CROP REPORT FOR MARYLAND DURING WEEK ENDING 23RD

Season Ten Days Late Of Normal

This was the warmest week of the season to date, and it was dry and sunshiny. Hot weather prevailed during the 20th-22d. Light, widely scattered local thundershowers occurred on the 22nd and 23d. For the week the mean temperature was about 7 degrees above normal and the sunshine was 20 per cent above normal.

The weather of the week advanced the growth, maturing, and ripening of crops and fruits, which are fair to good, but grasses and pastures deteriorated to mostly poor in the eastern and central divisions and to fair in western Maryland, except they continue good in Garrett County. Rain is needed.

Harvesting wheat and rye and threshing barley began in the Garrett County highlands. Harvesting wheat and rye ended and threshing began over the remainder of western Maryland. Threshing continues in the central and eastern divisions. Yields of these grains are poor to good. Yields of wheat of bushels to the acre are: Millsboro, 6 to 15; Pisgan, 10; Stockton, 15 to 22; Rock Hall, 15 to 30; Uniontown, 20; Manchester, 20 to 25; Joppa, 25, and of fine quality. The wheat crop is two-thirds of normal at Sharpsburg. Rye is yielding 25 to 27 bushels to the acre at Manchester. Oats heads are filling in Garrett County. Oats are ripening in the northern counties from Allegany to Carroll and are being harvested elsewhere over the section, except harvesting ended and threshing began ovre the southern and central Eastern Shore. Oats are yielding 25 to 35 bushels to the acre at Stockton.

Digging early potatoes continues in the southern and central counties and began in the northern counties, except Garrett County; yields are fair to good. Late potato plants are good stands, are being cultivated, and are beginning to bloom in western Maryland. Planting late potatoes continues in the central and eastern divisions, except finished in the northern portion thereof; the first planted are up to good stands, and are 2 inches high at Joppa.

Early tomatoes matured and ripened rapidly and picking began, except in Garrett County where they are developing and sizing. Late tomato plants are being cultivated.

Corn plants are making good growth; the early ones are tasseling and silking. Harvesting sweet corn began over the southern and central Eastern Shore.

Early varieties of apples, peaches, and pears are ripening and are being picked. Early Harvest and Yellow Transparent apples are being picked at Belair and Chewsville. Mayflower and Red Bird peaches are being picked at Joppa.

Soy beans are good at Northeast nad Ridgely. The cucumber crop was short, sweet pepper plants are blooming, and pumpkin plants are thinned out at Hurlock. Haying in Garrett County is yielding a heavy crop. Sweet potato and tobacco plants are good.

The season is one week to ten days backward of normal.

Residents on Congress avenue, Havre de Grace, had more excitement than they expected Friday morning when they saw a deer. The frightened animal swam down the Susquehanna river and came ashore at the foot of Congress avenue. Running west it "called" at the home of Mrs. Ida Cochran and Mrs. Malvine Mitchell, who, incidentally are visiting relatives in Georgetown, Delaware. They not being home to welcome Mrs. Deer the animal jumped through the large window on the front porch, ran amuck through the living room, disheveling furniture. The frightened doe then jumped out the window the way she went in, turned north at Lodge alley, ran to the old "cut", west along the tracks, and was last seen escaping to the woods.

PEACHES

Our **GOLDEN JUBILEES** will begin to ripen about

JULY 29

and should be at their best during the first 5 days of August.

We will be open for business from 7 A. M. to 9 P. M. week days. Sundays from 1 P. M. to 6 P. M. only

Five Per Cent for Health

The average American pays about 5 per cent of his income each year for medical services.

Collegiate Journalists

Two-thirds of American college students believe college newspapers are manned by staffs sufficiently mature to take intelligent editorial stands on national and international questions. This was learned by a poll taken by Student Opinion Surveys, intercollegiate sounding board of student thought published at the University of Texas.

Alcove Problem Spot

The small alcove in older houses is often a decorative problem spot. One ingenious decorator solved the problem by giving it a different wallpaper treatment and furnishing it with an Eighteenth century mahogany desk, chair and bookcase. The arch made the alcove a pleasing picture from the living room and it gave comparative peace, if not isolation, to the family book lover.

A Farm Telephone makes a Good Neighbor

The telephone can keep the farmer and his family in close touch with friends and with church, lodge and grange affairs.

Ask at our business office how to get your telephone.

THE C. & P. TEL. CO.

THE GAS STATION MAN WAS SORE AT ME!

• Ordinarily, I get along fine with my neighbors. So I was surprised the other day when I stopped at a filling-station and got a sour look from the owner.

"What are you trying to do?" he said. "Put me out of business?"

He pointed to my car then and grinned. "It's these new Fords," he told me. "They get the darnedest gas mileage! And it seems as if they never burn any oil! Doggone it all—every Ford V-8 you sell takes money out of my pocket."

"That's not the way to look at it, Joe," I told him. "When folks get behind the wheel of one of these new Fords they want to go places. It's so full of ginger and so easy to handle that they get more fun out of driving. I'll bet they put enough extra mileage on the car to keep you busy, even if they do save on gas and oil."

He scratched his head. "Sounds as if you've got something there," he said. "I'll be around to see you."

P.S. He bought a Ford V-8!
