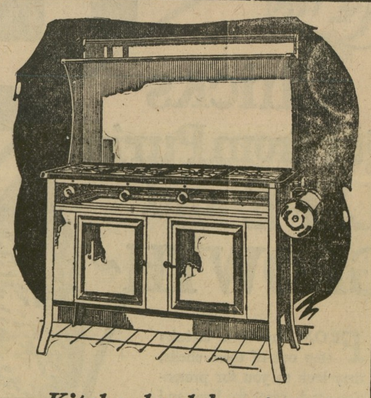
'How long should it take to boil water?'

2 qts. of water raised from 45° to boiling
-in 6 min. on the new KITCHENKOOK
-in 7½ min. on an ordinary city gas range
-in 21 min. on a popular make of kerosene range



These figures are the result of scientific tests made in the engineering Department of a leading American University. They are given here to show the progress which is being made in the development of fine cook stoves.

***Kitchenkook** has set a new High Mark in Cooking Speed*

Comparative tests show that the *Kitchenkook* is faster than any other type of cook stove; faster even than city gas, the usual standard for comparison.

Kitchenkook makes its own gas from common gasoline, bringing to homes located beyond the reach of gas all the convenience, cleanliness and comfort of city gas service. It's economy more than any stove you have ever used. No wicks or chimneys, no smoke, soot or kerosene odor. Master burner lights in less than one minute; then all burners turn on or off as wanted, just like gas. No waiting, no delay; fire regulated instantly just as you want it. *Kitchenkook* is so simple children can use it in perfect safety.

Don't fail to ask us for a demonstration of the wonder stove that is revolutionizing the whole industry, the most talked of stove today. Made in 16 attractive popular priced models, including white porcelain enamel ranges, with oven and broiler.
