REAL ESTATE TRANSFERS

William J. and Eulah K. Smith, to Wilbur Ross Hubbard, property on Maple Avenue.

Frank B. and Miriam J. Hines, to Henry G. and Carolyn P. Fisher, property on Front Street, Chestertown.

Robert T. Cochran to Sarah Cochran Plummer, then to Ralph L. and Evelyn Z. Lindenmuth, property in First District.

EASTON AIR PORT CERTIFIED FOR PILOT TRAINING

Part Of National Defense Program

Good news for everyone interested in aviation and its place in the future defense policy of America is the recent announcement of the Tred Avon Flying Service's participation in the government's new Civilian Pilot Training Program. The Civil Aeronautics Authority has authorized only four airports in the state to give this instruction. The training has to be under the sponsorship of a civic organization, and the Rotary Club offered its services for this purpose.

The first phase of the program will deal with the training of non-college students, male and female, between the ages of 18 and 26. Only those students qualified physically by an examination given by a regular C. A. A. flight surgeon, for a commercial CPT grade student pilot's certificate, will be eligible to enroll in the competitive ground school course. The size of the ground school class or classes will be unlimited.

Two-hour classes will be held 4 evenings a week at the Easton High School, beginning July 22nd. There will be 72 hours of ground school instruction in History of Aviation, Civil Air Regulations, Navigation, Meteorology, Parachutes, Aircraft and Theory of Flight, Engines, Instruments, and Radio Uses and Forms. At the end of these classes a certain percentage of the students enrolled, whose standings are highest, will be awarded flight scholarships. The scholarship includes from 35 to 50 hours of flight training at the end of which time the students will be given an examination for their Private Pilot's Certificate. Flight training will begin some time in October.

Further information about this course and government Refresher courses for pilots who already have licenses, either active or expired, may be obtained from the airport at Easton.

Whether a pilot is trained at the government's expense under the CPTP, or not, he is no more subject to call by the government than any R. O. T. C. college student or any other civilian. He may, if he wishes, continue his training in the Army or Navy, but this would be entirely voluntary.

Modern Building Materials

There are many building materials of sound and durable content now available to the architect and contractor which were virtually unheard of a decade ago. These materials, processed in new forms and combinations, have widened the scope of design and construction which may be offered the prospective home builder and buyer. Of many substances—glass, steel, plastics, rubber, metal, and wood—the new materials were "depression born," resulting, in many cases, from the necessity of reducing costs and providing durability and strength at the same time.

Time Moves—Backwards

According to the American Magazine, Clayt Rosencrans, a barber in Nebraska had his clock dial made with the numbers running backward so that his customers can tell the time by looking in the mirror.

Expensive Research

Over 1,600 industrial research laboratories in the United States spend $750,000 for industrial development and research each working day of the year, according to a recent survey.

Highway to Court

Taking a tip from rubber expansion joint fillers used to halt heat buckling on concrete highways, west coast tennis officials are constructing concrete courts with white rubber joint fillers which allow for summer expansion and also serve as permanent court markings.

MARYLAND BANKS MEETING BUSINESS LOAN DEMANDS

Shows Reported Hoarding Of Funds False

Fifty-four per cent of Maryland's commercial banks made more than 269,000 loans totaling over $349,000,000 to business firms and individuals throughout the state during the year 1939, according to the second semi-annual survey of bank lending activity of the American Bankers Association made public today.

The survey, which was participated in by 96 banks or 54 per cent of the 177 commercial banks of the state, showed a definite expansion of bank credit in the field of new loans The number of new loans made between July 31 and December 31 was 4,121 greater or 14 per cent greater, and the dollar volume of new loans made during this period was $8,582,647 or 16 per cent greater than reported by an equivalent number of banks for the previous six months.

The 96 banks reported that during 1939 they made:

64,529 new loans total.	$117,858,595
202,758 renewals total.	221,805,996
2,654 mortgage total.	9,648,593
269,941	$349,313,184

The survey reveals that business firms in the state are using less than one-third of the "open lines of credit" maintained for their use on the books of the banks.

KINGSTOWN CLUB ELECTS OFFICERS FOR COMING YEAR

Develops Attractive Community

The Kingstown Community Club, located near the Queen Annes end of the Chester River bridge, held its annual election on July 11th at the home of Mr. and Mrs. Howard B. Pyle.

The officers for the coming year are:

President, Mrs. Harry Tucker.
Vice President, Miss Fanny Hartman.
Secretary, Mrs. Oscar Hansen.
Treasurer, Miss Selma Hansen.

During the past year the Club has kept in condition the local park, planted the park banks with roses, and furnished a lighted Christmas tree for the park. It has had a very alive and successful two years, accomplishing much toward the betterment of the community.

The annual picnic for the members and friends will be held on August 1st.

Ocean Peaks Warm Norway

Guarding the coast-line of Norway is a range of underseas mountains which effectually turn back the icy currents flowing down from the Arctic circle; but the warm Gulf Stream, flowing higher in the water, passes over the peaks and brings the country a moderate climate for a great part of the year.

MIRACLE HOUSE OPENED FOR AT CLAIBORNE

130 Children Attending Preventorium

The Miracle House, the tuberculosis preventorium for white children, opened this week when nearly 130 children from many parts of the State arrived at Claiborne, on Maryland's Eastern Shore, for the summer to be spent in a quest for good health.

The preventorium was first operated in 1919. Since that time more than 2700 children have been restored to health. It is operated by the Maryland Tuberculosis Association.

Children attending the Miracle House are contact cases of tuberculosis and physically below par. Most of them are malnourished and underweight.

At the preventorium the children are under the care of a physician and a capable staff of trained supervisors. They are fed nourishing food, are given plenty of rest and spend long hours in the sunlight and fresh air. Everything is done to improve their health and give them a pleasant vacation.

Tuberculosis makes its greatest inroads upon persons who are physically run down. By building up the health of these children who have been living in contact with the disease, many cases of tuberculosis are prevented.

The Miracle House will be open throughout the Summer and the chlidren will stay for the whole season.

Twenty-One Years After

In spite of the fact that it has been 21 years since the World war ended, unexploded shells and grenades still are being dug up on the battlefields of France. Last year, 2,000 tons of metal were dug up in the region of the Somme, where some of the biggest battles of the war were fought.

Beer Barrel Taxes

The federal tax on a barrel of beer is $5. State taxes range from 62 cents per barrel to $4.96, the latter being the tax in the state of Maine.

Industrious Bee

To make one pound of honey requires 80,000 bees collecting four pounds of nectar from flowers, according to the American Honey institute.

(14)
IN OUR present State laws, local authorities have highly effective weapons to use against bootleggers who are robbing their public treasuries.

Under the law making the possession of liquor on which the State tax is unpaid a criminal offense, and the act enabling authorities to obtain search and seizure warrants by showing probable cause, one County recently launched a *blitzkrieg* against its bootleggers that netted splendid results.

Bootlegging today need not and should not be tolerated.

What one County has done can be done by all.
