USED CARS
of many makes
are traded in for the
New Ford

Some people think we accept nothing but used Fords for trade-ins when selling the Model A. That is a wrong impression. Cars of many makes are traded in for the new Ford—some low priced and some not so low—and many of them are unusual bargains in unused transportation.

There is a definite reason why we can offer you extra value in these used cars. The value of the new Ford is so high and the cost so low, that excessive trade-in concessions on buyers' used cars are not possible. In other words, we set the trade-in figure at just what the used car is worth.

This means that when we offer a used car for sale, there is no "padding" the price to take care of an unreasonable trade-in allowance. Our used-car department is based on a spirit of fair-dealing . . . fair-dealing with the first owner who makes the trade-in, and the second owner who buys the unused mileage.

Model T Fords are reconditioned, and carry a guarantee. Other makes are priced strictly according to the unused transportation in them. Come in today and see some of the bargains we are in a position to offer.
