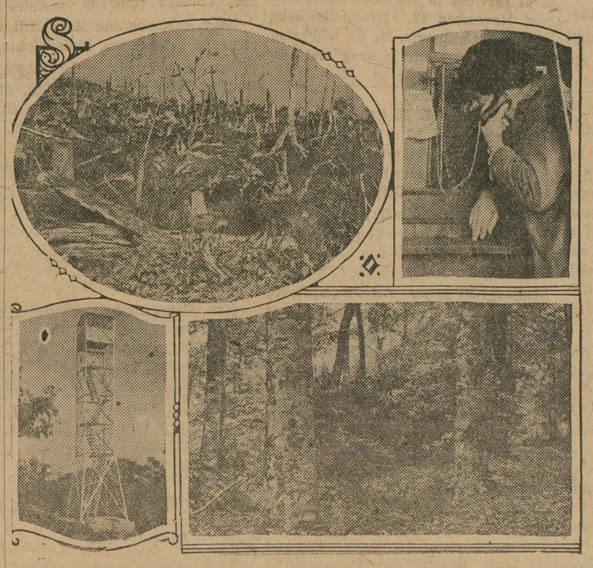
We are buying Eggs, Chickens and Calves at Market Prices.

TELEPHONES ON "MAIN STREET" EXPECTED, THOSE IN FORESTS CAUSE FOR SURPRISE

Forest Supervisors, Rangers and Wardens Stress the Importance of Telephone Service for Fire Protection. "Most Necessary," They Say



The burnt-over section of woodland shown in the oval above once looked much like the forest beauty spot below. The forest ranger high up in his signal tower spots smoke in his area. The telephone brings the necessary help to overcome the danger.

Telephones on "Main Street" cause no surprise to anyone. But almost everyone is greatly surprised to find telephones in the forests. The forest's service departments of the state forests of Maryland, Virginia and West Virginia and the national forests of the latter two states maintain networks of telephone lines in which they place great dependence as a means of forest fire protection. In these three states more than 21,000,000 acres of national and state forests are furnished protection by telephone lines.

Forest service supervisors, rangers and wardens everywhere stress the importance of telephone service as a means of forest fire protection. "The telephone is the most efficient branch of the forest fire department in time of emergency," they say.

Lightning, campers, railroads, incendiarism, and steam saw mills are among the chief causes of forest fires, according to William B. Greely, U. S. Forester, at Washington.

"A small fire," he says, "may spread into a conflagration; and fire, matches, and burning tobacco should be used as carefully in the forest as in the home. Carelessness, in respect to the use of fire in forests may mean loss of lives, homes, live stock, and forage, and a vast amount of timber which belongs equally to all citizens."

Supervisors, rangers and fire wardens believe that "an once of prevention is worth a pound of cure," and they make every effort to secure the cooperation of those living in, or traveling through the national or state forests over which they have control, to see that there are no fires caused by carelessness.

During the danger seasons—fall and spring—the main attention of the fire protection forces is devoted to preventing fires. Extra men are employed; the forests are systematically patrolled, and careful look-outs are maintained from high points. Roads and trails are built so that all parts of the forests may be quickly reached; tools and food for the use of the fire-fighters are stored at convenient places. The ranger stations and look-out points are connected with the offices of the supervisors by telephone so that men may be quickly assembled to fight dangerous fires which the patrolmen cannot overcome themselves.

There may be no need for alarm, but the telephone is ready for any emergency.

Chinese Invented Coins

Hard money or coins were invented by China in 1000 B. C., by Greece in 700 B. C. and by India in 500 B. C.

Result Worth the Cost

The American dead and wounded toll from eight years' fighting in the American revolution was 20,000.

A Solution

One way to "tri-sect" a domestic "triangle" is to put all three of them in jail.—Arkansas Democrat.

Ballad and Song

A ballad is a simple song, where each verse is sung to the same music. Song has a very broad interpretation, and has many varieties. There is the simple folk song, much the same as the ballad, and the art song, where each verse is set to different music. The dictionary gives 16 different name songs, which vary in character and sentiment.

Power in Coolness

Keep cool, and you command everybody.—St. Just.

NEW RATE OF INTEREST

THE FEDERAL LAND BANK has reduced its annual rate of interest to borrowers on Farm Lands to

5¼ Per Cent

Making the cheapest rate of interest ever offered. No other bank can or will match this rate, which makes the Federal Land Bank the CHEAPEST medium through which you can borrow money on Farm Land.

Let me talk the matter over with you.

The Kent News Is $1.50 A Year

Bird Has Wide Range

The sora is a bird of the rail family. This is a swamp bird that lives entirely in marshes, usually fresh or brackish waters, and ranges over the entire North American continent, as far north as southern Canada. It winters from the southern part of the United States south to northern South America. These birds are all poor flyers. They run through weeds and rushes and have the appearance of being weak-winged. However, they make rather long migratory flights. The sora lays 6 to 18 eggs. In some regions the bird is hunted as game, and an open season is provided by federal law.

