A new Turnpike lately located little to the left of the present one will pass through it, which will shorten the distance from town to about 3½ miles. Moores Run passes through the tract, the greatest part of which is covered with wood. There is a most beautiful eminence on it, and in the opinion of the best judges the above tract is superior in quality to any in the neighborhood, having 100 acres well covered with large trees, and might be turned into meadows. Those persons who are in arrears to the subscriber for the county Levy for 1813, are hereby warned that his Deputies will proceed to enforce the payment agreeably to law, immediately.

To have neglected this measure until this time, would have betrayed a represensible partiality on the part of the Collector, as it respected others, who have long since discharged their accounts; and unless prepared to advance the deficiency thence arising from private means, it would have been highly unjust towards the creditors of the County; but this seeming indulgence was caused solely by the difficulties consequent on the approach of the British forces, and such as would now avoid compulsory process, are respectfully invited to call at the office, St. Paul's lane, without delay

LEE'S AGUE DROPS

Never was a medicine offered that has a greater claim on public approbation than this as many thousands can testify.

Mr. Noah Ridgely,

SIR—You are at full liberty to use my name in recommending your Lee's infalliable Ague and Fever drops; as from repeated trials of them in my family I have always found those drops to be a truly infalliable medicine: never failing to produce a speedy and effectual cure. I do therefore confidently recommend them to all persons laboring under this distressing disease, and firmly believe that they will always perform a compleat cure if taken agreeably to the accompanying directions.

Yours respectfully,

You are at liberty to publish his case.

Wonderful Curiosity.

To be seen at the Centre Market Space.

The public are again presented with an opportunity of beholding one of the most singular and extraordinary curious animals perhaps ever seen,

The Female Guanacos,

Faintly delineated by M Buffon, but more minutely by Doctors Mitchell and Ackerly of New York, from occular observation of the present animal, whose extraordinary stature and peculiar form bespeak her to be the greatest and most satisfactory natural curiosity ever imported or exhibited in this country. To attempt a minute detail or description of this animal would prove fallacious, as there appears to be a similarity of every species of animal united in one, with many other peculiarities uncommon to all. The wonderful agility of this curious animal, whose speed is accurately estimated at the rate of 76 miles an hour—its innocent mode of defence when tormented—its stature—its downy coat or covering (which the ancient kings and queens of Persia prefer for their nuptial beds, from a belief that it excites amour and repose) but above all, its peculiar and very singular formation, impress the beholder with wonder and astonishment, and excites him to reflect on and admire the wonderful productions of the Divine Architect, in filling the universe with life in such a boundless variety of forms.

The admirers of natural curiosity are respectfully assured, that the GUANACOS is particularly worthy their attention.

☞ The Guanacos to remain at the above place for 3 days only—Admittance 25 Cents—Children half price—Families and parties by contract.

DEXTEROUS FRAUD.

Through the activity and industry of Mr. Delacy, a discovery has been recently made of a dexterous fraud on the patent office, by which a patent for a most valuable invention has been obtained, to the prejudice of the real inventor. Should those concerned in committing it be prosecuted, as the public interest requires, it would be a means of guarding from similar attempts and impositions in future.

STEAM BOATS.

A patent has been recently granted, under the great seal of the United States to Nicholas J. Roosevelt, Esq. a citizen of New Jersey, as the original inventor of steam boats, as now in use.

In the hands of Mr. Roosevelt, we may anticipate this invention being made generally beneficial, convinced that neither selfishness nor avarice will predominate in the exercise of the rights in him thus vested. It is said that his claim to the invention is of many years standing, and that he has lately invented a circular steam engine of simple construction and of increased force—an invention that is wholly American.
