DAIRY FACTS

GIVE DAIRY CALVES GOOD MILK RATION

A great many experimental feeding trials have been made to determine whether dairy calves could satisfactorily be raised on substitutes for whole or skim milk. These feeding trials failed to produce satisfactory growth where attempts were made to almost entirely eliminate whole or skim milk from the ration by substituting other feeds. The gain was lower and the cost higher. This led to feeding trials to determine the minimum amount of whole and skim milk that could be used and get very satisfactory growth. Thus far no wholly satisfactory substitute has been found for whole and skim milk in getting dairy calves well started.

The method used in the limited milk ration is to get the calves well started on a whole and skim milk ration, at the same time encouraging them to eat as much grain and hay as possible, and then wean them as soon as they are able to continue to develop satisfactorily on grain and hay alone.

The Missouri and Minnesota experiment stations did some work of this nature, using a grain mixture composed of 4 parts corn meal, 1 part wheat bran, 1 part linseed oil meal. The roughage used was alfalfa hay. This and the grain mixture were fed as soon as the calves would eat the roughage and grain. The average of 7 trials resulted in a daily gain of 1.23 pounds for each calf which was 94 per cent of normal gain when compared to calves fed on unrestricted skim milk ration. The results indicate that 170 pounds of whole milk and 650 to 700 pounds of skim milk will give a calf a satisfactory start so it will continue on grain and roughage.

Some Extra Grain Will Keep Up Flow of Milk

A little thought to the feeding of fall-freshened cows will be well repaid in increased returns. Too many cows freshen in poor condition and cannot be expected to yield a good return. To begin with a dry period of at least six weeks is essential to enable the cow to build up a reserve. As the cow is fed during this interval will largely determine her production after she freshens. A little extra grain at this time means dividends later. Freshening in good flesh the cow starts her lactation at a big advantage, and a larger total production is the result.

Wheat pasture is excellent for keeping up the milk flow and takes the place of more expensive feeds. But it is too washy and not concentrated enough for cows giving much milk. Production can be held up with economy by supplementing the pasture with ground barley, equal parts ground oats and corn chop, or about six parts ground kafir or sorgo heads to one of cottonseed meal. This grain should be fed at the rate of one to five pounds of milk as long as the pasture is good. Don't expect the milk flow to increase materially but it will hold up over a much longer period of time when prices are good and therefore more than pay for the grain consumed now.

Milk Tests Continually Vary as to Butterfat

Milk tests are continually varying. The cow does not give the same quality of milk every milking, but the average is practically the same. As soon as milk is drawn from the cow, the butterfat begins to separate and come to the top because it is lighter than the milk. Most variations in testing come from the fact that it is very difficult to get samples of milk that are exactly alike. The majority of errors in testing milk, and which cause dissatisfaction, are because it is extremely difficult to get a correct sample. When milk stands overnight, much of the cream has risen to the top, and it is next to impossible to get it reincorporated with the milk as it was before. Two samples taken from this milk will differ.

Dairy Notes

A cow requires about eight gallons of water a day.

* * *

Put an old horse collar on the cow that sucks herself.

* * *

A milch cow produces an average of from 60 to 70 pounds manure a day, estimating solid and liquid.

* * *

Giving milk is largely a voluntary act of the cow. Kept in a sweet temper she will yield her milk.

* * *

If one feeds and treats his cows well and is punctual with his feeding and milking, economical milk production should be the inevitable result.

* * *

Maintenance of the proper speed and even pressure on the separator handle is an important factor in the separation of milk and cream.

* * *

A bushel of corn fed to a dairy cow before calving is sometimes worth as much as two bushels fed after freshening.

Sealed Proposals
$17,000
Kent County, Md.
Lateral Road Bonds

Notice is hereby given that the County Commissioners of Kent County, State of Maryland, will receive sealed bids for the purchase of SEVENTEEN THOUSAND DOLLARS OF COUNTY LATERAL ROAD BONDS, up to 12 o'clock noon on

TUESDAY, April 6th, 1926

This issue of said bonds is authorized by Chapter No. 203 of the Acts of the General Assembly of Maryland, passed at the January session 1922. Said bonds are to be dated July 1, 1926, and bear interest from date of issue at the rate of five (5) per centum, per annum, payable semi annually on January 1 and July 1 of each year. Said bonds are of the following denominations and fall due as follows:

2 $1,000.00 bonds, due Jan. 1st, 1930
2 $1,000.00 bonds, due Jan. 1st, 1931
2 $1,000.00 bonds, due Jan. 1st, 1932
2 $1,000.00 bonds, due Jan. 1st, 1933
2 $1,000.00 bonds, due Jan. 1st, 1934
3 $1,000.00 bonds, due Jan. 1st, 1935
4 $1,000.00 bonds, due Jan. 1, 1936

Said bonds are exempt from State County and Municipal taxation in the State of Maryland.

Each bid must be accompanied by a certified check payable to the order of the County Commissioners of Kent County, for two per cent of the amount of each bid to insure the County against loss resulting from the failure of the bidder or bidders to comply with his bid. Said bonds must be paid for on or before July 15th, 1926, at which time delivery of said bonds will be made to the purchaser or purchasers thereof.

The County Commissioners of Kent County hereby reserve the right to reject any and all bids.

JESSE H. USILTON,
S. J. JOHNSON,
T. RINGGOLD JONES,
County Commissioners of Kent Co., Maryland.
Test—JOHN MEDDERS,
Clerk to the County Commissioners of Kent County, Maryland.