"Double-Crossing"

Doctor Vizetelly says in regard to the expression "double-cross" that a New York boss in the early '80s testified before an investigating committee that when a constituent asked a favor he made a record of the name and fact and if he intended to grant the petition marked a cross after the name. Sometimes he would change his mind, in which case he added a second cross. In his testimony he would say: "I crossed Smith; I double-crossed Jones, etc." Possibly this is the origin of the expression "double-cross' as used today.

Edelweiss From Asia

The edelweiss, the one Swiss flower with which travelers are sure to become acquainted, is not of Swiss ancestry at all, not even of European. According to Dr. Heinrich Handel-Mazzetti, of the Vienna museum of natural history, it is an immigrant from Asia, where the human race itself came from. The Austrian botanist's researches on the distribution of the living and fossil relatives of the edelweiss have reached across the Near East, through the Himalayas, down into Indo-China and north across China and Japan.

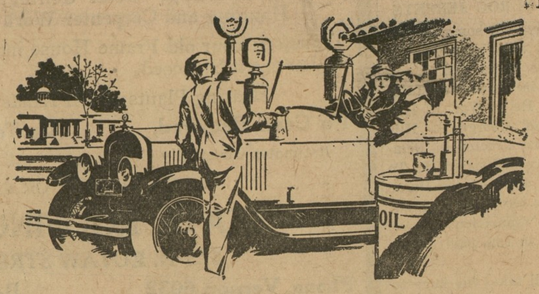
His Mean Revenge

A fish peddler in Australia has discovered a new method of revenge against the woman who jilted him for a local prohibition leader. Twice a week he stops his cart in front of the woman's home and goes around to the rear with a bag in his hand. Returning to the cart he removes numerous empty beer bottles from the bag and lines them up in a row beside the cart. The neighbors do not suspect that he carries them in with him.

Wealth's Disadvantages

When a man is prosperous distant relatives come very close if they can. When he goes broke even near relatives become very distant. Wealth has its disadvantages just as poverty has, and it takes a philosopher to choose wisely between them.—Gall.

Some drivers claim they never take chances—yet they often purchase motor oil without knowing its name.



If you stop to think how much depends on correct lubrication—mileage, freedom from repairs, resale value, even personal safety—you will always insist upon a reputable brand like "Standard" Motor Oil. All of the best qualities are united in "Standard".

STUDEBAKER COMMANDERS

[Stock cars, fully equipped, and run under the supervision of the American Automobile Association]

Break 11 more records

1000 MILES at 75.365 miles per hour (also 5-mile, 10-mile, 50-mile, 100-mile and 500-mile records)

24 HOURS at 75.623 miles per hour (also 1, 3, 6 and 12 hour records)

TWO Commander roadsters were started at the Atlantic City Speedway October 6, 1927, under supervision of the American Automobile Association. Not one, but both of them, established new stock car records for 1000 miles, for 12 hours and for 24 hours. Neither of them required any mechanical attention during the entire run. After finishing the 24-hour grind the winning Commander spurted 15 miles at 82,62 miles an hour.

The Commander now holds all stock car records for periods up to 24 hours and distances up to 1000 miles.

Other Speed and Endurance Records Set by The Commander This Year

5000 miles in less than 5000 consecutive minutes—April, Culver City, Calif., under A. A. A. supervision.

New York Harbor to San Francisco Bay, 77 hours and 40 minutes—new coast to coast record set in September.

First and second places in 75-mile stock car race at Atlantic City under A. A. A. supervision on Labor Day.

First, second and third places in 75-mile race for stock cars listing below $2000—Charlotte, N. C., September 20th, certified by A. A. A.

Climbed Pikes Peak in 22 minutes, 47 seconds—new record for stock cars priced below $3000. Supervised and certified to by A. A. A.

The Studebaker Commander, "greatest achievement of post-war automotive engineering," is the creation of the finest research and engineering organization ever assembled by one company.

D. G. Roos, chief engineer, and W. S. James, research engineer, have not only splendid new laboratories and a million-dollar proving ground to work with, but also staffs of experts in every phase of automotive design.

Studebaker cars are engineered, built and broken in to run 40 miles an hour from the day you buy them.

And with ordinary gasoline they will excel the performance which other makes attain only by the use of high-compression engines and high-priced fuel.

Let us loan you a Commander—America's champion motor car—to tell you its own story of thrilling performance and luxurious comfort.

New Low Prices

The Dictator	$1165 to $1295
The Commander	1495 to 1625
The President	1795 to 2250
Erskine Six	895 to 965

All prices f. o. b. factory, including front and rear bumpers and 4-wheel brakes.
